Introduction

About the Baltimore Neighborhood Indicators Alliance

In 1998, the Annie E. Casey Foundation approached the Association of Baltimore Area Grantmakers (ABAG) to explore the interest in Baltimore for developing a neighborhood indicators initiative. The two-year long planning process that followed brought together several citywide nonprofit organizations, city government, neighborhoods, and foundations, and led to the creation of the Baltimore Neighborhood Indicators Alliance (BNIA)—which would be dedicated to developing and maintaining a community-based data system open and accessible to all neighborhoods. In 2000, BNIA became an early partner in the Urban Institute’s National Neighborhood Indicators Partnership¹ (NNIP), which today is a network of organizations with similar missions in more than 36 cities across the United States. In 2006, BNIA moved to the University of Baltimore’s Jacob France Institute in an effort to expand on the capabilities of BNIA and was renamed the Baltimore Neighborhood Indicators Alliance – Jacob France Institute (BNIA-JFI).

Since 2002, BNIA-JFI has been producing the *Vital Signs* report annually to provide outcome indicators that “take the pulse” of Baltimore neighborhoods progress towards a better quality of life in every neighborhood. The goal of this effort is for neighborhood residents, organizations, and other stakeholders to use data and the *Vital Signs* report to strategically and effectively foster new ways of thinking about improving our City, neighborhoods, and government over time. In 2012, Baltimore City Council passed a resolution that endorsed the use of *Vital Signs* in local policy-making to “reflect the diverse conditions of neighborhoods and provide the basis for a system of tracking progress toward a shared vision” for Baltimore.² Over the years, the *Vital Signs* report and the resulting knowledge that is mutually gained by analyzing community-based data have served to support decision-making in Baltimore City and for neighborhoods.³

The Purpose of Vital Signs

Neighborhoods, as a growing body of research shows,⁴ have extremely durable properties based on the social, cultural, and physical realities that define places. Although people and individuals help shape neighborhoods, their actions occur within the structural construct of history, planning, and geography. To better understand the context in which programs and actions take place, tracking the “ecometrics” of neighborhoods is necessary to assess the situation in which interventions and solutions are trying to take hold. This is precisely the purpose of tracking key quality of life measures for neighborhoods that has been the mission of BNIA-JFI for more than a decade. The community-based indicators available in *Vital Signs* are bits of information that generate a picture of a place and provide insight for all stakeholders, both inside and outside a neighborhood, about the overall direction of the community.

Percent of Households with No Internet at Home, 2013-2017

Measuring Neighborhood Connectedness

All the data in *Vital Signs* contributes to a new and growing field of “urban science” that not only aims to use data to observe what’s going on in cities, but also help predict⁵ what will happen in the future. One of the major insights coming from this new field is that because cities function as unique, complex, and adaptive systems, they tend to realize strong and predictable “network effects”—the more and more people or participants in a network the more valuable (and potentially more costly) a neighborhood or city becomes.⁶ While many of the existing *Vital Signs* indicators reflect the situation within neighborhoods, measuring how connected neighborhoods are in terms of digital, physical, social and financial infrastructure is required to truly understand the strengths and accruing network effects of communities. Neighborhood isolation across any of these domains results in the lack of resources to communities today and in the future, but lack of access to networks is often difficult to assess when looking only within neighborhoods. *Vital Signs 17* introduces several new indicators aimed at measuring the connectedness of

Baltimore’s neighborhoods to a wide variety of networks including home-based internet, the public bus system and capital markets for small business

- **No Internet At Home** (Workforce and Economic Development): 24.6% of Baltimore households do not have access to the internet at home. The highest percentage of households with no internet was in Greenmount East (42.4%) and the lowest was in Greater Roland Park/Poplar Hill (4.5%)
- **Total Dollar Amount Invested in Small Business** (In collaboration with the 21st Century Cities Initiative at Johns Hopkins University): \$1.7mil per 50 small businesses invested in Baltimore. The greatest amount invested in small businesses per 50 businesses was in Harbor East/Little Italy (\$14.1 million) and the least was in Madison/East End (\$0.14 million)
- **Daily Bus Ridership** (Sustainability): 500.4 riders per 1000 residents board/alight buses daily in Baltimore. The highest average daily bus ridership was in Downtown/Seton Hill (10,379 per 1,000 residents) while the lowest average daily bus ridership was in Canton (62 per 1,000 residents).

What’s New in *Vital Signs 17*?

Beyond the new indicators identified above, this edition of *Vital Signs* tracks over 100 indicators on the quality of life in Baltimore’s neighborhoods. These indicators, when combined into each community’s profile, generate a picture of what is happening in each neighborhood. From home prices to crime rates to clogged storm drains, the indicators in *Vital Signs* corroborate (or dispel) perceptions of residents, business and other stakeholders about the quality of life in Baltimore’s neighborhoods. As communities continue to plan ahead over the next decade, these indicators can now be used as inputs into strategic planning processes as well as tracking and monitoring the effectiveness of neighborhood-based activities.

Informing Middle Market Strategies

Housing is the predominant land use in nearly all of Baltimore’s neighborhoods, and serves as the basis for quality of life in nearly all other aspects of communities such as health, education, local economies and safety. Yet the policies and laws that impact the

5. Michael Anft (2017) “The New Urban Science: Big Data and Big Dollars are transforming the field. But where is the Big Idea?” *The Chronicle of Higher Education* <https://www.chronicle.com/article/The-New-Urban-Science/240740>

6. Marian Alberti (2017) “Grand Challenges in Urban Science” *Frontiers in Built Environment* <https://www.frontiersin.org/articles/10.3389/fbuil.2017.00006/full>

development of housing have historically been established in isolation across federal, state and local governments and policymakers. To overcome diverging impacts on neighborhoods, Baltimore has worked on several innovative initiatives to take more local control over housing practices and their impacts during the past several years. The Department of Housing and Community Development issued a framework for community development in 2019 that expands resources to all communities through new funding mechanisms such as the Community Catalysts Grants and the Neighborhood Impact Investment Fund. *Vital Signs 17* provides measures to track investment in all of Baltimore’s neighborhoods including “middle market” neighborhoods that tend to see less capital investment or rehabilitation:

- Between 2016 and 2017, the percentage of residential properties with rehabilitation permits in excess of \$5,000 in Baltimore increased from 3.2% to 4.4%. In 2017, the CSAs that had the highest percentage of residential properties with rehabilitation permits were Highlandtown (13.7%), South Baltimore (10.8%) and Medfield/Hampden/Woodberry/Remington (8.4%). The CSAs that had the lowest percentage of residential properties with rehabilitation permits were Cherry Hill (0.9%), Brooklyn/Curtis Bay/Hawkins Point (1.1%), and Sandtown-Winchester/Harlem Park (1.4%).

A Difficult Year for Crime

The indicators presented in *Vital Signs 17* detail the overall crime and safety trends within the city and the variation across its communities. It is important to recognize the context for many of the statistics presented in this chapter; the individual narratives of Baltimore’s communities vary and each area faces its own unique challenges or successes. The resiliency of each community is dependent on ability to adapt to changes in the community, new policies in policing, and collaboration around shared goals for safety and improved quality of life. Violent crime in the city remains a pressing problem:

- Between 2016 and 2017, the Part I crime rate in Baltimore City increased from 63.0 offenses per 1,000 residents to 67.0 offenses per 1,000 residents. The greatest increases in offenses per 1,000 residents occurred in Madison/East End (+32.1), Edmondson Village (+19.0), and Brooklyn/Curtis Bay (+18.1). In contrast to the citywide trend, the

Part I crime rate decreased most significantly in Downtown/Seton Hill (-28.2), Washington Village/Pigtown (-14.5), and Harbor East/Little Italy (-14.2).

- Baltimore City experienced 342 homicides in 2017, an increase from the 318 reported in 2016. In 2017, 80%, or 275 of the total deaths were a result of a shooting. Two communities with the highest rates in 2017 doubled their gun homicide rates from 2016 to 2017: Greenmount East and Pimlico/Arlington/Hilltop.

How to Use Vital Signs Data

The indicators available in *Vital Signs* have been chosen based on national trends, academic research on community-based indicators, local planning processes, and ongoing community engagement to ensure that the overall set of indicators is relevant to Baltimore’s communities.

- National best practices: Through the NNIP network, BNIA-JFI is connected to 36 other cities for learning and staying ahead of the curve regarding research and development of neighborhood based data-driven initiatives. BNIA-JFI is committed to transforming data for policy-relevance and enhancing access to the data through technical assistance and online functionality.¹
- Local planning processes: Several local and regional plans over the past decade have included specific indicators to monitor the effectiveness of plan implementation, such as the City’s Comprehensive Economic Development Strategy, Sustainability Plan, and the regional Opportunity Collaborative Regional Plan for Sustainable Development. The *Vital Signs* indicators are intended to serve as a means of tracking and evaluating the relevant neighborhood impacts of these city and regional plans.
- Grant-writing resources: Community-based organizations and non-profits rely on *Vital Signs* data to help make a data-driven case for leveraging resources into their neighborhoods. Analysis of grant applications for programs such as Community Development Block Grant, Association of Baltimore Area Grantmakers Common Grant, and Maryland Sustainable Communities Grant identified several indicators that organizations require for satisfying basic data requirements for community-based funding.

7. For more information on transforming data into useful information, see “What Counts: Harnessing Data for America’s Communities” edited by the Federal Reserve Bank of San Francisco and the Urban Institute (2014).

Every attempt is made to ensure that the indicators in *Vital Signs* are both available from the public agency that might be supplying the data and consistent from one time period to the next. Continuous monitoring of quality of life for Baltimore's neighborhoods provides communities the chance to take immediate, hopefully preventative, measures to address issues that arise in their neighborhood.

The *Vital Signs* report and the compendium of data available longitudinally for Baltimore's neighborhoods is more than just a once-a-year presentation of information.⁸ The release of *Vital Signs 17* marks the beginning or continuation of diverse, cross-sector conversations throughout Baltimore on how to transform these data into the means for improving the quality of life in every neighborhood. The indicators and data in *Vital Signs* are organized into eight sections each of which describes an issue or area that is central to quality of life in Baltimore City. The data within each of the following sections provide a picture of the conditions within Baltimore City's neighborhoods and their progress over time:

- Census Demographics;
- Housing and Community Development;
- Children and Family Health;
- Crime and Safety;
- Workforce and Economic Development;
- Education and Youth;
- Arts and Culture and
- Sustainability.

Data within each of these sections are divided into additional subsections that allow for indicators to be clustered together around specific topics, such as housing conditions or safe neighborhoods, educational attainment, or student performance.

Vital Signs is a compilation of a large amount of data throughout the sections for easy interpretation of the data. Each chapter in *Vital Signs* also includes a Rankings & Definitions section, which lists the five highest and lowest communities by their value for each indicator. With so much information in this report, it has been produced in a way that should serve as a reference guide to communities throughout the year.

Vital Signs is also 'open data.'⁹ All of the indicators from previous *Vital Signs* are online¹⁰ for everyone to see and download for use in a variety of innovative ways. Policy makers use the data to provide context and neighborhood interdependences across indicators. The data are used by neighborhood groups as well through Community Profiles for each of the City's 55 Communities which are available online for quick access to data specific to each neighborhood's needs.

Geography and Data

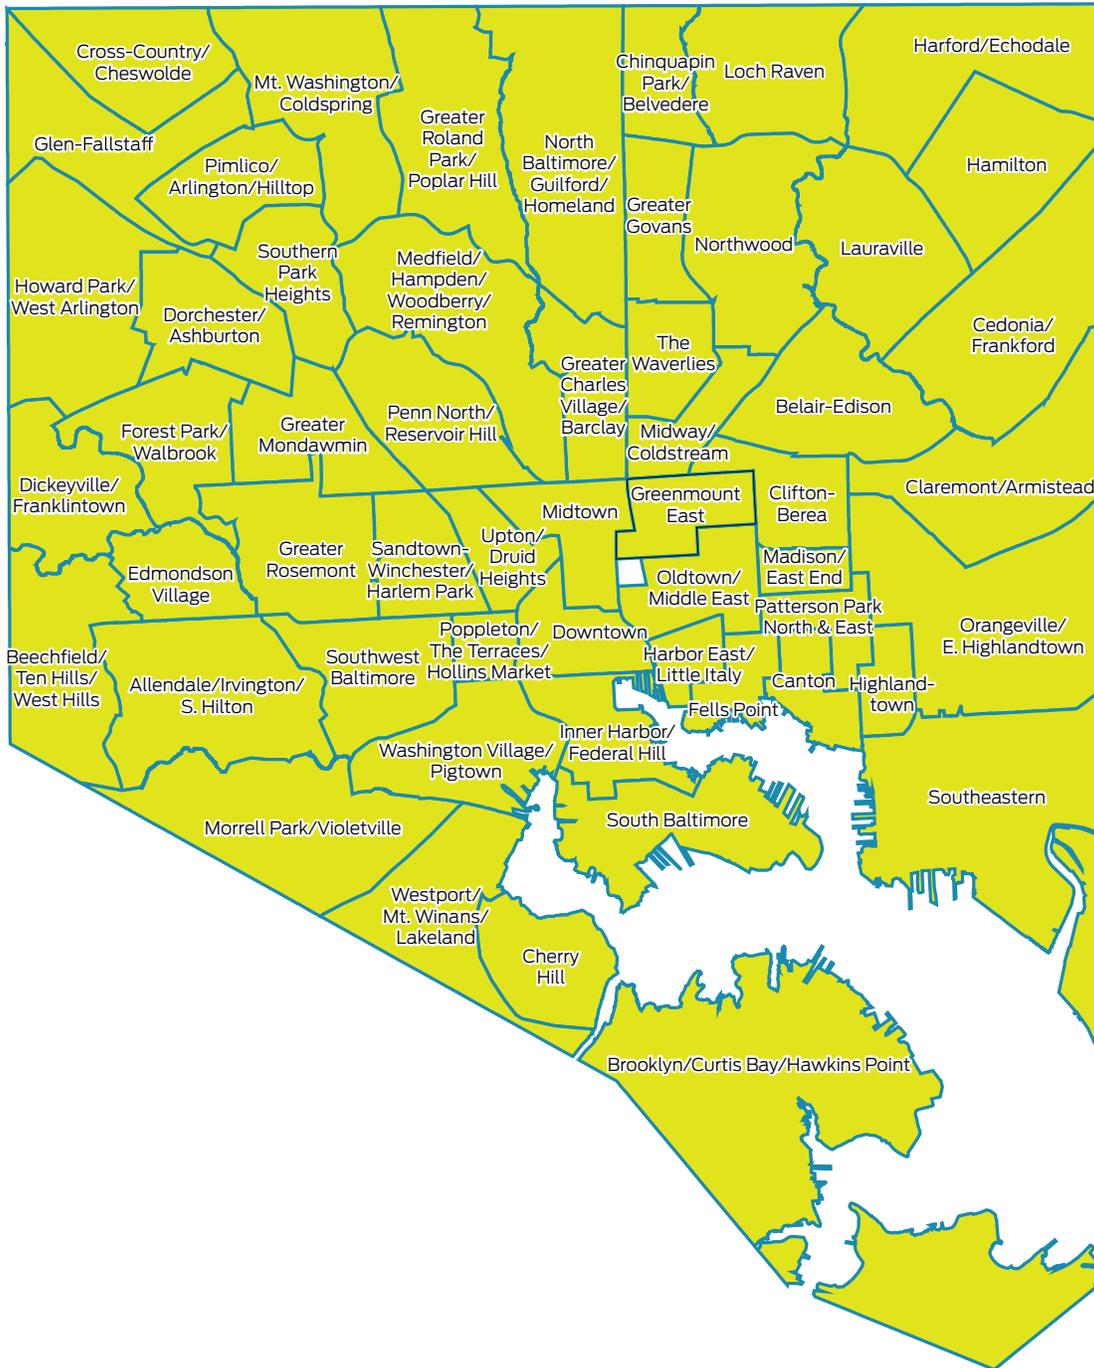

The geographic level at which data is provided is important to understand. Wherever possible, *Vital Signs* uses Community Statistical Areas (CSAs) as the geographic level for which data is provided. CSAs are clusters of Census Tracts that correspond to Baltimore's neighborhoods boundaries and are consistent statistical boundaries for which data can be acquired. Neighborhood lines often do not fall along CSA boundaries, but CSAs are representations of the conditions occurring within those particular neighborhoods. The CSAs were originally created in 2002 and were revised for *Vital Signs 10* using new 2010 Census Tract boundaries.

