Knowledge Management

- Strengthen and build _tools_, _processes_, training, and _support_ for the collection, analysis, sharing, and use of data that impacts school's strategic planning and instructional decision-making and the support they receive to be successful.

What we want to hear from schools as a result of this work

- I can make more informed decisions.
- I am seeing my data in a new and insightful way.
- I see integrated data.
- These tools to make my job easier.
- I can see clearly how my school is going compared to other schools and the city
- I know how to spend money and resources better.
- I feel better equipped with data to coach, support, and evaluate teachers better.
- I feel that the Networks and district know my school better this year and support my goals more explicitly.

This work will establish a cycle for sharing and collecting the most important data on our schools

CAO's Office, School Support Network Office & Knowledge Management

- Tools
- Guidance
- Training & support

Networks/EDs
- 10-20 principals
- Facilitator
