**F**or the nation as a whole, 2014 was a year where overall economic conditions continued a slow but gradual recovery from the great recession that began in 2008. These dynamics were also at work in Baltimore City, with a 2.7 % increase in the Total Number of Jobs from 2013 to 2014, which is a new indicator in *Vital Signs 14*. This trend can also be seen in Maryland Department of Labor and Licensing figures that show unemployment in Baltimore City dropped from 9.6% in January of 2014 to 7.9% in December 2014.[1] However, the City is still economically distressed in comparison to the State of Maryland which had an overall unemployment rate of 5.2% in December 2014.

**Baltimore City is home to more than 622,000** residents who represent a major source of labor for businesses in the City, region and state. The City also daily attracts many commuters from around the region resulting in an estimated 17% net increase in daytime population.[2] For *Vital Signs 14*, twenty-one workforce and economic development indicators are tracked for Community Statistical Areas[3] (CSAs) and which measure the city's progress towards sustainable economic development. These indicators highlight the important role of the City as both a major source of labor and as a center of economic activity.

Indicators are grouped into the following categories: *labor force participation and employment; educational attainment; commercial investment activity, business size and age; neighborhood businesses;* and *regional dynamics*. These indicators provide fundamental data on the city's economic assets and that can be incorporated into data-driven decision making processes.

## Data

Data for *Vital Signs 14* Workforce and Economic Development Indicators comes from the 2010-2014 American Community Survey, the Longitudinal Employer-Household Dynamics (LEHD), InfoUSA, the Baltimore City Department of Housing and Community Development, and Maryland Division of Parole and Probation. When possible, indicators are created by normalizing data by the number of residents or commercial properties to establish rates that allow for comparison across neighborhoods and over time.

## Total Number of Jobs Filled by Employees in Baltimore City, 2010-2014

SOURCE: U.S. CENSUS BUREAU
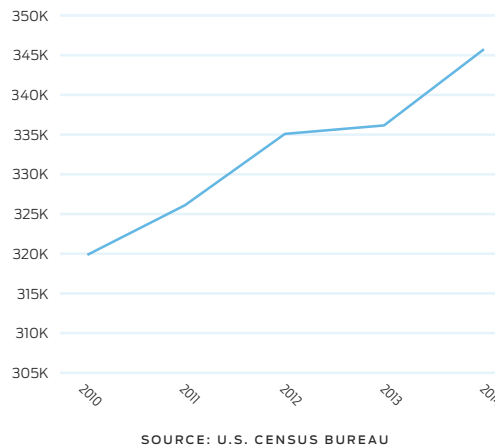

# Labor Force Participation and Employment[4]

Residents of Baltimore City who are of working age fall into three main categories: in the labor force (employed), actively seeking employment (unemployed), and those who are not in the labor force either by choice or by circumstance. Residents who are "discouraged" or believe that they cannot find work and therefore are not actively seeking a job are classified as "not in the labor force."

- Based on the 2010 - 2014 ACS, 60.6% of city residents of working age (between 16 and 64 years old) were employed and 10.0% of the city's residents between the ages of 16 and 64 were unemployed and seeking work. These figures represent the city's total labor force, which means that almost one-third (29.3%) of the city's residents between the ages of 16 and 64 were not in the labor force.

- The CSAs with the largest percentage of working-age residents who were employed were Canton (84.8%), South Baltimore (83.7%), Mt. Washington/Coldspring (82.1%), and Fells Point (81.9%). The CSAs with the lowest percentage of working-age residents who were employed were Upton/Druid Heights (35.5%), Oldtown/ Middle East (39.0%), Southern Park Heights (42.8%), and Greenmount East (43.0%).

- Conversely, the CSAs with the largest percentage of unemployed persons looking for work were Greenmount East (18.5%),

The CSAs with the lowest percentage of unemployed persons seeking work lived in Greater Roland Park/Poplar Hill (2.7%), Mt. Washington/Coldspring (3.7%), Downtown/Seton Hill (3.8%), and Dickeyville/Franklintown (4.0%).