Census Demographics

For this chapter of the *Vital Signs 17* report, the main source of demographic and socioeconomic data about the people who live in Baltimore’s neighborhoods comes from the United States Bureau of the Census. The Census Bureau collects a wide variety of information through the decennial Census as well as the continuous administration of the American Community Survey (ACS).

In 2010, the Census administered the latest decennial Census which was used to collect detailed information on all residents of the United States. Starting with the 2010 Census, only the short-form Census with just 10 questions was administered to all households which provides basic information about household size, race, ethnicity, gender and age. For more detailed information about so many other aspects of residents, the Census Bureau administers the ACS which is an ongoing, continuous survey of a sample of residents in all census tracts. The main benefit of the ACS is the ability to access data for small areas of the City of Baltimore more frequently than once every 10 years.¹

Because information at the community level is averaged over 5-years of data collection, comparisons across time can only be made with non-overlapping years. Even though ACS data is released annually, year-over-year comparisons cannot be made directly since four of the five years in each time period overlap.² In *Vital Signs 17*, the latest release of data from the 2013-2017 ACS is presented in comparison with either the 2010 Census or the 2006-2010 ACS, which was the first set of ACS data reported in *Vital Signs 10*.³

The socioeconomic and demographic indicators in *Vital Signs* are grouped into the following categories: population, race/ethnicity, age, households, and income and poverty. Population and household counts continue to use the 2010 Census¹ since these are based on the full enumeration of the City’s population and are frequently used throughout *Vital Signs* as denominators for normalizing many other indicators and rates.

Data Key

Green colored text denotes a positive change.

Red colored text denotes a negative change.

Blue colored text denotes a neutral change.

Population

The total population of a neighborhood is quite possibly the most important indicator in *Vital Signs*. The Community Statistical Areas (CSAs) that are used to report *Vital Signs* data are aggregations of census tracts that represent neighborhoods. Since the CSAs vary by population size, many indicators are normalized by population so that rates and percentages can be compared uniformly. Based on the 2010 Census, the **largest** CSAs in terms of population size are Cedonia/Frankford (23,557), Greater Rosemont (19,259), and Southwest Baltimore (17,885). The **smallest** CSAs are Dickeyville/Franklintown (4,101), Poppleton/The Terraces/Hollins Market (5,086), and Mt. Washington/Coldspring (5,168). These also are the **highest** and **lowest** CSAs with respect to total male population.

In 2010, the total female population was **highest** in Cedonia/Frankford, Greater Rosemont, and Belair-Edison and **lowest** in Dickeyville Franklintown, Poppleton/The Terraces/Hollins Market, and Washington Village/Pigtown.

Households

Similar to population size, the CSAs vary by total number of households, and some indicators are normalized by households so that rates and percentages can be compared uniformly. CSAs, in terms of number of households, are not the same as the ones for population size, since households can range from a single person to large families. Based on the 2010 Census, the **largest** CSAs in terms of number of households are Cedonia/Frankford (9,348), Midtown (9,078), and Medfield/Hampden/Woodberry/Remington (8,289). The **smallest** CSAs are Dickeyville/Franklintown (1,877), Poppleton/The Terraces/Hollins Market (2,181), and Washington Village/Pigtown (2,273).

¹ For more details on how neighborhoods changed between the 2000 and 2010 Censuses, see *Vital Signs 10*, Census Demographics chapter, http://bniajfi.org/vital_signs/archives/

² For more information on data interpretation of the American Community Survey See www.census.gov.

³ See guidance on Comparing 2017 American Community Survey Data from the U.S. Census Bureau online at <https://www.census.gov/programs-surveys/acs/guidance/comparing-acs-data/2017.html>

Census Demographics

In 2010, the City's average household size was 2.4 persons with CSAs ranging from a **high** of 3.3 persons per household in Madison/East End to a **low** of 1.6 in Downtown/ Seton Hill. These same CSAs correspond to the **highest** and **lowest** percentage of households with children under 18 years old (51.0% in Madison/East End and 8.6% in Downtown/Seton Hill).

Households with Children

During 2013-2017, the CSAs with the **highest** percentage of households with children were Westport/ Mt. Winans/ Lakeland (42.0%) and Cherry Hill (39.0%). The CSAs with the **lowest** percentage were Midtown (5.5%), and Downtown/Seton Hill (6.2%).

Between 2010 and 2013-2017, the percentage of households with children under 18 **declined** from 28.4% to 25.7%. During that time period, the CSAs that experienced the largest **decreases** in the percentage of households with children were Madison/East End (-13.0%) and Dickeyville/Franklinton and Howard Park/ West Arlington (-9.8%). The CSAs with the largest **increases** in the percentage of households were Orangeville/East Highlandtown (+4.5%) and Southeastern (+4.0%).

Female-Headed Households with Children

During 2013-2017, the CSAs with the **highest** percentage of households with children under 18 that were female-headed were Oldtown/Middle East (91.8%) and Poppleton/The Terraces/Hollins Market (87.2%). The CSAs with the **lowest** percentage were Canton (9.1%) and Highlandtown (10.8%).

Between 2010 and 2013-2017, the percentage of households with children under 18 that were female-headed **declined** by 2.3%, from 54.9% to 52.5%. During that time period, the CSAs that experienced the largest **decreases** in the percentage of households with children that were female-headed were Patterson Park North & East (-21.0%), Highlandtown (-19.7%), and Howard Park/ West Arlington (-14.3%). The CSAs with the largest **increases** in the percentage of households with children that were female-headed were Washington Village/Pigtown (+14.9%) and Westport/Mount Winans/ Lakeland (+12.4%).

Race (Non-Hispanic)

The Census asks two separate questions for respondents to identify race (white, black, Asian, 2 or more, or other) and ethnicity (Hispanic or Non-Hispanic). *Vital Signs 17* reports race for non-Hispanic persons separately from Hispanic population by CSA.

Black/African-American

During 2013-2017, the CSAs with the **highest** percentage of non-Hispanic Black/African-Americans were Greater Rosemont (96.6%), Sandtown-Winchester/Harlem Park (96.1%), and Dorchester/Ashburton (96.0%).

Between 2010 and 2013-2017, the percentage non-Hispanic Black/African-American population in Baltimore **declined** by 16% from 63.8% to 62.3%. The CSAs with the largest **decreases** in the percentage non-Hispanic Black/African-American population were Downtown/ Seton Hill (-8.0%), Dickeyville/Franklinton (-7.2%), and The Waverlies (-6.9%). The CSAs with the largest **increases** in the percentage non-Hispanic Black/ African-American population were Washington Village/ Pigtown (+8.6%) and Hamilton (+5.2%).

White

During 2013-2017, the CSAs with the **highest** percentage non-Hispanic White population were South Baltimore (90.0%), Canton (85.6%), and Greater Roland Park/ Poplar Hill (77.8%).

Between 2010 and 2013-2017, the percentage non-Hispanic White population in Baltimore **declined** from 28.3% to 27.6%. The CSAs with the largest **decreases** in the percentage non-Hispanic White population were North Baltimore/ Guilford/Homeland (-10.9%), Morrell Park/Violetville and Orangeville/East Highlandtown (-8.8%). The CSAs with the largest **increases** in the percentage non-Hispanic White population were Patterson Park North & East (+12.7%) and Penn North/Reservoir Hill (+5.2%).

Asian

During 2013-2017, the CSAs with the **highest** percentage Asian population were Downtown/Seton Hill (16.3%), Greater Charles Village/Barclay (12.8%), and North Baltimore/Guilford/Homeland (9.8%).

Between 2010 and 2013-2017, the percentage Asian population in Baltimore **increased** slightly from 2.3% to 2.6%. The CSAs with the largest **increases** in the percentage Asian population were North Baltimore/ Guilford/Homeland (+2.3%) and Westport/Mount Winans/ Lakeland and Southwest Baltimore (+1.7%). The CSAs with the largest **decreases** in the percentage Asian population were Washington Village/ Pigtown (-2.8%) and Midtown Village/Pigtown (-3.1%) and Greater Roland Park/Poplar Hill (-2.1%).

Ethnicity and Diversity

Hispanic

During 2013-2017, the CSAs with the **highest** percentage Hispanic population were Orangeville/East Highlandtown (35.2%), Southeastern (25.6%), and Highlandtown (16.9%).

Between 2010 and 2013-2017, the Hispanic population in Baltimore increased from 4.2% to 5.0%. The CSAs with the largest **increases** in the Hispanic population were Southeastern (+5.7%) and Madison/East End and Orangeville/East Highlandtown (+4.9%). The CSAs with the largest **decreases** in the Hispanic population were Westport/Mount Winans/Lakeland (-5.6%) and Fells Point (-4.1%).

Racial Diversity Index

In order to measure overall diversity across all communities, *Vital Signs* includes the racial diversity index, which measures the chance of choosing two people at random in a neighborhood and each being a different race or ethnicity. Although Baltimore has a history of segregated neighborhoods, by 2013-2017, six out of the City's 55 CSAs had a racial and ethnic compositions with no majority one race.

Between 2010 and 2013-2017, Baltimore's overall racial diversity index **increased** from 54.5 to 55.9.

During 2013-2017, the CSAs with the **greatest** racial diversity were Orangeville/East Highlandtown (78.3), and Southeastern (79.2). The CSAs with the **lowest** racial diversity were Greater Rosemont (72) and Sandtown-Winchester/Harlem Park (79).

Age

Population age groups in *Vital Signs* reflect general "life cycle" ranges from under 5 years old, school-age, college-age, working-age, and seniors. Age ranges were compared over time between the 2010 Census and the 2013-2017 American Community Survey.

Under 5 Years Old

From 2010 to 2013-2017, the percentage of the population under 5 years old **remained the same** in Baltimore at 6.6%.

During 2013-2017, the CSAs with the **highest** percentage of the population under 5 years old were Dickeyville/Franklinton (14.9%) and Orangeville/East Highlandtown (11.4%). The CSAs with the lowest percentage were Downtown/Seton Hill (1.7%) and Midtown (2.3%).

5 to 17 Years Old

From 2010 to 2013-2017, the percentage of the population 5 to 17 years old **decreased** slightly in Baltimore from 14.9% to 14.4%.

During 2013-2017, the CSAs with the **highest** percentage population 5 to 17 years old were Cherry Hill (27.2%) and Westport/Mount Winans/Lakeland (23.2%). The CSAs with the **lowest** percentage were Canton (3.1%) and Downtown/Seton Hill (3.5%).

18 to 24 Years Old

From 2010 to 2013-2017, the percentage of the population 18 to 24 years old **decreased** in Baltimore from 12.6% to 10.4%.

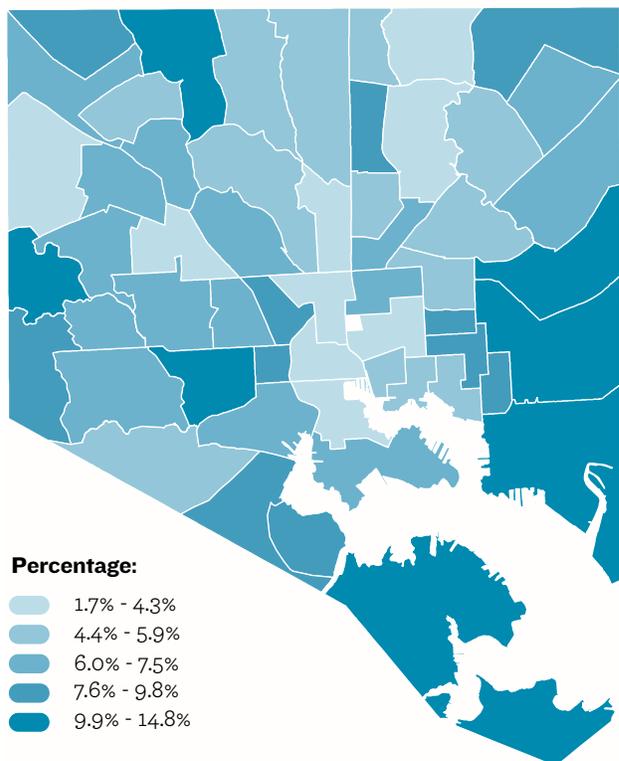

During 2013-2017, the CSAs with the **highest** percentage population 18 to 24 years old were Greater Charles Village/Barclay (29.6%) and Northwood (27.7%). The CSAs with the **lowest** percentage were Mount Washington/Coldspring (3.0%) and Fells Point (4.9%).

25 to 64 Years Old

From 2010 to 2013-2017, the percentage of the population 25 to 64 years old **increased** in Baltimore from 54.2% to 55.8%.

During 2013-2017, the CSAs with the **highest** percentage population 25 to 64 years old were Fells Point (78.0%)

Percentage of Children Under 5, 2013-2017

and South Baltimore (76.4%). The CSAs with the **lowest** percentage were Northwood (42.4%) and Cross-Country/Cheswolde (44.8%).

65 Years Old or Older

From 2010 to 2013-2017, the percentage of the population 65 years old or older **increased** in Baltimore from 11.7% to 12.8%.

During 2013-2017, the CSAs with the **highest** percentage population 65 years old or older were Howard Park/ West Arlington (24.8%) and Greater Roland Park/Poplar Hill (22.1%). The CSAs with the **lowest** percentage were Downtown/Seton Hill (5.0%) and Westport/Mount Winans/Lakeland (6.4%).

Income and Poverty

Median Household Income

During 2013-2017, the CSA with the **greatest** median household income was Greater Roland Park/Poplar Hill (\$113,496) and the **lowest** was Oldtown/Middle East (\$19,127).

Adjusting for inflation⁴, the median household income in Baltimore increased from \$43,205 from 2006-2010 to \$44,641 from 2013-2017. The CSAs that experienced the greatest **increases** in adjusted median household income between 2006-2010 and 2013-2017 were South Baltimore (+\$30,636), Canton (+\$27,742) and Fells Point (+\$18,970). The CSAs that experienced the greatest **decreases** in adjusted median household income were Washington Village/Pigtown (-\$14,305) and Westport/Mt. Winans/Lakeland (-\$9,505).

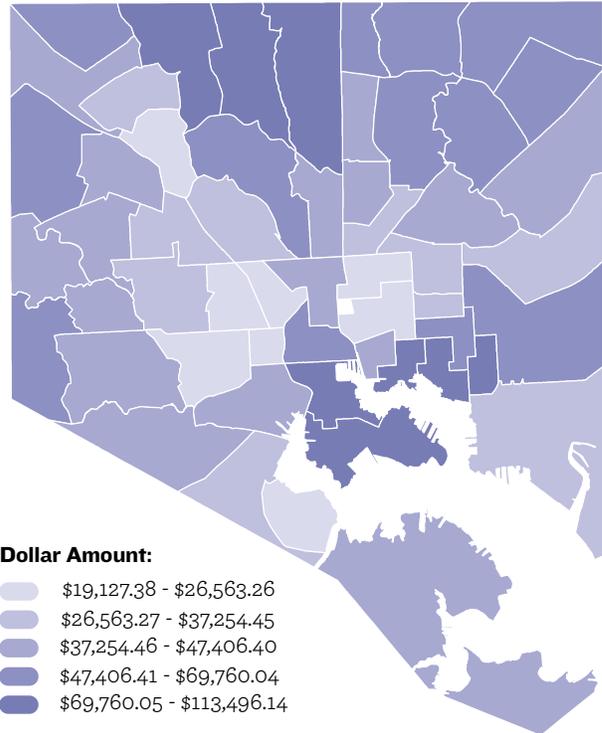

Households Earning Less than \$25,000

During 2013-2017, 29.5% of the City's households earned less than \$25,000 annually. The CSAs with the **greatest** percentage of households earning less than \$25,000 annually include Poppleton/ The Terraces/Hollins Market (57.3%), Upton/Druid Heights (57.1%), and Oldtown/Middle East (56.2%). Between 2006-2010 and 2013-2017, the percentage of households earning less than \$25,000 **declined** in Baltimore by -5.3%. The CSA with the greatest **decline** was Brooklyn/Curtis Bay/Hawkins Point (-21.1%).

