

Vital Signs 8

Education and Youth

Education and Youth¹

Today's job market requires a higher level of education and skills, placing a greater need for students to remain in school and perform at higher levels. Over the past several years, Baltimore City has experienced improvements in school and student performance. An important indicator tracked by BNIA-JFI, chronic absence, has also decreased over the past few years. Students that are chronically absent have lower rates of graduation and are more likely to do poorly in their school performance. BNIA-JFI tracks a number of indicators for both elementary, middle, and high school students in an effort to measure the educational conditions and performance of children in Baltimore City. The education and youth indicators tracked by BNIA-JFI are described below.

Dropout Rate and High School Completion

- The percentage of students in grades nine through 12 in Baltimore City who withdrew from school before completion declined by almost two percentage points (1.8%) from 9.6% in 2007 to 7.8% in 2008. In 43 of the 55 CSAs, the percentage of students that withdraw before completion declined. The decline in the percentage of students that withdraw was greatest in Dickeyville/Franklintown (-7.0%) followed by Fells Point (-5.9%). The greatest increase in the percentage of students that withdraw was in Inner Harbor/Federal Hill (6.0%) and Greater Roland Park/Poplar Hill (3.5%).
- The percentage of students in 12th grade that received a Maryland high school diploma or equivalent (i.e. certificate/GED) at the end of the year rose from 81.0% in 2007 to 82.8% in 2008. In 2008, three of the 55 CSAs had 100% of the 12th graders receiving a high school diploma or equivalent. These CSAs included Canton, Fells Point, and Greater Roland Park/Poplar Hill.

High School Graduates Prepared for Higher Education and Labor Force Participation

- The percentage of Baltimore City public school students that successfully completed courses qualifying them to enter the University of Maryland increased by 12.0% from 54.0% in 2007 to 66.1% in 2008. In 2008, nearly two out of every three graduates (66.1%) successfully completed courses that qualified them to enter the University of Maryland. From 2007 to 2008, the greatest increase in the percentage of graduates that

¹ As with previous versions of *Vital Signs*, school data is provided for the previous two years. *Vital Signs 8* provides schools data for the 2007 and 2008 school years.

completed these courses was in Fells Point (57.5%), Dickeyville/Franklinton (38.6%), and Southeastern (38.3%).

- The percentage of Baltimore City students that graduated and successfully completed courses in Career/Technical Education (CTE) programs increased slightly from 5.5% in 2007 to 5.6% in 2008. These programs are important in that they provide real world, hands on training and experience for students pursuing a career.
- Seventeen percent (17.0%) of Baltimore City high school students that graduated in 2008 successfully completed both CTE programs and entrance courses for the University of Maryland. This percentage declined from 24.1% in 2007.

Youth Civic Engagement

- As a measure of youth civic engagement, BNIA-JFI tracks the percentage of persons between 18 and 25 registered to vote and who voted in the general election. Since 2002, both percentages of students have increased. In 2008, 72.9% of persons between 18 and 25 were registered to vote, and 47.1% of persons 18 to 25 voted in the general election.

Student Attendance

- The percentage of elementary school students that were chronically absent (missing more than 20 days of school in a school year) decreased from 12.6% in 2007 to 11.0% in 2008. In 2008, almost 3,700 elementary school students were chronically absent. The CSAs with the greatest percentage of chronically absent elementary students were Perkins/Middle East (17.5%), Allendale/Irvington/South Hilton (17.2%), and Forest Park/Walbrook (16.6%).
- The percentage of middle school students that were chronically absent decreased from 30.6% in 2007 to 24.1% in 2008. In 2008, almost 4,700 middle school students missed more than 20 school days. There were 12 CSAs in 2008 where more than three out of every 10 middle school students were chronically absent with the greatest percentage of chronically absent middle school students residing in Poppleton/The Terraces/Hollins Market (41.7%).
- The percentage of high school students that were chronically absent decreased slightly from 40.8% in 2007 to 40.2% in 2008. In 2008, there were 26 CSAs where at least 40% of the high school students missed at least 20 school days, and there were five CSAs where at least one out of every two high school students missed 20 or more school days.