- Whether by choice or by circumstance, the CSAs with the largest percentage of residents not in the labor force included Upton/Druid Heights (50.6%), Oldtown/Middle East (46.0%), Greater Charles Village/Barclay (43.5%), and Southern Park Heights (42.4%). The CSAs with the lowest percentage were South Baltimore (9.7%), Canton (10.9%), Fells Point (13.5%), and Mt. Washington/Coldspring (14.1%).

- Focusing only on the population in the labor force, the unemployment rate that measures the share of jobless persons who are looking for work in Baltimore City was 14.2% based on the 2010 - 2014 ACS. The unemployment rate by CSA ranged from a low of 3.3% in Greater Roland Park/Poplar Hill to a high of 30.1% in Greenmount East.

## From Previous *Vital Signs:*

One major determinant of employment for many communities is the percent of adult population under community supervision including parole and probation.[5] Persons with a criminal record face significant barriers towards finding employment. Although data was not available for 2014, the data for 2013 are given below.

- For Baltimore City, in 2013 the percent of adult population under community supervision was 5.3%. The CSAs in 2013 with the highest percentage of adults under community supervision were Madison/East End (14.5%), Greenmount East (11.1%), and Southwest Baltimore (11.1%). The CSAs with the lowest percent were Mt. Washington/ Coldspring (0.6%), North Baltimore/ Guilford/Homeland (0.7%), and Greater Roland Park/Poplar Hill (0.8%).

## Educational Attainment

More than ever before, attainment of a high school diploma is a basic requirement for many 21st-century jobs. Completing a bachelor's degree increasingly influences lifetime potential earnings.[6] *Vital Signs 14* tracks three indicators on educational attainment for the multiple stages of high school and college education. These categories are mutually exclusive in that a survey respondent can only be in one category and the total of the three categories sums to 100%.

- Based on the 2010 - 2014 ACS, 18.9% of the city's residents over the age of 25 had not obtained a high school diploma. The CSAs with the largest percentage of residents without a high school diploma were Orangeville/East Highlandtown (38.8%), Madison/East

The CSAs with the smallest percentage were Greater Roland Park/Poplar Hill (1.1%), North Baltimore/Guilford/Homeland (3.9%), Cross-Country/Cheswolde (4.3%), and Mt. Washington/Coldspring (4.9%).

- More than half (53.2%) of the city's residents over the age of 25 obtained a high school diploma and/or completed some college or received an associate's degree. The CSAs with the greatest percentage of residents over the age of 25 with a high school degree, some college, or an associate's degree were Edmondson Village (73.2%), Cherry Hill (69.6%), and Clifton-Berea (69.0%). The CSAs with the smallest percentage were Greater Roland Park/Poplar Hill (19.6%), North Baltimore/Guilford/Homeland (20.2%), and Inner Harbor/Federal Hill (24.0%).

- During the 2010-2014 time period, 27.9% of the City's residents over the age of 25 had a Bachelor's degree, a Graduate degree, or a Professional degree. The CSAs with the largest percentage of residents with a Bachelor's degree or above were Greater Roland Park/Poplar Hill (79%), North Baltimore/Guilford/Homeland (75.9%), Mt. Washington/Coldspring (70.5%), and Inner Harbor/Federal Hill (67.3%). The CSAs with the lowest percentage of res-

idents with college degrees were Brooklyn/Curtis Bay/Hawkins Point (5.9%), Madison/East End (6.1%), Greenmount East (6.1%), and Sandtown-Winchester/Harlem Park (6.1%).

## Commercial Investment Activity[7]

Commercial properties and establishments in neighborhoods are an important part of urban life for the jobs as well as the amenities they provide. Upkeep of commercial properties is an indicator of commercial investment and is equally important to owners of residential properties in the area as their respective values are mutually dependent. Overall, in the City the number of commercial properties has decreased[8] during the past few years, and the percentage of businesses applying for and receiving rehabilitation permits has decreased since 2010.