Households Earning More than \$75,000

During 2013-2017, 30.5% of households in Baltimore City earned more than \$75,000 annual. The CSAs with the

Median Household Income, 2013-2017

greatest percentage of households earning more than \$75,000 annually include South Baltimore (69.6%), Canton (69.2%), and Greater Roland Park/Poplar Hill (65.4%).

Between 2006-2010 and 2013-2017, the percentage of households earning more than \$75,000 **increased** in Baltimore by 8.7%. The CSA with the greatest **increase** was South Baltimore (+28.7%).

Family Households Living Below the Poverty Line⁵

During 2013-2017, 17.2% of family households in Baltimore City were living below the poverty line. The CSAs with the **greatest** percentage of families in poverty included Poppleton/The Terraces/Hollins Market (45.0%) and Upton/Druid Heights (43.0%).

Children Living Below the Poverty Line

During 2013-2017, 32.9% of children in Baltimore City lived below the poverty line. The CSAs with the **greatest** percentage of children living in poverty included Poppleton/The Terraces/Hollins Market (57.5%) and Upton/Druid Heights (64.9%).

4. Median Household Income 2006-2010 dollar estimates were multiplied by 1.12672 (CPI-U-RS) in order to inflation-adjust 2010 dollars to 2017 dollars.

5. The poverty line is determined by the United States Department of Health and Human Services and varies based upon the composition of the family (number of adults and number of children).

Census Demographics

Indicator Definitions and Rankings

Census Demographics

Indicator Definitions and Rankings

For each indicator reported in *Vital Signs 17*, we provide the data source, the years for which it is reported, and the five CSAs with the highest and lowest values for the indicator; these may not correspond to positive or negative trends.

Population

Total Population

Measure of persons living in an area.

Definition: The total number of persons of all ages that live within an area. This indicator is frequently used to normalize data to allow for comparison across areas. (SOURCE: U.S. CENSUS BUREAU, 2010)

Five Highest:

1. Cedonia/Frankford
2. North Baltimore/
Guilford/Homeland
3. Southwest Baltimore
4. North Baltimore/
Guilford/Homeland
5. Belair-Edison

Five Lowest:

1. Dickeyville/
Franklinton
2. Poppleton/The
Terraces/ Hollins
Market
3. Mt. Washington/
Coldspring
4. Washington
Village/ Pigtown
5. Harbor East/Little Italy

Total Male Population

Measure of males living in an area.

Definition: The total number of men of all ages of all ages that live within an area. (SOURCE: U.S. CENSUS BUREAU, 2010)

Five Highest:

1. Cedonia/Frankford
2. Greater Charles
Village/Barclay
3. Northwood
4. North Baltimore/
Guilford/Homeland
5. Southwest Baltimore

Five Lowest:

1. Dickeyville/
Franklinton
2. Mt. Washington/
Coldspring
3. Poppleton/The
Terraces/Hollins
Market
4. Washington
Village/Pigtown
5. Harbor East/Little Italy

Total Female Population

Measure of females living in an area.

Definition: The total number of women of all ages that live within an area. (SOURCE: U.S. CENSUS BUREAU, 2010)

Five Highest:

1. Cedonia/Frankford
2. Belair-Edison
3. North Baltimore/
Guilford/Homeland
4. Northwood
5. Greater Rosemont

Terraces/Hollins
Market
3. Washington
Village/Pigtown
4. Mt. Washington/
Coldspring
5. Harbor East/Little Italy

Non-Hispanic Race/Ethnicity/Diversity

Black/African American (Non-Hispanic)

Measure of non-Hispanic African American persons living in an area.

Definition: The total number of persons that identify themselves as being racially Black or African American (and ethnically non-Hispanic) out of the total number of persons living in an area. “Black or African American” refers to a person having origins in any of the Black racial groups of Africa. It includes people who indicated their race as “Black.” (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Greater Rosemont
2. Sandtown-Winchester/
Harlem Park
3. Dorchester/Ashburton
4. Edmondson Village
5. Pimlico/Arlington/
Hilltop

Five Lowest:

1. South Baltimore
2. Canton
3. Fells Point
4. Greater Roland
Park/Poplar Hill
5. Highlandtown

Asian (Non-Hispanic)

Measure of Asian persons living in an area.

Definition: The total number of persons that identify themselves as being Asian (and non-Hispanic) out of the total number of persons living in an area. “Asian” refers to a person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent, including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Census Demographics

All Other Races

Measure of persons reporting being of a race other than African American, White, Asian, or Two or More races living in an area.

Definition: The total number of persons that identify themselves as being of either American Indian, Alaskan Native, Native Hawaiian or Other Pacific Islander, or some other race (non-Hispanic) out of the total number of persons living in an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Downtown/Seton Hill
2. The Waverlies
3. Orangeville/East Highlandtown
4. Lauraville
5. Madison/East End

Five Lowest:

- Several CSAs has no population in this category.
1. Allendale/Irvington/S. Hilton, Cherry Hill, Chinquapin Park/Belvedere, Harford/Echodale, Highlandtown, Mount Washington/Coldspring, Washington Village/Pigtown, Westport/Mount Winans/Lakeland

Two or More Races

Measure of persons reporting being of two or more races living in an area.

Definition: The total number of persons that identify themselves as being of two or more races (and non-Hispanic) out of the total number of persons living in an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Dickeyville/Franklinton
2. North Baltimore/Guilford/Homeland
3. Fells Point
4. Claremont/Armistead
5. Hamilton

Five Lowest:

1. Cross-Country/Cheswolde
2. Madison/East End
3. Greenmount East
4. Sandtown-Winchester/Harlem Park
5. Oldtown/Middle East

Racial Diversity Index

Measures the degree of racial diversity within an area.

Definition: The percent chance that two people picked at random within an area will be of a different race/ ethnicity. This number does not reflect which race/ethnicity is predominant within an area. The higher the value, the more racially and ethnically diverse an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Orangeville/East Highlandtown
2. Southeastern
3. Brooklyn/Curtis Bay/Hawkins Point
4. Downtown/Seton Hill
5. Patterson Park North & East

Five Lowest:

1. Greater Rosemont
2. Sandtown-Winchester/Harlem Park
3. Edmondson Village
4. Dorchester/Ashburton
5. Pimlico/Arlington/Hilltop

Age

Percent of Population: Under 5 Years Old

Measure of very young persons (before school age) in an area.

Definition: The percent of persons under 5 years out of all persons living in an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Dickeyville/
Franklintown
2. Orangeville/East
Highlandtown
3. Brooklyn/Curtis Bay/
Hawkins Point
4. Southeastern
5. Claremont/Armistead

Five Lowest:

1. Downtown/Seton Hill
2. Midtown
3. Oldtown/Middle East
4. Greater Mondawmin
5. Loch Raven

Percent of Population: 5 to 17 Years Old

Measure of persons aged 6 to 18 years old (school aged) in an area.

Definition: The percent of persons aged 5 to 17 years old out of all persons living in an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Cherry Hill
2. Westport/Mount
Winans/Lakeland
3. Belair-Edison
4. Upton/Druid Heights
5. Southeastern

Five Lowest:

1. Canton
2. Downtown/Seton Hill
3. Midtown
4. Fells Point
5. South Baltimore

Percent of Population: 18 to 24 Years Old

Measure of persons aged 18 to 24 years old (approximately college age) in an area.

Definition: The percent of persons aged 18 to 24 years old out of all persons living in an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Greater Charles
Village/Barclay
2. Northwood

1. Downtown/Seton Hill
2. Westport/Mount
Winans/Lakeland
3. South Baltimore
4. Patterson Park
North & East
5. Brooklyn/Curtis Bay/
Hawkins Point

Households

Total Number of Households

Measure of households in an area.

Definition: A household consists of all the people occupying a housing unit. A household includes related and unrelated persons, if any, such as lodgers, foster children, wards, or employees who share the housing unit. A person living alone in a housing unit, or a group of unrelated people sharing a housing unit such as partners or roomers, is also counted as a household. The count of households excludes group quarters. (SOURCE: U.S. CENSUS BUREAU, 2010)

Five Highest:

1. Cedonia/Frankford
2. Midtown
3. Medfield/Hampden/Woodberry
4. Harford/Echodale
5. Loch Raven

Five Lowest:

1. Dickeyville/Franklinton
2. Poppleton/The Terraces/Hollins Market
3. Washington Village/Pigtown
4. Madison/East End
5. Harbor East/Little Italy

Average Household Size (from Vital Signs 16)

Measures the average size of the households within an area.

Definition: The median value of number of persons living within a household. The average size of a household is obtained by dividing the number of persons in households by the number of households (or householders). (SOURCE: U.S. CENSUS BUREAU, 2010)

Five Highest:

1. Madison/East End
2. Midway/Coldstream
3. Belair-Edison
Three CSAs tied for 4th and 5th

Five Lowest:

1. Downtown/Seton Hill
2. Midtown
3. Canton
4. Mt. Washington/Coldspring
5. Inner Harbor/Federal Hill

Percent of Households with Children Under the Age of 18

Measure of households with children.

Definition: The percentage of households with children living in the household that are under the age of 18 out of all households. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Westport/Mt. Winans/Lakeland
2. Cherry Hill
3. Belair-Edison
4. Madison/East End
5. Claremont/Armistead

Five Lowest:

1. Midtown
2. Downtown/Seton Hill
3. Canton
4. Fells Point
5. Inner Harbor/Federal Hill

Percent of Female-Headed Households with Children under 18

Measure of households with children headed by females in an area.

Definition: The percentage of female-headed households with children under 18 out of all households with children under 18 in an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Oldtown/Middle East
2. Poppleton/The Terraces/Hollins Market
3. Upton/Druid Heights
4. Madison/East End
5. Greenmount East

Five Lowest:

1. Greater Roland Park/Poplar Hill
2. Canton
3. South Baltimore
4. North Baltimore/Guilford/Homeland
5. Highlandtown

Income and Poverty

Median Household Income

Measures the relative wealth of households in an area.

Definition: The median household income is the middle value of the incomes earned by households within an area for the prior year. The median value is used as opposed to the average so that both extremely high and extremely low prices do not distort the total amount of income earned by households in an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Greater Roland Park/Poplar Hill
2. Canton
3. South Baltimore
4. Inner Harbor/Federal Hill
5. Fells Point

Five Lowest:

1. Oldtown/Middle East
2. Poppleton/The Terraces/Hollins Market
3. Upton/Druid Heights
4. Cherry Hill
5. Southern Park Heights

Percent of Households Earning Less than \$25,000 a Year

Measures the concentration of households that earned less than \$25,000 in the previous year.

Definition: The percentage of households earning less than \$25,000 out of all households in an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Poppleton/The Terraces/Hollins Market
2. Upton/Druid Heights
3. Oldtown/Middle East
4. Cherry Hill
5. Southern Park Heights

Five Lowest:

1. Canton
2. South Baltimore
3. Greater Roland Park/Poplar Hill
4. Fells Point
5. Lauraville

Percent of Households Earning \$25,000 to \$40,000 a Year

Measures the concentration of households with earnings in the previous year between \$25,000 and \$39,999 in an area.

Definition: The percentage of households earning between \$25,000 and \$39,999 out of all households in an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Edmondson Village
2. Cedonia/Frankford
3. Greater Rosemont
4. Greater Govans
5. Claremont/Armistead

Five Lowest:

1. South Baltimore
2. Inner Harbor/Federal Hill
3. Fells Point
4. Canton
5. Greater Roland Park/Poplar Hill

Percent of Households Earning \$40,000 to \$60,000 a Year

Measures the concentration of households with earnings in the previous year between \$40,000 and \$59,999 in an area.

Definition: The percentage of households earning between \$40,000 and \$59,999 out of all households in an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Loch Raven
2. Edmondson Village
3. Claremont/Armistead
4. Harford/Echodale
5. Midway/Coldstream

Five Lowest:

1. Poppleton/The Terraces/Hollins Market
2. North Baltimore/Guilford/Homeland
3. Greater Roland Park/Poplar Hill
4. Canton
5. Fells Point

Percent of Households Earning \$60,000 to \$75,000 a Year

Measures the concentration of households with earnings in the previous year between \$60,000 and \$74,999 in an area.

Definition: The percentage of households earning between \$60,000 and \$74,999 out of all households in an area.

(SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Downtown/Seton Hill
2. Lauraville
3. Northwood
4. Loch Raven
5. Allendale/ Irvington/S. Hilton

Five Lowest:

1. Cherry Hill
2. Oldtown/Middle East
3. Upton/Druid Heights
4. Penn North/ Reservoir Hill
5. Claremont/Armistead

Percent of Households Earning More than \$75,000 a Year

Measures the concentration of households with earnings in the previous year over \$75,000 in an area.

Definition: The percentage of households earning more than \$75,000 out of all households in an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. South Baltimore
2. Canton
3. Greater Roland Park/Poplar Hill
4. Inner Harbor/ Federal Hill
5. Fells Point

Five Lowest:

1. Upton/Druid Heights
2. Greenmount East
3. Southwest Baltimore
4. Sandtown-Winchester/ Harlem Park
5. Poppleton/ The Terraces/ Hollins Market

Percent of Households Living Below the Poverty Line

Measures economic conditions in an area.

Definition: This indicator measures the percentage of households whose income fell below the poverty threshold out of all households in an area. Federal and state governments use such estimates to allocate funds to local communities. Local communities use these estimates to identify the number of individuals or families eligible for various programs. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Poppleton/The Terraces/Hollins Market
2. Upton/Druid Heights

Housing and Community Development

Housing is the predominant land use in nearly all of Baltimore’s neighborhoods and serves as the basis for quality of life in nearly all other aspects of communities such as health, education, local economies and safety. Yet the policies and laws that impact the development of housing have historically been established in isolation across federal, state and local governments and policymakers.¹ The lack of coordination, and in some cases outright discriminatory practices, have left some communities with housing stock in need of significant investment while others have booming markets that can instill fear of displacement by longtime residents.

To overcome these diverging impacts on neighborhoods, Baltimore has worked on several innovative initiatives to take more local control over housing practices and their impacts during the past several years. Some of the initiatives have come from the local government. The City of Baltimore established the Vacants to Value program² in 2010 to target problem properties in neighborhoods where market conditions were ripe for collaborative code enforcement to buoy development. The Department of Housing and Community Development issued a framework for community development³ in 2019 that expands resources to all communities through new funding mechanisms such as the Community Catalysts Grants and the Neighborhood Impact Investment Fund. The Baltimore City Council has also actively engaged in better housing safeguards for all residents with recent legislation mandating housing registration and inspections for all rental housing regardless of size⁴ and anti-discrimination laws that ban the ability of landlords to deny rent based on source of income.⁵

Grassroots and community-based efforts have also coalesced to increase resources for more affordable housing

in Baltimore. Voters went to the ballot in 2016 in support of the Housing For All initiative that established a charter amendment for an Affordable Housing Trust Fund.⁶ Several local groups worked together, including the Baltimore Housing Roundtable and United Workers, to mobilize voters towards a Baltimore that is “United Not Blighted” with funding for more equitable development.⁷

Data Sources

Vital Signs 17 tracks 21 indicators for Community Statistical Areas (CSAs)⁸ designed to follow the city’s housing market and community development processes over time. These indicators are grouped into the following categories: housing market, affordability and choice, tax credits, permits and code enforcement, and vacancy.