Elementary and Middle School Student Achievement

- The percentage of 3rd grade students that scored as being Advanced/Proficient in their Maryland School Assessment math exam in 2008 was 72.6%. This was an increase of almost 10.5% from 2007. Seventy three and a half percent (73.5%) of 3rd graders scored as Advanced/Proficient in their reading exam.
- In 2008, two thirds (67.6%) of the 5th graders in Baltimore City tested as being Advanced/Proficient in their math MSA exam. Over three fourths (76.1%) of the 5th

graders tested as being Advanced/Proficient in their reading exam. The percentage of students who tested as being Advanced/Proficient in their reading exam increased by 15.7% percentage points from 60.5% in 2007 to 76.1% in 2008.

- The percentage of 8th graders who tested as being Advanced/Proficient in their math and reading MSA exam also increased from 2007 to 2008. In 2008, 28.8% of 8th graders were Advanced/Proficient in their math exam and 49.6% of 8th graders were Advanced/Proficient in their reading exam.

High School Performance

- The percentage of high school students that passed the High School Assessment (HSA) English exam declined from 48.9% in 2007 to 40.4% in 2008.
- The percentage of high school students that passed the HSA Biology exam increased from 41.4% in 2007 to 49.2% in 2008.
- The percentage of high school students that passed the HSA Government exam increased from 53.0% in 2007 to 57.1% in 2008.
- The percentage of high school students that passed the HSA Algebra exam increased from 29.0% in 2007 to 37.3% in 2008.

NOTES:

This information applies to public school students only, including those in Charter or "New" schools. Parochial and private school students are not included. See EXPLANATIONS for details.

Total is not the sum of the columns, as one census tract, the jail, is removed from the analysis at the CSA level, yet included in the overall total.

See the EXPLANATIONS for calculation considerations and definitions of these *Vital Signs*

NOTES:

This information applies to public school students only, including those in Charter or "New" schools. Parochial and private school students are not included. See EXPLANATIONS for details.

The ranges "percent advanced" and "percent proficient" as reported by the Baltimore City school system have been combined to report at the CSA level + Base data for comparison

Total is not the sum of the columns, as one census tract, the jail, is removed from the analysis at the CSA level, yet included in the overall total.

NOTES:

This information applies to public school students only, including those in Charter or "New" schools. Parochial and private school students are not included.

See EXPLANATIONS for details.

The ranges "percent advanced" and "percent proficient" as reported by the Baltimore City school system have been combined to report at the CSA level

+ Base data for comparison

Total is not the sum of the columns, as one census tract, the jail, is removed from the analysis at the CSA level, yet included in the overall total.

		* Percent of graduates who successfully completed courses qualifying them to enter University of Maryland			* Percent of graduates who successfully completed courses in Career/Technical education program			* Percent of graduates that successfully completed both advanced programs

NOTES:

This information applies to public school students only, including those in Charter or "New" schools. Parochial and private school students are not included.

See EXPLANATIONS for details.

Total is not the sum of the columns, as one census tract, the jail, is removed from the analysis at the CSA level, yet included in the overall total.

See the EXPLANATIONS after this table for calculation considerations and definitions of these *Vital Signs*

* Special explanations are needed as a result of a change in the indicator or correction. See the EXPLANATIONS section for details.

NOTES:

The High School Assessments are required for students entering the 9th grade starting in 2005. Data for exams for the 2005-2006 school year is not reliable and therefore not reported.

This information applies to public school students only, including those in Charter or "New" schools. Parochial and private school students are not included. See EXPLANATIONS for details.

Total is not the sum of the columns, as one census tract, the jail, is removed from the analysis at the CSA level, yet included in the overall total.

See the EXPLANATIONS for calculation considerations and definitions of these *Vital Signs*