- The number of commercial properties in Baltimore City decreased by 1.2% from 15,521 in 2013 to 15,331 in 2014. The CSAs that experienced the greatest decreases by number were Brooklyn/Curtis Bay/Hawkins Point (loss of 71

commercial properties) and Southwest (loss of 49 commercial properties). From 2013 to 2014, there were 12 CSAs that experienced an increase in the number of commercial properties with Southeastern (4 commercial properties), Oldtown/Middle East (4 commercial properties), and Greater Rosemont (4 commercial properties) having the greatest increases.

- Following the decrease in the number of commercial properties, from 2013 to 2014 the percentage of commercial properties that applied for and received a rehabilitation permit greater than $5,000 remained stable at 13.0% in both 2013 and 2014. In 2014, the CSAs with the largest percentage of commercial businesses with rehabilitation permits greater than $5,000 were Southeastern (32.9%), Chinquapin Park/Belvedere (28.6%), Loch Raven (28%), and Greater Mondawmin (26.5%). The CSAs with the smallest percentage of commercial properties with a rehabilitation permit were Southwest Baltimore (1.6%), Sandtown-Winchester/Harlem Park (2.6%), and Penn North/Reservoir Hill (2.8%).

7   Source: MD Property View and Baltimore City Department of Housing and Community Development
8   In 2012, Baltimore City and the Downtown Partnership began promoting and incentivizing conversion of Class B & C office space to multi-family residential to adaptively reuse commercial spaces and meet the growing demand for rental housing choices.
9   Due to InfoUSA's survey methodology, which consists of compiling a list of publicly-available phone numbers to conduct a sample phone survey, some businesses, such as those without landlines, are not represented. Additionally, firms with multiple branches may report total employment out of a single location, distorting employee counts by geography. For this reason, long-term comparisons of the data are not recommended.

## Business Size and Age [9]

The vast majority of businesses in the United States are small- to mid-size firms. Aside from clusters of business activity such as downtowns or regional centers, most firms are located in neighborhoods. The ability to start and sustain a business is often related to the environment in the surrounding area that enables entrepreneurship and success. For this year, we have added another indicator to give more insight into the actual job creation from businesses. This indicator is Number of Total Jobs, and comes from the Longitudinal Employer-Household Dynamics (LEHD) database. Including this indicator gives us the ability to track job creation year-over-year, giving us even more insight into the health of Baltimore City's economy.[10]

- Overall, Baltimore City had 21,127 businesses in 2014. The CSAs with the highest number of businesses were Downtown/Seton Hill (2,928), Midtown (1,087), Greater Charles Village/Barclay (904), and Medfield/Hampden/Woodberry/Remington (893). The CSAs with the lowest number of businesses were Dickeyville/Franklintown (40), Edmondson Village (54), and Cherry Hill (144).

- In 2014, the number of jobs filled by employees for Baltimore City totaled 344,588. The CSAs with the highest number of jobs were Downtown/Seton Hill (78,077), Oldtown/

Middle East (27,526), and Orangeville/East Highlandtown (15,337). The CSAs with the lowest number of jobs were Edmondson Village (229), Dickeyville/Franklintown (235), and Forest Park/Walbrook (432).

- From 2013 to 2014, the number of jobs filled by employees in Baltimore City increased 2.7% from 335,497 in 2013 to 344,588 in 2014. The CSAs with the highest year-over-year percentage increase were Howard Park/West Arlington (266.5%),[11] Mt. Washington/Coldspring (33.7%), and Morrell Park/Violetville (20.7%). The CSAs with the lowest percentage increase were Penn North/Reservoir Hill (-18.6%), Harford/Echodale (-14.1%), and Dickeyville/Franklintown (-12.7%).