Data for *Vital Signs 17* Housing indicators come from sources that can be grouped into the following categories:

City sources: Baltimore City Department of Housing, Baltimore City Circuit Court, Baltimore City Department of Finance, BidBaltimore.

 8. CSAs are groups of census tracts that correspond to neighborhoods. See Vital Signs 17 Introduction for more details.

Housing and Community Development

State sources: Maryland Department of Planning

Federal sources: United States Postal Service, Bureau of the Census, American Community Survey (ACS), Department of Housing and Urban Development.

Proprietary sources: First American Real Estate Solutions, RBIntel.

When possible, indicators are created by normalizing data by the number of residential properties to establish rates that allow for comparison across neighborhoods and over time.

Housing Market

Housing market transactions within neighborhoods provide a glimpse into how well homes in the area are sold to people moving in using formal financing mechanisms. Mortgage-based sales of homes generally suggest that the housing unit will be owner-occupied. Cash-based sales suggest investment transactions that may not be occupied by the buyer, or possibly not occupied at all.⁹ Bank-owned (REO) sales occur after a property owner has been foreclosed upon, which typically means that displacement has occurred.

Nine housing market indicators for Baltimore's neighborhoods are included in *Vital Signs 17*: percentage of properties that are owner-occupied, total number of homes sold, median price of homes sold, median number of days on market, percent of homes sold in foreclosure, percent of homes sold for cash, percent of properties under mortgage foreclosure, and percentage of residential tax lien sales.

Owner-Occupancy

Between 2016 and 2017, the percentage of residential properties that were owner-occupied in Baltimore **decreased** from 54.9% to 54.6%. In 2017, the CSAs with the **highest** percentage of owner-occupied properties were Claremont/Armistead (83.8%), Cross-Country/Cheswolde (82.4%), and Mount Washington/Coldspring (81.8%). The CSAs with the **lowest** percentage of owner-occupied properties Madison/East End (23.0%) and Southwest Baltimore (23.7%)

Data Key

Green colored text denotes a positive change.

Red colored text denotes a negative change.

Blue colored text denotes a neutral change.

Number of Homes Sold

Between 2016 and 2017, the total number of homes sold in Baltimore City **increased** from 9,034 to 9,267. In 2017, the **highest** number of homes were sold in Patterson Park North & East (487), Medfield/Hampden/Woodberry/Remington (474), and Inner Harbor/Federal Hill (392). The **lowest** number of homes sold were in Cherry Hill (11) and Dickeyville/ Franklinton (25).

Median Sales Price

Between 2016 and 2017, the median sales price of homes sold **increased** by 8.7% from \$138,000 to \$150,000. In 2017, the CSAs with the **highest** median home sales include North Baltimore/ Guilford/Homeland (\$377,500), South Baltimore (\$325,000), and Greater Roland Park/Poplar Hill (\$317,763). The CSAs with the **lowest** median home sales include Sandtown-Winchester/ Harlem Park (\$34,500), Greater Rosemont (\$34,784), and Midway/Coldstream (\$35,000).

Median Days on Market

Between 2016 and 2017, the median number of days that a house was listed on the market in Baltimore City **decreased** from 33 to 29. The CSAs where it took the **least** amount of time to sell a home in 2017 included South Baltimore (15.0 days) and Poppleton/The Terraces/Hollins Market (17.0 days). The CSAs with where it took the **most** amount of time to sell a home were Downtown/Seton Hill (44.0 days) and Upton/Druid Heights (43.0 days).

Cash-Based Homes Sales

Between 2016 and 2017, the percentage of all homes sold in Baltimore purchased for cash **decreased** from 42.1% to 41.3%. The CSAs with the **highest** percentage of homes sold as cash-based purchases in 2017 were Sandtown-Winchester/Harlem Park (88.1%), Clifton-Berea (87.4%), and Southwest Baltimore (86.1%). The CSAs with the **lowest** percentage of the homes sold in cash were South Baltimore (9.9%), Dickeyville/Franklinton (13.0%), and Canton (14.4%).

Foreclosure Sales

Between 2016 and 2017, the percentage of homes sold under foreclosure or as a real estate owned (REO) sale **declined** from 1.0% to 0.9%. The CSAs with the **highest** percentage of homes sold under foreclosure in 2017 were Claremont/Armistead (5.4%) and Clifton-Berea (3.5%). Nineteen CSAs had **zero** homes sold in foreclosure.

9. Alan Mallach 2012), "Depopulation, Market Collapse and Property Abandonment" in *Rebuilding America's Legacy Cities*, Alan Mallach, editor. The American Assembly.

Housing and Community Development

Foreclosure Filings

Between 2016 and 2017, the percentage of homes in Baltimore receiving notice of a mortgage foreclosure filing due to delinquent payment **decreased** from 1.4% to 1.2%. The **highest** percentage of homes receiving a mortgage foreclosure filing occurred in Poppleton/The Terraces/Hollins Market (4.5%), Oldtown/Middle East (3.8%), and Howard Park/West Arlington (2.4%). The **lowest** foreclosure filing rates occurred in Southwest Baltimore (0.0%) and Greater Roland Park/Poplar Hill (0.2%).

Tax Lien Sales

Residential properties with unpaid taxes can be sold as tax certificates at the annual tax lien certificate sale held properties with tax liens for sale **increased** from 4.6% to 5.2%. The CSAs with the highest percentage of tax lien sales were Sandtown-Winchester/Harlem Park (14.0%) and Southwest Baltimore (11.6%). The CSAs with the **lowest** residential properties with tax liens for sale were Greater Roland Park/Poplar Hill and Mount Washington/Cold-spring (0.5%).

Housing Affordability and Choice¹⁰

Housing costs are a burden for households on a fixed or low income, those who have experienced job loss or displacement, or for those living in areas where housing values are increasing rapidly. Federal housing choice vouchers assist households by subsidizing rent so that households do not spend more than 30% of their income on housing. Although the vouchers can be used in the private market, rental units in some neighborhoods have rents too high for landlords to accept vouchers as market value.

Vital Signs 17 tracks the percentage of households paying 30% or more of their total household income on either mortgage or rent as well as the number of housing vouchers per 1,000 rental units being used in a neighborhood.

Affordability—Mortgage

Between 2006-2010 and 2013-2017, the percentage of households with mortgages paying more than 30% of their total household income on home-related expenses **decreased** from 40.0% to 34.2%. During 2013-2017, the CSAs with the **highest** percentage of homeowners spending more than 30% of their total income on housing included Greenmount East (53.4%), Downtown/Seton Hill (50.2%), and Southeastern (50.2%). The CSAs with the **lowest** percentage of homeowners spending more than 30% of their total income on housing were Highlandtown (18.5%) and Canton (20.2%).

Affordability—Rent

Between 2006-2010 and 2013-2017, the percentage of households paying more than 30% of their total household income on rent decreased from 52.7% to 49.8%. During 2013-2017, the CSAs with the **greatest** percentage of renters paying in excess of 30% of their income on housing included Belair-Edison (68.1%), Edmondson Village (64.5%), and Washington Village/Pigtown (63.4%). The CSAs with the **lowest** percentage of renters who paid more than 30% of their total household income on rent were Canton (28.3%), South Baltimore (33.9%) and Fells Point (35.6%).

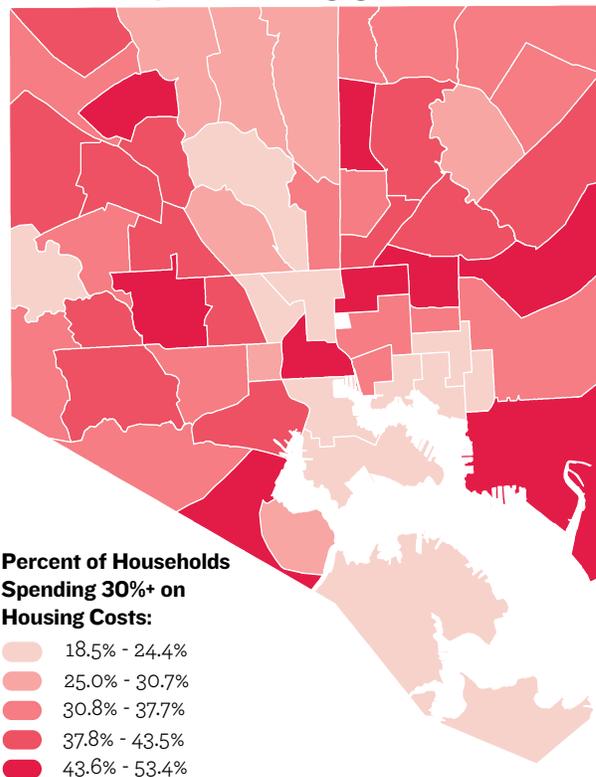

Housing Voucher Use

Between 2016 and 2017, the rate of housing vouchers used per 1,000 rental units in Baltimore City **increased** from 124.6 to 126.4. The CSAs with the highest rates of housing voucher use per 1,000 rental units were Belair-Edison (373.6), Madison/East End (291.8), and Washington Village (268.3).

Housing Tax Credits¹¹

Although Baltimore City has one of the highest property tax rates in the State of Maryland, many residents avail

Affordability Index - Mortgage, 2013-2017

10. Sources for Housing Affordability indicators are the American Community Survey (ACS) and the Picture of Subsidized Housing (US Department of Housing and Urban Development).

11. Tax credit data has been provided by the Baltimore City Department of Finance.

Housing and Community Development

themselves to tax credit programs based on ownership status, income eligibility and/or rehabilitation of historic properties. Baltimore City residential property owners can apply for two property tax credits in order for owner-occupants to manage fluctuations in assessed value (homestead tax credit) and to ensure their tax bill does not exceed a percentage of household gross income (homeowner's tax credit). Property owners must apply for these credits and many homeownership preservation strategies are aimed at raising awareness about how and when to apply. For property owners in designated historic districts, Historic Tax credits help incentivize renovation of buildings located in these districts. *Vital Signs 17* tracks the percentage of properties that receive each of these credits to show the rate of uptake of these potential credits in different parts of the city.

Homestead Tax credit

From 2016 to 2017, the rate of residential properties receiving the Homestead Tax credit in Baltimore **declined** from 251.7 to 228.1 per 1,000 residential properties. In 2017, the CSAs with the **highest** rates of residential properties that received the Homestead Tax credit were located in Cross-Country/Cheswolde (530.0 per 1,000 residential units), Northwood (454.4 per 1,000), and Dorchester/Ashburton (416.6 per 1,000). The CSAs with the **lowest** rates of residential properties that received the Homestead Tax credit were located in Greater Rosemont (48.2 per 1,000), Southwest Baltimore (63.3 per 1,000), and Sandtown-Winchester/Harlem Park (70.4 per 1,000).

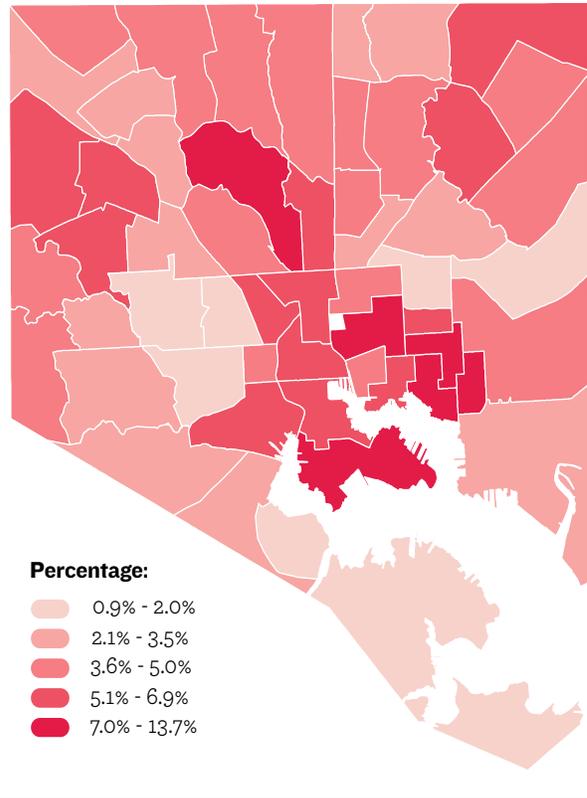

Homeowners Tax credit

From 2016 to 2017, the rate of residential properties in Baltimore that received the Homeowners Tax credit **increased** from 45.3 to 48.9 per 1,000 residential properties. In 2017, the **highest** rates of Homeowners Tax credit were located in Glen-Fallstaff (107.3 per 1,000), The Waverlies (105.8 per 1,000 residential units), and Edmondson Village (101.8 per 1,000). The CSAs with the lowest rates were Claremont/Armistead (8.3 per 1,000) and Downtown/Seton Hill (10.0 per 1,000).

Historic Tax Credits

Between 2016 and 2017, the rate of Historic Tax credits per 1,000 residential units **increased** slightly from 11.6 to 11.7 per 1,000 residential properties. In 2017, the CSAs with the **highest** rates of Historic Tax credits were Oldtown/Middle East (85.6 per 1,000 residential units), Canton (72.1 per 1,000 residential units), and Patterson Park North & East (71.6 per 1,000 residential units). There were 20 CSAs that did not have any utilization of historic tax credits in 2017

Percent of Residential Properties with Rehabilitation Permits Over \$5,000, 2017

Housing Permits and Code Enforcement

Baltimore City's Department of Housing and Community Development is responsible for issuing permits for rehabilitation, new construction, and demolition, as well as enforcing the building code and issuing violations. *Vital Signs 17* uses these datasets to track both investment in and/or potential neglect of a neighborhood's housing stock. In 2017, the CSAs with the highest rate of new construction permits occurred in Harbor East/Little Italy (16.9 per 1,000 homes), Glen-Fallstaff (5.1 per 1,000 homes), and Medfield/Hampden/Woodberry/Remington (3.4 per 1,000 homes). Thirty-two CSAs experienced no new construction permits in 2017.

New construction permits

Between 2016 and 2017, the rate of new construction permits decreased from 1.3 to 0.5 per 1,000 homes. In 2017, the CSAs with the highest rate of new construction permits occurred in Harbor East/Little Italy (16.9 per 1,000 homes), Glen-Fallstaff (5.1 per 1,000 homes), and Medfield/Hampden/Woodberry/Remington (3.4 per 1,000 homes). Thirty-two CSAs experienced no new construction permits in 2017.

Housing and Community Development

Rehabilitation permits

Between 2016 and 2017, the percentage of residential properties with rehabilitation permits in excess of \$5,000 in Baltimore **increased** from 3.2% to 4.4%. The CSAs that experienced the largest **increases** in the rate of rehabilitation permits were Highlandtown (+5.4%) and South Baltimore (+5.1%).

In 2017, the CSAs that had the **highest** (10.8%) and Medfield/ Hampden/ Woodberry/ Remington (8.4%). The CSAs that had the **lowest** percentage of residential properties with rehabilitation permits were Cherry Hill (0.9%), Brooklyn/Curtis Bay/Hawkins Point (1.1%), and Sandtown-Winchester /Harlem Park (1.4%).

Demolition permits

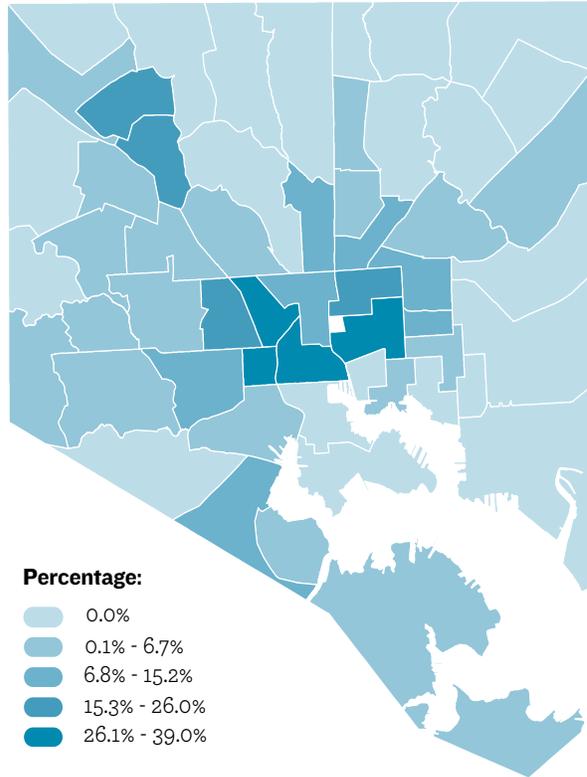

Given that Baltimore has significantly declined in population over the years, the supply of housing in the city today greatly outnumbers current demand, which over many decades, has resulted in deferred maintenance of residential properties and ultimately abandonment. In 2015, Maryland Governor Hogan announced funding for Project C.O.R.E.¹² to support the City's ability to demolish buildings deemed unsafe. Removal of buildings through deconstruction of properties is growing as a means of a more sustainable way to reuse materials from vacant property.¹³

Between 2016 and 2017, the rate of demolition permits **decreased** from 3.5 to 3.0 per 1,000 homes. In 2017, the **greatest** rate of demolition permits occurred in Upton/Druid Heights (22.3 per 1,000 homes), Greenmount East (21.1 per 1,000 homes), and Clifton-Berea (12.5 per 1,000 homes). Thirteen CSAs did not have any demolition permits in 2017.

Housing violations (other than vacant and abandoned notices)

Between 2016 and 2017, the percentage of properties in Baltimore receiving a housing violation (excluding a violation for vacancy-see below) **increased** from 2.7% to 4.5%. In 2017, the CSAs with the **highest** percentage of properties receiving a housing violation included were Oldtown/Middle East (12.1%) and Greenmount East (10.8%). The CSAs with the **lowest** percentage of housing violations include South Baltimore and Inner Harbor/Federal Hill (0.3%), and Greater Roland Park/Poplar Hill (0.5%).

Percent of Vacant and Abandoned Properties Owned by Baltimore City, 2017

Vacant Buildings and Unoccupied Housing

Baltimore is one of few cities in the country that tracks vacant housing based on an official violation notice from the City's Department of Housing and Community Development. Vacant and abandoned housing is relatively easy to identify with boarded up windows and/or other signs of disrepair that makes the structure uninhabitable.

Homes that are habitable but still do not have anyone living in them are less obvious from appearance alone, but are a growing concern for many neighborhoods. Homes that the United States Postal Service no longer delivers mail to can be considered unoccupied.

Vacant and Abandoned Housing

Between 2016 and 2017, the percentage of homes receiving a vacant house notice (VHN) in Baltimore City **increased** from 8.0% to 8.2%. The percentage of vacant and abandoned

13. Urban Wood Project—Room and Board <https://www.roomandboard.com/about-us/craftspeople/urban-wood-project.ftl>

properties **increased** most in Sandtown-Winchester/Harlem Park (+5.2%) and Southwest Baltimore (+3.8%). The CSAs with the largest **decreases** in vacant and abandoned housing were Midway/Coldstream (-7.7%) and Downtown/Seton Hill (-5.5%).

In 2017, the CSAs with **highest** percentage of vacant and abandoned homes were Sandtown-Winchester/Harlem Park (35.1%), Greenmount East (30.0%), and Southwest Baltimore (29.7%). In 2017, 15 CSAs had less than 1% vacant and abandoned properties.

Vacant Housing Owned by Baltimore City

In 2017, 13.5% of the vacant and abandoned properties were owned by the City, down from 15.2% in 2013, which was the last time this indicator was reported in *Vital Signs*. The CSAs with the **greatest** percentage of vacant and abandoned properties owned by the City in 2017 were in Upton/Druid Heights (39.0%), Poppleton/The Terraces/Hollins Market (36.9%), and Oldtown/Middle East (36.3%).

Homes Receiving No Mail

Between 2016 and 2017, the percent of residential addresses that did not receive mail from the U.S. Postal Service identified as unoccupied for more than 90 days **increased** from 8.2% to 8.3%. The CSAs with the **highest** percentages of addresses not receiving mail were Greenmount East (24.3%), Southwest Baltimore (20.4%), and Greater Mondawmin (18.9%). The lowest percentages occurred in Mount Washington/Coldspring (1.0%) and North Baltimore/Guilford/Homeland (1.2%).

From 2016 to 2017, the CSAs with the greatest **increase** in the percentage of addresses not receiving mail were Harbor East/Little Italy (+4.8%) and Greenmount East (+4.2%). The CSAs with the greatest **decrease** in the percentage of homes not receiving mail were Penn North/Reservoir Hill (-3.6%) and Patterson Park North & East (-4.0%).

Housing and Community Development

Indicator Definitions and Rankings

Housing and Community Development

Indicator Definitions and Rankings

For each indicator reported in *Vital Signs 17*, we provide the data source, the years for which it is reported, and the five CSAs with the highest and lowest values for the indicator; these may not correspond to positive or negative trends.

Housing Market Indicators

Total Number of Homes Sold

Measures housing market activity in an area.

Definition: The total number of homes and condominiums that are sold within a full calendar year. This includes both market and private transactions of single family homes, rowhouses/townhouses, mid- and high-rise condominiums, apartments, duplexes, and multi-family dwellings.

(SOURCE: FIRST AMERICAN REAL ESTATE SOLUTIONS (FARES), 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017)

Five Highest:

1. Patterson Park
North & East
2. Medfield/Hampden/
Woodberry/Remington
3. Inner Harbor/
Federal Hill
4. Canton
5. North Baltimore/
Guilford/Homeland

Five Lowest:

1. Cherry Hill
2. Dickeyville/
Franklinton
3. Claremont/Armistead
4. Downtown/Seton Hill
5. Oldtown/Middle East

Median Price of Homes Sold

Measures the value of residential properties in an area.

Definition: The median home sales price is the middle value of the prices for which homes are sold (both market and private transactions) within a calendar year. The median value is used as opposed to the average so that both extremely high and extremely low prices do not distort the prices for which homes are sold. This measure does not take into account the assessed value of a property.

(SOURCE: FIRST AMERICAN REAL ESTATE SOLUTIONS (FARES), 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017)

2. Greater Rosemont
3. Midway/Coldstream
4. Southwest Baltimore
5. Clifton-Berea

Housing and Community Development

Median Number of Days on the Market

Measures the demand for housing in an area.

Definition: The median number of days that homes listed for sale sits on the public market in a given area. This time period is from the date it is listed for sale till the day the contract of sale is signed. Private (non-listed) home sale transactions are not included in this indicator. The median days on market is used as opposed to the average so that both extremely high and extremely low days on the market do not distort the length of time for which homes are listed on the market. (SOURCE: RBINTEL, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017)

Five Highest:

1. South Baltimore
2. Poppleton/The Terraces/Hollins Market
3. Medfield/Hampden/ Woodberry/Remington
4. The Waverlies
5. Mount Washington/ Coldspring

Percentage of Residential Tax Lien Sales

Measures the percentage of residential properties with city liens sold.

Definition: The percentage of residential properties with city liens sold as tax certificates at the annual tax lien certificate sale held in May. Tax sales are used to collect delinquent real property taxes and other unpaid charges to the city, which are liens against the real property. The tax certificate sale is a public online auction of City lien interests on properties that occurs annually in May. (SOURCE: BIDBALTIMORE, 2015, 2016, 2017)

Five Highest:

1. Sandtown-Winchester/ Harlem Park
2. Southwest Baltimore

4. North Baltimore/ Guilford/Homeland
5. Claremont/Armistead

Percent of Homes Sold in Foreclosure

Measures sales of homes by banks owning foreclosed properties

Definition: The portion of the homes and condominiums sold that were identified as being owned by the bank (REO) out of all residential properties sold in a calendar year. (SOURCE: RBINTEL, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017)

Five Highest:

1. Claremont/Armistead
2. Clifton-Berea
3. Brooklyn/Curtis Bay/ Hawkins Point
4. Belair-Edison
5. Southeastern

Five Lowest:

Nineteen CSAs had zero homes sold in foreclosure

Percent of Homes Sold for Cash

Measures the purchasing of homes in cash, without a mortgage.

Definition: The portion of homes and condominiums sold for cash out of all residential properties sold in a calendar year. These types of sales tend to signify investor-based purchases as homes purchased for cash either become rental properties or later sold again in an effort to generate a profit. (SOURCE: RBINTEL, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017)

Five Highest:

1. Sandtown-Winchester/ Harlem Park
2. Clifton-Berea
3. Southwest Baltimore
4. Greater Rosemont
5. Madison/East End

Five Lowest:

1. South Baltimore
2. Dickeyville/ Franklinton
3. Canton
4. Highlandtown
5. Medfield/Hampden/ Woodberry/Remington

Housing and Community Development

Percent of Properties Receiving Mortgage Foreclosure Filing

Measures properties for which foreclosure proceedings are underway due to mortgage delinquencies.

Definition: The percentage of properties where the lending company or loan servicer has filed a foreclosure proceeding with the Baltimore City Circuit Court out of all residential properties within an area. This is not a measure of actual foreclosures since not every property that receives a filing results in a property dispossession. (SOURCE: BALTIMORE CITY CIRCUIT COURT, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017; MD PROPERTY VIEW 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017)

Five Highest:

1. Poppleton/The Terraces/Hollins Market
2. Oldtown/Middle East
3. Howard Park/West Arlington
4. Greenmount East
5. Belair-Edison

Five Lowest:

1. Southwest Baltimore
2. Greater Roland Park/Poplar Hill
3. Claremont/Armistead
4. Canton
5. Cross-Country/Cheswolde

Percent of Properties that are Owner-Occupied

Measures property occupancy by owners.

Definition: The percentage of homeowners that are the principal residents of a particular residential property out of all residential properties. It is important to note that a portion of these owner-occupied properties may be subdivided and have tenants that pay rent and are not included in the calculation. (SOURCE: MD PROPERTY VIEW 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017)

Five Highest:

1. Claremont/Armistead
2. Cross-Country/Cheswolde

4. Northwood
5. Harford/Echodale

Five Lowest:

1. Madison/East End
2. Southwest Baltimore
3. Greenmount East
4. Sandtown-Winchester/Harlem Park
5. Poppleton/The Terraces/ Hollins Market

Percent of Addresses that Do Not Receive Mail (USPS No Stat)

Measures housing units where mail delivery has been discontinued.

Definition: The percentage of residential addresses for which the United States Postal Service has identified as being unoccupied (no mail collection) for a period of at least 90 days or longer. These properties may be habitable, but are not currently being occupied. It is important to note that a single residential property can contain more than one address. (SOURCE: UNITED STATES POSTAL SERVICE, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017)

3. Cross-Country/Cheswolde
4. Dickeyville/Franklintown
5. Greater Roland Park/Poplar Hill

Housing Affordability Indicators

Affordability Index: Mortgage

Measures housing burden for households with mortgages in an area.

Definition: The percentage of households that pay more than 30% of their total household income on mortgage and other housing-related expenses. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Greenmount East
2. Downtown/Seton Hill
3. Southeastern
4. Clifton-Berea
5. Greater Rosemont

Five Lowest:

1. Highlandtown
2. Canton
3. Midtown
4. South Baltimore
5. Dickeyville/Franklintown

Affordability Index: Rent

Measures housing burden for households paying rent in an area.

Definition: The percentage of households that pay more than 30% of their total household income on rent and related expenses out of all households in an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Belair-Edison
2. Edmondson Village
3. Washington Village/Pigtown
4. Southwest Baltimore
5. Upton/Druid Heights

Five Lowest:

1. Canton
2. South Baltimore
3. Fells Point
4. Mount Washington/Coldspring
5. Harbor East/Little Italy

Rate of Housing Vouchers Per 1,000 Rental Units

Measures the ability of housing voucher holders to find housing in the private rental market

Definition: The Housing Choice Voucher (HCV) program is the federal government’s largest low-income housing assistance program where people can seek housing in the private market. The maximum housing assistance is generally the lesser of the payment standard minus 30% of the family’s monthly adjusted income or the gross rent for the unit minus 30% of monthly adjusted income. (SOURCE: US DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT, PICTURE OF SUBSIDIZED HOUSING, 2014, 2016, 2017)

Five Highest:

1. Belair-Edison
2. Madison/East End
3. Washington Village/Pigtown

5. Patterson Park North & East

Five Lowest:

1. Greater Roland Park/Poplar Hill
2. South Baltimore
3. Canton
4. Fells Point
5. Mount Washington/Coldspring

Housing Tax Credit

Rate of Properties Receiving Homestead Tax Credit

Measures homeownership and residential properties receiving a tax credit.

Definition: The number of residential properties that received the homestead tax credit per 1,000 residential properties within an area. The Homestead Credit limits the increase in taxable assessments each year to a fixed percentage. Every county and municipality in Maryland is required to limit taxable assessment increases to 10% or less each year, with the Baltimore City rate capped at 4%. (SOURCE: BALTIMORE CITY DEPARTMENT OF FINANCE, 2011, 2012, 2013, 2014, 2015, 2016, 2017; MDPROPERTY VIEW 2011, 2012, 2013, 2014, 2016, 2017)

1. Greater Rosemont
2. Southwest Baltimore
3. Sandtown-Winchester/Harlem Park
4. Clifton-Berea
5. Poppleton/The Terraces/Hollins Market

Rate of Properties Receiving Homeowners Tax Credit

Measures homeownership and residential properties receiving a tax credit.

Definition: The number of residential properties that received the homeowners tax credit per 1,000 residential properties within an area. The homeowner’s tax credit sets a limit on the amount of property taxes any homeowner must pay based upon his or her income. (SOURCE: BALTIMORE CITY DEPARTMENT OF FINANCE, 2011, 2012, 2013, 2014, 2015, 2016 2017; MD PROPERTY VIEW 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017)

4. South Baltimore
5. Greenmount East

Historic Tax Credit

Measures number of residential properties receiving historic tax credits.

Definition: The number of residential properties that received the Historic Tax Credit per 1,000 residential properties within an area. The credit is granted on the increased assessment directly resulting from qualified improvements. The duration of the credit is for 10 years, and is applicable to properties located in designated areas of significant historical value. (SOURCE: BALTIMORE CITY DEPARTMENT OF FINANCE, 2012, 2013, 2014, 2015, 2016 2017; MDPROPERTY VIEW, 2012, 2013, 2014, 2016, 2016, 2017)

Five Highest:

1. Oldtown/Middle East
2. Canton
3. Patterson Park
North & East
4. Highlandtown
5. Fells Point

Five Lowest:

Twenty CSAs did not have any allocations of credits.

Housing Permits and Code Enforcement Indicators

Percent of Residential Properties with Rehabilitation Permits Exceeding \$5,000

Measure of interest, demand, and financial ability to invest in residential properties in an area.

Definition: The portion of residential properties that have applied for and received a permit to renovate the interior and/or exterior of a property where the cost of renovation will exceed \$5,000. The threshold of \$5,000 is used to differentiate a minor and more significant renovation project. (SOURCE: BALTIMORE CITY DEPARTMENT OF HOUSING, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017; MDPROPERTY VIEW 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017)

4. Southwest Baltimore
5. Greater Rosemont

Rate of New Construction Permits

Measures new construction and residential investment in an area.