- For 2014, the number of small businesses (businesses reporting fewer than 50 employees) in Baltimore City was 19,772. The CSAs with the highest number of small businesses were Downtown/Seton Hill (2,729), Midtown (1,039), and Greater Charles Village/Barclay (868). The CSAs with the lowest number of small businesses were Dickeyville/Franklintown (37), Edmondson Village (51), and Cherry Hill (134). In 2014, 13.8% of the small businesses in Baltimore City were located in the Downtown/Seton Hill CSA.

- The percentage of businesses located in Baltimore City less than one year old in 2014 was 6.5%. The CSAs with the highest percentage of businesses less than one year old

were located in Westport/Mount Winans/Lakeland (14.2%), Greater Rosemont (13.4%), and Penn North/Reservoir Hill (10.2%). The CSAs with the lowest percent were Dickeyville/Franklintown (2.5%), Canton (3.4%), and Chinquapin Park/Belvedere (3.4%).

- For 2014, the percentage of businesses located in Baltimore City that were less than two years old was 14.2%. The CSAs with the highest percentage of firms that were less than two years old were Poppleton/The Terraces/Hollins Market (24%), Greater Rosemont (23.1%), and Dorchester/Ashburton (21.8%). The CSAs with the lowest percentage of firms that were less than two years old were Cross-Country/Cheswolde (9.4%), Greenmount East (9.7%), and Mt. Washington/Coldspring (9.7%).

- The percentage of businesses located in Baltimore City that were less than four years old in 2014 was 39.1%. The CSAs with the highest percentage of firms that were less than four years old were Cross-Country/Cheswolde (51.8%), Forest Park/Walbrook (47.7%), and Lauraville (46.6%). The CSAs with the lowest percentage of firms that were less than four years old were Greenmount East (26.8%), Clifton-Berea (32.2%), and Claremont/Armistead (32.2%).

# Providing Creative Space for Entrepreneurs

Impact Hub Baltimore is a co-working space, community center and innovation lab for social impact. Located in the heart of the city at the historic Centre Theater in Station North, Impact Hub opened its doors in December 2015 to enable organizations, entrepreneurs, community members, and partners to connect and collaborate. Impact Hub operates as a social enterprise supported by membership, event rental, and programming. Its members work in a range of impact areas including education, health, arts & design, community development, economic opportunity, and social justice. Through programming and community-building, Impact Hub connects people to the resources and ideas they need to make a tangible impact in Baltimore and beyond.

In its first three months, Impact Hub grew to over 110 members and hosted over 2,000 people in meetings, trainings, and events. Of these members, 44% are working as entrepreneurs, consultants, or for profit businesses, and 51% are operating nonprofits, many of them social entrepreneurs themselves. The importance of new business to Baltimore City's economy can be seen in that 59.8% of all business are less than four years old. By providing the physical space and access to potential networks and resources, the Impact Hub hopes to accelerate the startup of social enterprises and businesses in Baltimore City.

## Neighborhood Businesses

Access to neighborhood amenities helps attract and retain residents to an area particularly in an urban context. Neighborhood businesses for the following *Vital Signs 14* indicators include coffee shops, doctors' offices, grocery stores and retail shops.

- The number of neighborhood businesses in Baltimore City in 2014 was 14,322. The greatest number of neighborhood businesses are located in the Downtown/ Seton Hill CSA (2,167), Midtown (772), and Greater Charles Village/Barclay (667). The least number of neighborhood businesses are located in Dickeyville/ Franklintown (16), Edmondson Village (39), and Beechfield/Ten Hills/West Hills (86).

- In 2014, there were 23.1 neighborhood businesses per 1,000 residents in Baltimore City. The CSAs with the largest number of neighborhood businesses per 1,000 residents included Downtown/Seton Hill (336.2 per 1,000 residents), Harbor East/Little Italy (55.5 per 1,000 residents), and Midtown (51.4 per 1,000 residents). The CSAs with the least number of neighborhood businesses per 1,000 residents included Dickeyville/ Franklintown (3.9 per 1,000 residents), Edmondson Village (4.9 per 1,000 residents), and Northwood (6.4 per 1,000 residents).