Definition: The number of permits issued for new residential buildings per 1,000 existing residential properties within a community. The permits are analyzed by date of issue and not date of completion. (SOURCE: BALTIMORE CITY DEPARTMENT OF HOUSING, 2011, 2012, 2013, 2014, 2015, 2016, 2017; MDPROPERTY VIEW 2011, 2012, 2013, 2014, 2015, 2016, 2017)

Five Highest:

1. Harbor East/Little Italy
2. Glen-Fallstaff
3. Medfield/Hampden/
Woodberry/Remington
4. Downtown/Seton Hill
5. Inner Harbor/
Federal Hill

Five Lowest:

Thirty-two CSAs did not have any permits issued for new residential construction.

Rate of New Demolition Permits

Measures residential demolition permits issued by area.

Definition: The number of permits issued for the demolition of residential buildings per 1,000 existing residential properties. The permits are analyzed by date of issue and not date of actual demolition. (SOURCE: BALTIMORE CITY DEPARTMENT OF HOUSING, 2011, 2012, 2013, 2014, 2015, 2016, 2017; MDPROPERTY VIEW 2011, 2012, 2013, 2014, 2015, 2016, 2017)

Five Highest:

1. Upton/Druid Heights
2. Greenmount East
3. Clifton-Berea
4. Oldtown/Middle East
5. Sandtown-
Winchester/Harlem

Five Lowest:

Thirteen CSAs did not have any permits issued for demolition.

Housing and Community Development

Percent of Residential Properties that are Vacant and Abandoned

Measure of homes with an official Vacant House Notice (VHN) issued by Baltimore Housing.

Definition: The percentage of residential properties that have been classified as being vacant and abandoned by the Baltimore City Department of Housing out of all properties. Properties are classified as being vacant and abandoned if: the property is not habitable and appears boarded up or open to the elements; the property was designated as being vacant prior to the current year and still remains vacant; and the property is a multi-family structure where all units are considered to be vacant. (SOURCE: BALTIMORE CITY DEPARTMENT OF HOUSING, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017; MDPROPERTY VIEW 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017)

2. Greater Roland Park/Poplar Hill
3. Mount Washington/ Coldspring
4. Claremont/Armistead
5. South Baltimore

Percent of Vacant Properties Owned by Baltimore City

Measure of local government ownership of vacant residential properties.

Definition: The percent of properties that are classified as being vacant and abandoned that are owned by Baltimore City. Baltimore City has come to own these properties through a variety of ways including (but not limited to) eminent domain, unpaid tax or water bills, and purchase. (SOURCE: BALTIMORE CITY DEPARTMENT OF HOUSING, 2011, 2012, 2013, 2017)

Five Highest:

1. Upton/Druid Heights
2. Poppleton/The Terraces/Hollins Market
3. Oldtown/Middle East
4. Downtown/Seton Hill
5. Southern Park Heights

Five Lowest:

Twenty-two CSAs have no vacant properties identified as being owned by Baltimore City.

Percent of Residential Properties with Housing Violations

Measure of homes receiving housing violations (excluding vacancy).

Definition: The percentage of residential properties that have received at least one housing code violation from the Baltimore City Department of Housing out of all properties. Properties whose facade, structure, and/or surrounding area violate the City's Housing Code are issued a notice and are considered open till the property is found in compliance. A property may receive multiple violations. (SOURCE: BALTIMORE CITY DEPARTMENT OF HOUSING, 2010, 2011, 2012, 2013, 2015, 2016, 2017; MDPROPERTY VIEW 2010, 2011, 2012, 2013, 2015, 2016, 2017)

3. Greater Roland Park/Poplar Hill
4. Mount Washington/ Coldspring
5. Canton

Total Residential Properties

Number of Residential Properties

The number of residential properties is used as a denominator in several of the indicators.

Definition: The total number of residential properties located within an area as identified by Maryland Property View. It is important to note that this indicator is a count of properties (single family homes, condominiums, and duplexes) and that a property can be comprised of multiple housing units. (SOURCE: MDPROPERTY VIEW, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017)

Five Highest:

1. Southwest Baltimore
2. Greater Rosemont
3. Medfield/Hampden/ Woodberry/Remington
4. Patterson Park North & East
5. Belair-Edison

Five Lowest:

1. Dickeyville/ Franklinton
2. Downtown/Seton Hill
3. Cherry Hill
4. Poppleton/The Terraces/ Hollins Market
5. Oldtown/Middle East

BALTIMORE NEIGHBORHOOD
INDICATORS ALLIANCE

Jacob France Institute

Children and Family Health

The neighborhoods where Baltimoreans live, work and play have a direct relationship to community-based health outcomes. At the neighborhood level, historic, social, economic and environmental forces can determine quality of life through health-based indicators. For Baltimore, the overall picture for these indicators is mixed: overall life expectancy for the city has been declining over the past few years. On the positive side, access to prenatal care has expanded, and with an overall decrease in infant mortality and babies being born with low birth-weight.

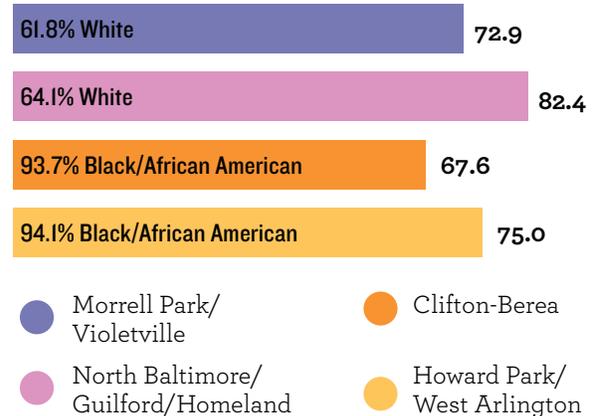

The impact of place is most evident in the ultimate indicator of health, life expectancy. Racial differences in life expectancy persist, with white Baltimoreans living on average³ years longer (76.1) than black (70.9) Baltimoreans in 2017.¹ However, Other social, economic and environmental factors also contribute to disparate life expectancy. Holding race steady, two different neighborhoods can have strikingly different average life expectancies as much as ten years.

These spatial disparities in life expectancy span the gamut of issues in all of the other chapters of the *Vital Signs* report—from neighborhood disparities in violence, vacant and abandoned housing, median income, unemployment or even tree canopy. To address these issues, the Baltimore City Health Department released *Healthy Baltimore 2020*² aimed at ensuring a place-based approach to health policies overall.

Baltimore has also had a long-term strategy to improve birth outcomes coordinated by the B'More for Healthy Babies³ initiative. Since 2010, infant mortality in Baltimore has reduced by 38%, through effort particularly focused on promoting prenatal care and helping to reduce sleep-related infant deaths.

Vital Signs 17 highlights those indicators that best provide a snapshot of our city's health across all neighborhoods.

Life Expectancy in Select Baltimore CSAs, 2017

Liquor Board. Indicators are created by normalizing data to the number of residents or other relevant population in a given area. This will reflect the concentration of an indicator within an area, and allow for comparison across neighborhoods and over time.

Vital Signs 17 includes fourteen indicators for Community Statistical Areas⁴ (CSAs) designed to track the health of adults, children, and infants in Baltimore City and its neighborhoods. These indicators are grouped into the following categories: birth outcomes; life expectancy and mortality; built environment and food security; and social assistance programs.

Birth Outcomes⁵

Vital Signs 17 tracks four birth outcome indicators for Baltimore's Community Statistical Areas (CSAs): teen birth rate; percent of births delivered at term; percent of babies born with satisfactory birth weight; and percent of births where the mother received early prenatal care.

Teen Birth Rate

Baltimore City's teen birth rate (the number of girls aged 15-19 who have given birth per 1,000 females aged 15-19) has continued to **decrease** over the past several years. Between 2016 and 2017, the teen birth rate further **decreased** from 26.9 to 23.3. In 2017, the CSAs with the **highest** teen birth rates were Orangeville/East Highlandtown (85.6), Morrell Park/Violetville (69.0) and Brooklyn/Curtis Bay/Hawkins Point (68.6). Five CSAs with zero teen births were Canton, Cross-Country/Cheswolde, Fells Point, Greater Roland Park/Poplar Hill, Mount Washington/Coldspring.

Births Delivered at Term

Between 2016 and 2017, the percentage of births that were delivered at term (at least 37 weeks gestation) in Baltimore City **increased** from 86.4% to 86.6%. In 2017, the CSAs with the **highest** percentage of births at term were Canton (95.1%) and Mount Washington/Coldspring

Data Key

Green colored text denotes a positive change.

Red colored text denotes a negative change.

Blue colored text denotes a neutral change.

(94.6%). The CSAs with the **lowest** percentage of births at term occurred in Poppleton/The Terraces/Hollins Market (71.4%), and Greenmount East (76.4%).

Babies Born with Satisfactory Weight

Between 2015 and 2016, the percentage of births where the child was of satisfactory weight (at least 5.5lbs) in Baltimore City **increased** from 87.7% to 88.4%. In 2016, the CSAs with the **highest** percentage of births with satisfactory birth weight were Canton (96.0%) and South Baltimore (95.3%); the CSAs with the **lowest** percentage of births with satisfactory birth weight were Clifton-Berea (77.9%) and Edmondson Village (80.0%).

Early Prenatal Care

Between 2016 and 2017, the percentage of births where the mother received early prenatal care (care that began during the first trimester of pregnancy) in Baltimore City **increased** from 50.9% to 63.4%. In 2017, the CSAs with the **highest** percentage of births where the mother received early prenatal care were Canton (82.9%) and Inner Harbor/Federal Hill (81.8%). The CSAs with the **lowest** percentages of mothers receiving early prenatal care included Southwest Baltimore (50.9%), and Westport/Mount Winans/Lakeland (41.7%).

Life Expectancy and Mortality⁶

Life expectancy (how long one might expect to live) and mortality rates (chances of dying) are fundamental health outcomes that are increasingly correlated with other indicators about a person's neighborhood. *Vital Signs 17* reports life expectancy at birth and mortality rates for five age categories. These two indicators are inversely related; CSAs with low life expectancy have high rates of mortality in the younger age categories.

Life Expectancy

Between 2016 and 2017, the life expectancy at birth in Baltimore City **declined** from 73.2 years to 72.9 years. The CSAs with the **highest** life expectancy were Cross-Country/Cheswolde (85.0 years), Greater Roland Park/Poplar Hill (83.6 years), and North Baltimore/Guilford/Homeland (82.4 years). The CSAs with the **lowest** life expectancy were Downtown/Seton Hill (65.7 years) and Poppleton/The Terraces/Hollins Market (66.9 years).

4. CSAs are groups of census tracts that correspond to neighborhoods which vary in size. See *Vital Signs 16* Introduction.

5. Birth outcome data comes from the Maryland Department of Vital Statistics. Of the 7,936 births recorded in Baltimore City in 2017, 127 births (1.6%) were not assigned to any one part of the city.

6. Data and methodology provided by the Baltimore City Department of Health.

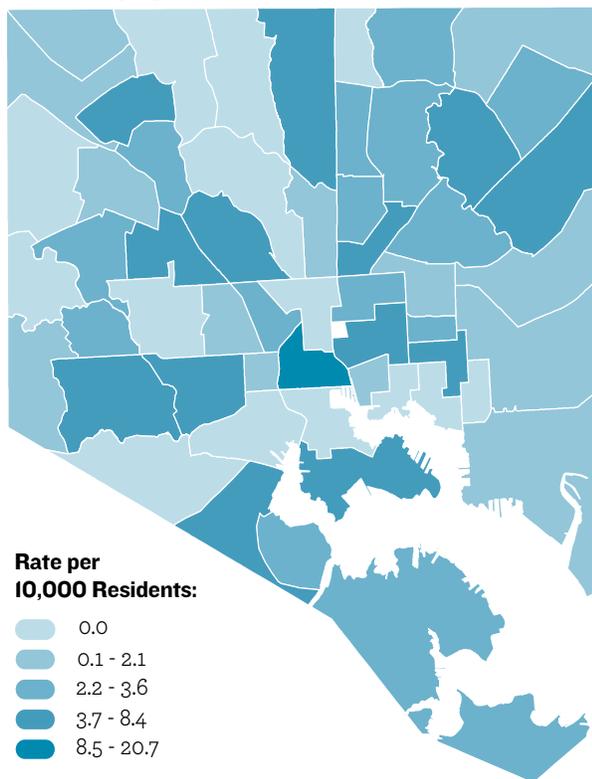

Infant Mortality

The infant mortality rate measures the average number of deaths over a 5-year period in persons under the age of one per 1,000 live births. During 2013-2017, the infant mortality rate was 9.3 per 1,000 live births in Baltimore City. The CSAs with the **highest** infant mortality rate were Clifton-Berea (18.0), Pimlico/Arlington/Hilltop (18.7), and Cherry Hill (17.4). Greater Roland Park/Poplar Hill and Mount Washington/Coldspring experienced an infant mortality rate of **zero**.

Mortality Ages 1-14

During 2013-2017, Baltimore City's age-specific mortality rate for persons aged 1-14 was 2.5 per 10,000 persons. There were 14 CSAs with **zero** deaths of persons in this age group. The CSAs with the **highest** mortality rates were Downtown/Seton Hill (20.7) and Midway/Coldstream (8.4).

Mortality by Age (1-14 Years Old), 2017

Mortality Ages 15-24

During 2013-2017, Baltimore City's age-specific mortality rate for persons aged 15-24 was 11.9 per 10,000 persons. Canton experienced a mortality rate of **zero** for this age group. The CSAs with the **highest** rates were Pimlico/Arlington/Hilltop (35.5) and Upton/Druid Heights (26.0).

Mortality Ages 25-44

During 2013-2017, Baltimore City's age-specific mortality rate for persons aged 25-44 was 27.2 per 10,000 persons. The CSAs with the **lowest** rates were Greater Roland Park/Poplar Hill (5.1) and Canton (5.9). The CSAs with the **highest** rates were Southwest Baltimore (58.3) and Sandtown-Winchester/Harlem Park (57.2).

Mortality Ages 45-64

During 2013-2017, Baltimore City's age-specific mortality rate for persons aged 45-64 was 122.3 per 10,000 persons. The CSAs with the **highest** rates were Poppleton/The Terraces/Hollins Market (215.6), Upton/Druid Heights (200.4), and Clifton-Berea (190.3). The CSAs with the **lowest** rates were Greater Roland Park/Poplar Hill (32.3), Cross-Country/Cheswolde (48.2), and Mt. Washington/Coldspring (48.9).

Mortality Ages 65-84

During 2013-2017, Baltimore City's age-specific mortality rate for persons aged 65-84 was 391.7 per 10,000 persons. The CSAs with the **highest** rates were Downtown/Seton Hill (776.3) and Claremont/Armistead (537.1). The CSAs with the **lowest** rates were Cross-Country/Cheswolde (185.0) and Greater Roland Park/Poplar Hill (189.6).

Mortality Ages 85+

During 2013-2017, Baltimore City's age-specific mortality rate for persons 85 and over was 1,311.9 per 10,000 persons. The CSAs with the **highest** rates were The Waverlies (2,081.6) and Midway/Coldstream (1,961.9). The CSAs with the **lowest** rates were Cross-Country/Cheswolde (891.6), Greater Charles Village/Barclay (1,000.0), and Midtown (1,000.0).