- The number of persons employed in neighborhood businesses in Baltimore City during 2014 was 197,089. The CSAs with the largest number of employees of neighborhood businesses included Downtown/Seton Hill (62,996), Inner Harbor/Federal Hill (10,750), and South Baltimore (10,667). The CSAs with the fewest number of neighborhood businesses included Dickeyville/Franklintown (78), Edmondson Village (228), and Forest Park/Walbrook (548).

## Banking [12]

In 2008, the Baltimore Neighborhood Drilldown Study[13] showed that many of the city's neighborhoods were "underbanked," which means that many residents did not have access to traditional financial institutions in their neighborhoods. Without access, saving money or obtaining a credit record is often difficult.

- In 2014, there were a 0.20 banks and bank branches per 1,000 residents in Baltimore City. The greatest number of banks and bank branches per 1,000 residents were located in Downtown/Seton Hill (3.25), Harbor East/Little Italy (0.92), Highlandtown (0.69), Greater Roland Park/Poplar Hill (0.68), and Southeastern (0.64). In 2014, there were 18 CSAs that had no banks or bank branches located within the CSA.

## Regional Dynamics

*Vital Signs* tracks the percentage of residents from each CSA who work outside the city using the Longitudinal Employer-Household Dynamics (LEHD) data. Approximately 25% of all jobs in the metropolitan area are located in Baltimore City, which means that many Baltimore residents need access to some form of transportation to the 75% of jobs that are elsewhere in the region.[14]

- Based on the 2014 LEHD, over half (60.6%) of Baltimore City's residents commuted to work outside of the city. The CSAs with the smallest percentage of workers that commute outside of the city was Greater Roland Park/Poplar Hill (42.8%), Downtown/Seton Hill (44.1%), and Southern Park Heights (44.7%). The CSAs where the largest percentage of workers commuted outside of the city to work were Brooklyn/Curtis Bay/Hawkins Point (71.3%), Westport/Mount Winans/Lakeland (70.4%), and Washington Village/Pigtown (69.9%).

# Labor Force Participation and Employment

## Percent of Population (Ages 16-64) Employed

**Measure of persons working and earning an income.**

Definition: The number of persons between the ages of 16 and 64 formally employed or self-employed and earning a formal income. This percentage is used to understand how many persons are working out of the entire population, not just those in the labor force (persons who may be looking for work or working).

2. Oldtown/Middle East
3. Southern Park Heights
4. Greenmount East
5. Madison/East End

## Percent of Population (Ages 16-64) Unemployed and Looking for Work

**Measure of persons who are not working.**

Definition: The number of persons between the ages of 16 and 64 not working out of all persons, not just those in the labor force (persons who may be looking for work). These persons are seeking work that pays a formal income.
**(SOURCE: AMERICAN COMMUNITY SURVEY, 2010-2014)**

# Percent of Population (Ages 16-64) Not in the Labor Force

### Measure of persons not working and not seeking work.

Definition: The number of persons who are not in the labor force out of all persons between the ages of 16 and 64 in the area. There are several reasons why persons may not be included in the labor force. These reasons may include: they are caretakers for children or other family members; they attend school or job training; they may have a disability; and they are discouraged or frustrated and have given up seeking a job or have a history that may include criminal activity.

# Educational Attainment of the Labor Force

## Percent Population (25 years and over) With Less Than a High School Diploma or GED

**Measures the number of persons with little formal education and training.**

Definition: The percentage of persons that have not completed, graduated, or received a high school diploma or GED. This is a standard indicator used to measure the portion of the population with less than a basic level of skills needed for the workplace. Persons under the age of 25 are not included in this analysis since many of these persons are still attending various levels of schooling.