Social Assistance Programs⁷

Baltimore residents have access to several federal programs aimed at assisting people during times of financial distress. The uptake of these programs ebbs and flows with economic cycles, but also varies by neighborhoods in the City. *Vital Signs 17* tracks Temporary Assistance to

7. Source of data is the Maryland Department of Human Resources through a data sharing agreement with the Jacob France Institute. Research has shown that administrative records yield significantly higher counts of participation in government safety-net programs compared with survey (Census) estimates. Lynch et al (2008) "Differences in Estimates of Public Assistance Reciprocity Between Surveys and Administrative Records" www.ubalt.edu/jfi/jfi/reports/TANFJan2008.pdf

Needy Families (TANF), a program administered through the Maryland Department of Human Resources.

Families Receiving TANF

Between 2016 and 2017, the percent of families in Baltimore City who received TANF support at some point during the year **decreased** from 7.9% to 6.9%. The CSAs with the **highest** percentage of families receiving TANF were Clifton-Berea and Cherry Hill (17.0%) and Oldtown/Middle East (15.8%). The CSAs with the **lowest** percentage included Mount Washington/Coldspring (0.0%), Greater Roland Park/Poplar Hill (0.2%) and Canton (0.7%).

Built Environment

A neighborhood's built environment (buildings, streets, stores, etc.) provide the context for human activity and can directly or indirectly impact the ability of residents to live healthy lives. High concentrations of establishments that sell alcohol can have adverse effects on crime and safety.⁸ *Vital Signs 17* tracks the density of off-premise liquor outlets.

Liquor Outlet Density

Between 2016 and 2017, the density of off-premise liquor outlets in Baltimore City, where alcohol can be taken out of the establishment that sells it, **declined** from 1.1 to 1.0 per 1,000 persons. The **highest** density of liquor stores was in Downtown/Seton Hill (5.3 per 1,000 persons) and Highlandtown (5.1 per 1,000 persons). There were zero off-premise liquor stores in Cross-Country/Cheswolde and Dickeyville/Franklinton.

Children and Family Health

Indicator Definitions and Rankings

Children and Family Health Indicator Definitions and Rankings

For each indicator reported in Vital Signs 17, we provide the data source, the years for which it is reported, and the five CSAs with the highest and lowest values for the indicator; these may not correspond to positive or negative trends

Birth Outcome Indicators

Teen Birth Rate

Measure of birth among young persons .

Definition: The rate of female teens aged 15-19 that gave birth per 1,000 females aged 15-19. (MARYLAND DEPARTMENT OF VITAL STATISTICS, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017; U.S. CENSUS, 2010)

Five Highest:

1. Orangeville/East Highlandtown
2. Morrell Park/Violetville
3. Brooklyn/Curtis Bay/ Hawkins Point
4. Downtown/Seton Hill
5. Westport/Mount Winans/Lakeland

Five Lowest:

1. Canton, Cross-Country Cheswolde, Fells Point, Greater Roland Park/ Poplar Hill, Mount Washington/ Coldspring
2. North Baltimore/ Guilford/Homeland
3. Northwood
4. Greater Charles Village/Barclay
5. Midtown

Percent of Births Delivered at Term

Measures the portion of births that are considered to be full-term and likely to result in a healthier baby.

Definition: The percentage of births delivered at term measures the percentage of births in a calendar year where the baby is delivered between 37 and 42 weeks of gestation. (MARYLAND DEPARTMENT OF VITAL STATISTICS 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017)

Five Highest:

1. Canton
2. Mount Washington/ Coldspring
3. Greater Charles Village/Barclay
4. Dickeyville/ Franklinton
5. Cross-Country/ Cheswolde

Five Lowest:

1. Poppleton/The Terraces/ Hollins Market
2. Greenmount East
3. Harbor East/Little Italy
4. Clifton-Berea
5. Pimlico/Arlington Hilltop

Percent of Babies

Born with a Satisfactory Birth Weight

Measure of babies born at a healthy weight.

Definition: The percentage of children born with a birth weight of at least 5½ pounds out of all births in the area. (MARYLAND DEPARTMENT OF VITAL STATISTICS 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017)

Five Highest:

1. Canton
2. Fells Point
3. Dickeyville/ Franklinton
4. Cross-Country/ Cheswolde
5. Inner Harbor Federal Hill, Mount Washington/Coldspring

Five Lowest:

1. Poppleton/ The Terraces/Hollins Market
2. Greenmount East
3. Clifton-Berea
4. Pimlico/Arlington/ Hilltop
5. Southwest Baltimore

Percent of Births

Where the Mother Received Early Prenatal Care

Measure of healthy pregnancies and healthy babies.

Definition: The percentage of births where the mother received prenatal care during the first trimester of the pregnancy in a calendar year out of all births within an area. This information is calculated by the Vital Statistics registration information collected from each live birth. (SOURCE: MARYLAND DEPARTMENT OF VITAL STATISTICS 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017)

Five Highest:

1. Canton
2. Inner Harbor/ Federal Hill
3. North Baltimore/ Guilford/Homeland
4. Fells Point
5. Washington Village/Pigtown

Five Lowest:

1. Southwest Baltimore
2. Westport/Mount Winans/Lakeland
3. Orangeville/East Highlandtown
4. Southeastern
5. Glen-Fallstaff

Lead Poisoning Indicators (From *Vital Signs 16*)

Number of Children Tested for Elevated Blood Lead Levels

Measure of child testing for the potential of elevated blood lead levels.

Definition: This indicator reflects the total number of children aged 0-6 who are tested for the presence of blood lead in a calendar year. (SOURCE: MARYLAND DEPARTMENT OF THE ENVIRONMENT, LEAD POISONING PREVENTION PROGRAM, 2010, 2011, 2012, 2013, 2014, 2015, 2016)

Five Highest:

1. Cedonia/Frankford
2. Brooklyn/Curtis Bay/Hawkins Point
3. Beechfield/Ten Hills/West Hills
4. Southwest Baltimore
5. Northwood

Five Lowest:

Six CSAs did not report for 2017.

Percent of Children with Elevated Blood Lead Levels

Measure of high exposure to lead for young children.

Definition: The number of children aged 0-6 that are found to either have elevated blood lead levels (≥ 10 Mg/dL) or lead poisoning (≥ 20 Mg/dL) out of the number of children tested within an area in a calendar year. (SOURCE: MARYLAND DEPARTMENT OF THE ENVIRONMENT, LEAD POISONING PREVENTION PROGRAM, 2010, 2011, 2012, 2013, 2014, 2015, 2016)

Five Highest:

1. Greenmount East
2. Sandtown-Winchester/Harlem Park
3. Midway/Coldstream
4. Madison/East End

Five Lowest:

Forty-four CSAs had no children found to have elevated blood lead levels in 2016.

Life Expectancy and Mortality Indicators

Life Expectancy at Birth

Summarizes health over the entire lifespan.

Definition: The average number of years a newborn can expect to live, assuming he or she experiences the currently prevailing rates of death through their lifespan. (SOURCE: VITAL STATISTICS MORTALITY DATA, 2007-2011, 2008-2012, 2009-2013, 2010-2014, 2011-2015, 2012-2016, 2013-2017, ANALYSIS BY: BALTIMORE CITY HEALTH DEPARTMENT)

Five Highest:

1. Cross-Country/Cheswolde
2. Greater Roland Park/Poplar Hill
3. North Baltimore/Guilford/Homeland
4. Inner Harbor/Federal Hill
5. Canton, Mount Washington

Five Lowest:

1. Downtown/Seton Hill
2. Poppleton/The Terraces/Hollins Market
3. Southwest Baltimore
4. Greenmount East
5. Clifton-Berea, Midway/Coldstream

Infant Mortality

Measure of death rate in persons under one year of age.

Definition: The number of infant deaths (babies under one year of age) per 1,000 live births within the area in a five year period. This is the most stable and commonly measured indicator of mortality in this age group. (SOURCE: VITAL STATISTICS MORTALITY DATA, 2007-2011, 2008-2012, 2009-2013, 2010-2014, 2011-2015, 2012-2016, 2013-2017, ANALYSIS BY: BALTIMORE CITY HEALTH DEPARTMENT)

Five Highest:

1. Clifton-Berea
2. Pimlico/Arlington/Hilltop
3. Cherry Hill
4. Southern Park Heights
5. Chinquapin Park/Belvedere, The Waverlies

Five Lowest:

1. Greater Roland Park/Poplar Hill, Mount Washington/Coldspring
2. North Baltimore/Guilford/Homeland
3. Morrell Park/Violetville
4. Inner Harbor/Federal Hill
5. Westport/Mount Winans/Lakeland

Mortality by Age 1-14 years old

Measure of death rate for persons between one and 14 years old.

Definition: The number of deaths of persons between the ages of one and 14 per 10,000 persons within the area in a five year period. (SOURCE: VITAL STATISTICS MORTALITY DATA, 2007-2011, 2008-2012, 2009-2013, 2010-2014, 2011-2015, 2012-2016, 2013-2017. ANALYSIS BY: BALTIMORE CITY HEALTH DEPARTMENT)

Five Highest:

1. Downtown/Seton Hill
2. Midway/Coldstream
3. Greater Mondawmin
4. Westport/Mount Winans/Lakeland
5. Allendale/Irvington/S. Hilton

Five Lowest:

Fourteen CSAs reported zero deaths for this age in 2016.

Mortality by Age 15-24 years old

Measure of death rate for persons between 15 and 24 years old.

Definition: The number of deaths of persons between the ages of 15 and 24 per 10,000 persons within the area in a five year period. (SOURCE: VITAL STATISTICS MORTALITY DATA, 2007-2011, 2008-2012, 2009-2013, 2010-2014, 2011-2015, 2012-2016, 2013-2017. ANALYSIS BY: BALTIMORE CITY HEALTH DEPARTMENT)

Five Highest:

1. Pimlico/Arlington/Hilltop
2. Upton/Druid Heights
3. Midway/Coldstream
4. Dorchester/Ashburton
5. Forest Park/Walbrook

Five Lowest:

1. Canton
2. North Baltimore/Guilford/Homeland
3. Highlandtown
4. Midtown
5. Greater Charles Village/Barclay

Mortality by Age 25-44 years old

Measure of death rate for persons between 25 and 44 years old.

Definition: The number of deaths of persons between the ages of 25 and 44 per 10,000 persons within the area in a five year period. (SOURCE: VITAL STATISTICS MORTALITY DATA, 2007-2011, 2008-2012, 2009-2013, 2010-2014, 2011-2015, 2012-2016, 2013-2017. ANALYSIS BY: BALTIMORE CITY HEALTH DEPARTMENT)

Five Highest:

1. Southwest Baltimore
2. Sandtown-Winchester/Harlem Park
3. Greater Rosemont
4. Greenmount East
5. Midway/Coldstream

Five Lowest:

1. Greater Roland Park/Poplar Hill
2. Canton
3. South Baltimore
4. Inner Harbor/Federal Hill
5. Fells Point

Mortality by Age 45-64 years old

Measure of death rate for persons between 45 and 64 years old.

Definition: The number of deaths of persons between the ages of 45 and 64 per 10,000 persons within the area in a five year period. (SOURCE: VITAL STATISTICS MORTALITY DATA, 2007-2011, 2008-2012, 2009-2013, 2010-2014, 2011-2015, 2012-2016, 2013-2017. ANALYSIS BY: BALTIMORE CITY HEALTH DEPARTMENT)

Five Highest:

1. Poppleton/The Terraces/Hollins Market
2. Upton/Druid Heights
3. Clifton-Berea
4. Southwest Baltimore
5. Greenmount East

Five Lowest:

1. Greater Roland Park/Poplar Hill
2. Cross-Country/Cheswolde
3. Mount Washington/Coldspring
4. North Baltimore/Guilford/Homeland
5. Inner Harbor/Federal Hill

Mortality by Age 65-84 years old

Measure of death rate for persons between 65 and 84 years old.

Definition: The number of deaths of persons between the ages of 65 and 84 per 10,000 persons within the area in a five year period. (SOURCE: VITAL STATISTICS MORTALITY DATA, 2007-2011, 2008-2012, 2009-2013, 2010-2014, 2011-2015, 2012-2016, 2013-2017. ANALYSIS BY: BALTIMORE CITY HEALTH DEPARTMENT)

Five Highest:

1. Downtown/Seton Hill
2. Claremont/Armistead
3. Brooklyn/Curtis Bay/ Hawkins Point
4. Washington Village/Pigtown
5. Cherry Hill

Five Lowest:

1. Cross-Country/ Cheswolde
2. Greater Roland Park/Poplar Hill
3. North Baltimore/ Guilford/Homeland
4. Mount Washington/ Coldspring
5. Glen-Fallstaff

Mortality by Age 85 and Over

Measure of death rate for persons between 85 years old and above.

Definition: The number of deaths of persons 85 years and older per 10,000 persons within the area in a five year period. (SOURCE: VITAL STATISTICS MORTALITY DATA, 2007-2011, 2008-2012, 2009-2013, 2010-2014, 2011-2015, 2012-2016, 2013-2017. ANALYSIS BY: BALTIMORE CITY HEALTH DEPARTMENT)

Five Highest:

1. The Waverlies
2. Midway/Coldstream
3. Mount Washington/ Coldspring
4. Belair-Edison
5. Beechfield/Ten Hills/West Hills

Five Lowest:

1. Cross-Country/ Cheswolde
2. Greater Charles Village/Barclay
3. Midtown
4. Medfield/Hampden/ Woodberry/Remington
5. Morrell Park/Violetville

Social Assistance Indicators

Percentage of Families Receiving TANF

Measure of uptake of federal cash assistance.

Definition: Temporary Assistance for Needy Families (TANF) is a federal assistance program. TANF provides temporary financial assistance while aiming to get people off of that assistance, primarily through employment. (SOURCE: MARYLAND DEPARTMENT OF HUMAN RESOURCES, 2011, 2012, 2013, 2014, 2015, 2016, 2017. U.S. CENSUS, 2010)

Five Highest:

1. Cherry Hill
2. Clifton-Berea
3. Oldtown/Middle East
4. Sandtown-Winchester/ Harlem Park
5. Poppleton/The Terraces/Hollins Market

Five Lowest:

1. Mount Washington/ Coldspring
2. Greater Roland Park/Poplar Hill
3. Canton
4. South Baltimore
5. North Baltimore/ Guilford/Homeland

Built Environment and Food Security

Liquor Outlet Density

Measures the concentration of access to off-premise liquor.

Definition: This indicator reflects the number of business establishments that possess a Class A (Off Sale package goods no on-premises consumption - 6 days, 6:00 a.m.-Midnight. No Sunday sales except Sundays between Thanksgiving Day and New Year's Day upon issuance of a special license for each Sunday) or BD7 (tavern) business license that allows them to sell beer, wine, or liquor. Other liquor licenses to restaurants or on-premise consumption were not included in this analysis. This number is provided by 1,000 residents to allow for comparison across neighborhoods. (SOURCE: BALTIMORE CITY LIQUOR BOARD 2011, 2012, 2013, 2014, 2015, 2016, 2017. U.S. CENSUS 2010)

Five Highest:

1. Downtown/Seton Hill
2. Highlandtown
3. Fells Point
4. Canton
5. South Baltimore

Five Lowest:

1. Cross-Country/ Cheswolde, Dickeyville/ Franklinton
2. Northwood
3. Beechfield/Ten Hills/West Hills
4. Greater Mondawmin
5. Cherry Hill

**Fast Food Outlet Density
(From Vital Signs 13)**

Measures the concentration of prepared foods (ready-made, to-go meals and snacks) locations.

Definition: The Johns Hopkins Center for a Livable Future (CLF) obtained the food permit list from the Baltimore City Health Department in August 2011, which includes all sites that sell food, such as stores, restaurants, and temporary locations such as farmers’ market stands and street carts. The restaurants were grouped into three categories, including full service restaurants, fast food chains, and carryouts. Carryout and fast food chain restaurants were extracted from the restaurant layer and spatially joined with the 2010 Community Statistical Area (CSA) data layer, provided by BNIA-JFI. The prepared foods density, per 1,000 people, was calculated for each CSA using the CSA’s population and the total number of carryout and fast food restaurants, including vendors selling prepared foods in public markets.

(SOURCE: BALTIMORE CITY HEALTH DEPARTMENT, 2011, 2013 ANALYSIS BY: JOHNS HOPKINS CENTER FOR A LIVABLE FUTURE)

Five Highest:

- 3. Edmondson Village
- 4. Loch Raven
- 5. Forest Park/Walbrook

**Average Healthy Food Availability Index
(from Vital Signs 15)**

The Baltimore City Healthy Food Availability Index (HFAI) is a quantitative depiction of the availability of healthy and whole food in supermarkets, small groceries & corner stores, convenience stores, and other stores that sell food.

Definition: The Johns Hopkins Center for a Livable Future (CLF) calculated HFAI scores for all food stores in Baltimore, in summer 2012, using an adapted version of the NEMS-S (Nutrition Environment Measures Survey in Stores) tool. The NEMS-S tool was developed by researchers at the Rollins School of Public Health at Emory University to measure the nutritional environment of food retail stores and was designed to assess healthy food availability in grocery and convenience stores. CLF obtained a food permit list from the Baltimore City Health Department in August 2011, which includes all sites that sell food, such as stores, restaurants, and temporary locations such as farmers’ market stands and street carts. HFAI scores range from zero to 28.5, with higher scores indicating more availability of healthy and whole food in a food store

Crime and Safety

In September 2017, the Mayor’s Violence Reduction Initiative (VRI) was implemented in eight target areas in Baltimore City.¹ A large component of the VRI has been data tracking and analysis to provide monitoring on key community measures of safety, cleanliness, community engagement, and the effectiveness of city agencies and their programming in the target areas. Preliminary analyses of the VRI zones by the City have indicated some reductions of homicides and non-fatal shootings however it is important to recognize the need for citywide cooperation and coordination to ensure all communities are healthy environments for residents to thrive.

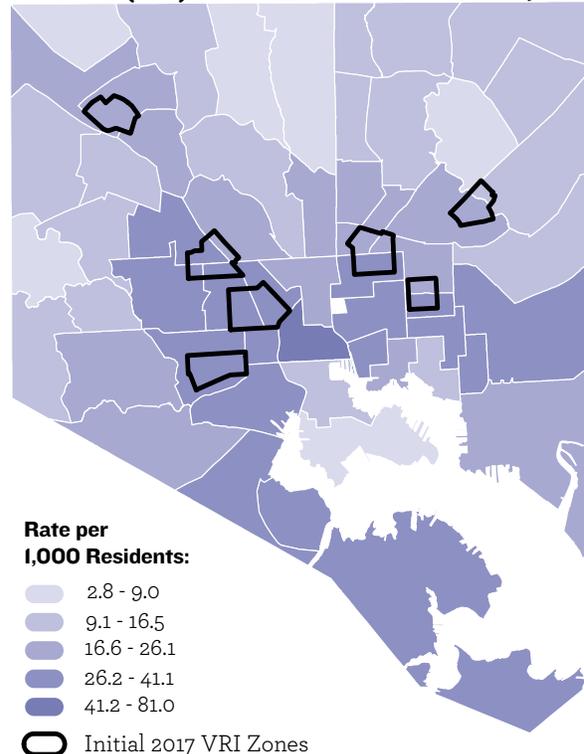

The indicators presented in *Vital Signs 17* detail the overall crime and safety trends within the city and the variation across its communities. It is important to recognize the context for many of the statistics presented in this chapter; the individual narratives of Baltimore’s communities vary and each area faces its own unique challenges or successes. The resiliency of each community is dependent on ability to adapt to changes in the community, new policies in policing, and collaboration around shared goals for safety and improved quality of life.

Now more than ever, having access to reliable, consistent data is crucial for accountability, community goal setting, and measuring progress towards a city that is safe and just. Baltimore City’s Open Baltimore data portal² now includes frequently updated datasets from the Baltimore Police Department, including 911 calls for service, adult arrests, and crime incidents which are included in the national Uniform Crime Report³ cooperative statistical reporting. These datasets are used in *Vital Signs 17* to create several indicators on general crime and safety, arrests, specific reported incidents, and has developed a new indicator on street lighting, focusing on its role in overall neighborhood safety and victimization.

General Crime

Four indicators are tracked in *Vital Signs 17* reflecting general crime and safety measures: Part I crime rate, Incidents of crime reported in Part I of the UCR are considered the more serious criminal offenses. These offenses are

Locations of Violence Reduction Initiative (VRI) Zones & Violent Crime Rate, 2017

1. Mayor's Violence Initiative, <https://moss-citistatsmart.baltimorecity.gov/mayors-violence-reduction-initiative>.
 2. Baltimore City Open data Portal <https://data.baltimorecity.gov>.
 3. Uniform Crime Reporting <https://ucr.fbi.gov>

categorized as either violent crimes (homicide, rape, aggravated assault, and robbery) or property crimes (burglary, larceny, and auto theft). The violent and property crime rates are derived from these two categories. The indicator for homicides that were committed with a firearm looks at one specific offense within the Part I dataset.

Part I Offenses

Between 2016 and 2017, the Part I crime rate in Baltimore City **increased** from 63.0 offenses per 1,000 residents to 67.0 offenses per 1,000 residents. From 2016 to 2017, 22 of the 55 CSAs⁵ experienced a **decrease** in the Part I crime rate. The greatest **increases** in offenses per 1,000 residents occurred in Madison/East End (+32.1), Edmondson Village (+19.0), and Brooklyn/Curtis Bay (+18.1). Despite the citywide trend, the Part I crime rate **decreased** most significantly in Downtown/Seton Hill (-28.2), Washington Village/Pigtown (-14.5), and Harbor East/Little Italy (-14.2).

Violent Offenses

The subset of Part I crimes that make up the violent crime rate **increased**, from 17.6 violent offenses per 1,000 residents in 2016 to 20.1 per 1,000 persons in 2017. In 2017, Downtown/Seton Hill (80.1 incidents per 1,000), Harbor East/Little Italy (41.0), Orangeville/East Highlandtown (39.1) and Washington Village/ Pigtown (37.8) had the **highest** rates of violent crime. In 2017, the communities with the **lowest** rates of violent crime were concentrated in northern Baltimore City, in Cross-Country/Cheswolde (2.8), Greater Roland Park/Poplar Hill (3.8), and North Baltimore/Guilford/Homeland (5.6).

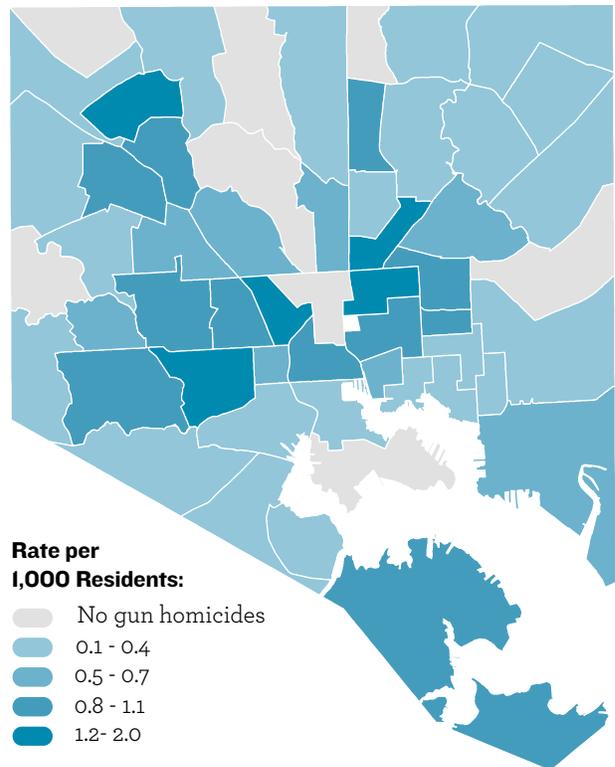

Gun Homicides

Baltimore City experienced 342 homicides in 2017, an **increase** from the 318 reported in 2015. In 2017, 80%, or 275 of the total deaths were a result of a shooting. Areas with the **highest** rates of gun homicides in 2017 included Greenmount East (2.0 incidents per 1,000 residents), Pimlico/Arlington/Hilltop (1.5), Southwest Baltimore (1.3), and Upton/Druid Heights (1.2). Two communities with the highest rates in 2017 **doubled** their gun homicide rates from 2016 to 2017: Greenmount East and Pimlico/Arlington/Hilltop.

Property Crime

The property crime rate citywide **increased** from 44.5 to 45.8 incidents per 1,000 between 2015 and 2016. The

Rate of Gun Homicides, 2017

communities with the **highest** rates of property crime incidents per 1,000 residents were Downtown/Seton Hill (185.4), Washington Village/Pigtown (91.8), Madison/East End (89.3), and Patterson Park North & East (83.4). Some CSAs experienced **increases** in their property crime rate, such as Madison/East End (+31.4), Patterson Park North & East (+15.7) and Edmondson Village (+14.7) from 2016 to 2017, however the most notable property crime **decrease** was in Harbor East/Little Italy (-15.5).

Arrests (from Vital Signs 16)

The relationship between incidents of crime and arrests in a neighborhood is often complicated—not all crime incidents lead to a direct and immediate arrest; one person may be arrested for more than one crime; and, not all arrests lead to charges being filed by the State’s Attorney. Furthermore, arrest data only reflects the locations of arrests, not necessarily the location of the crime. The rate of adults arrested per 1,000 adult residents aged 18 and above provides information about where police action is occurring. This data from the Baltimore City Police Department reflects all adults who were arrested and processed through the Central Booking and Intake facility. Continuing the trend started in 2015 following the civic unrest, the year 2016 saw continued low arrest rates for most of the communities in Baltimore.

Data Key
 Green colored text denotes a positive change.
 Red colored text denotes a negative change.
 Blue colored text denotes a neutral change.

Crime and Safety

From 2015 to 2016 the adult arrest rate **declined** from 30.9 to 20.5 arrests per 1,000 adults. The CSAs with the **highest** arrest rates were Downtown/Seton Hill (95.7 arrests per 1,000), Washington Village/Pigtown (60.0), Upton/Druid Heights (57.8), and Southwest Baltimore (56.0).

The **lowest** arrest rates in 2016 were seen in the northern region of Baltimore, in Cross-Country/Cheswolde (0.5), Mount Washington/Coldspring (1.6), and Greater Roland Park/Poplar Hill (2.0), in addition to Canton and South Baltimore.

Juvenile Arrests (from Vital Signs 15)

The juvenile arrest rate in Baltimore City decreased city-wide from 2014 to 2015. *Vital Signs 15* includes three indicators related to juvenile crime: juvenile arrest rate, juvenile arrest rate for violent offenses, and juvenile arrest rate for drug-related offenses. Each of these indicators is normalized by the number of persons living in the community between the ages of 10 and 17.

Arrests are analyzed for the purposes of this report, rather than crimes committed, because not all juveniles arrested are charged with committing a crime; these indicators also exclude offenders who are later charged as adults. Furthermore, the indicators are calculated by the place of arrest, not by where the crime had been committed. As the rates show, many CSAs near the city center, such as Downtown/Seton Hill, Midtown, Inner Harbor/Federal Hill, and Fells Point have low residential juvenile populations, suggesting that rates may be skewed by youth arrests at various points of interest where juveniles may congregate, such as businesses, parks, transit hubs, and so on. Juvenile arrest for drugs are the exception; the highest rates for this indicator in 2015 are away from the city center.

Juvenile Arrest Rate

In 2015, the overall juvenile arrest rate in Baltimore City was 32.7 arrests per 1,000 juveniles. The CSAs with the highest rates include Downtown/Seton Hill (450 arrests per 1,000), Inner Harbor/Federal Hill (186.0), Midtown (117.5), and Highlandtown (91.7).

Juvenile Violent Offenses

Juvenile violent offenses include arrests for murder, rape, attempted rape, aggravated assault, and robbery. In regards to arrests for violent offenses, the city rate was 8.5 arrests per 1,000 youth for Baltimore City. The CSAs with the **highest** arrest rates include Downtown/Seton Hill (122.2 arrests per 1,000 juveniles), Midtown (60.4), Fells Point (54.9), and Inner Harbor/Federal Hill (28.9). Three CSAs in 2015 had **zero** juvenile arrests for violent

offenses: Canton, Cross-Country/Cheswolde, and Dick-eyville/Franklintown.

Juvenile Drug Related Arrest

For drug-related arrests, Baltimore City had an arrest rate of 4.7 per 1,000 youth. Drug-related offenses include arrests for possession, sale, manufacture, or abuse of illegal drugs. Alcohol is also included for this indicator it is illegal for juveniles to possess or consume alcohol. A total of thirteen CSAs had **zero** juvenile arrest for drugs in 2015. The communities that had the **highest** rates included Highlandtown (30.6 arrests per 1,000 juveniles), Southwest Baltimore (29.7), Washington Village/Pigtown (17.9), and Pimlico/Arlington/Hilltop (17.0). The latter three communities also had the **highest** rates of calls for service to 911 for narcotics in 2015.

Specific Crime Reports and Accidents

In order to address residents' concerns about safety and quality of life, *Vital Signs 17* includes four indicators developed using calls for service to the Baltimore City Police Department. Calls for service are both calls from persons using 911 and calls initiated by police officers who are on duty. These indicators include reported shootings, common assaults, reports of narcotics, and automotive accidents. Each of these indicators is presented per 1,000 residents allowing for comparison across each of the CSAs.

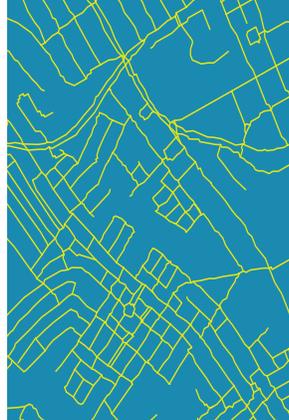

Shootings

In 2017, there were 3.5 calls to 911 for shootings per 1,000 residents in Baltimore City. This is an **increase** from 3.1 per 1,000 in 2016. The CSAs with the **highest** rates of shootings were Southwest Baltimore (11.2), Downtown/Seton Hill (11.0), Greenmount East (10.1), and Pimlico/Arlington/Hilltop (9.4), communities that also had the City's highest rates of gun homicides. There were however three communities had zero 911 calls for shootings:, Cross-Country/Cheswolde, Greater Roland Park/Poplar Hill, and South Baltimore.

From 2016 to 2017 over half of the CSAs experienced an **increase** in the number of shooting calls, however **decreases** did occur in communities such as Oldtown/Middle East (-2.9), Madison/East End (-2.1), and Washington Village/Pigtown (-0.9) in addition to Downtown/Seton Hill (-0.6) which had the second highest call rates in the City.

Common Assaults

The Baltimore City rate of 911 calls for common assaults in 2017 was 75.4 per 1,000 residents, a slight decrease 76.0 the previous year. Although Downtown/Seton Hill continued

to have the highest rate of common assault calls for service at 381.0 per 1,000 residents, it was a drop from 408.5 in 2016. The CSAs with the lowest rates were concentrated in the outer edges of the city, including Greater Roland Park/Poplar Hill, Cross-Country/Cheswolde, North Baltimore/Guilford/Homeland, Mt. Washington/Coldspring, and South Baltimore.

Aside from Downtown/Seton Hill, several other CSAs experienced notable **decreases** in their calls for service for common assaults from 2016 to 2017, including Highlandtown (-19.7), Midway/Coldstream (-13.9), and Harbor East/Little Italy (-12.). **Increases** in calls occurred in Greater Mondawmin (+18.1), Allendale/Irvington/S. Hilton (+16.6), and Dickeyville/Franklinton (+12.7).

Narcotics

In 2017, Baltimore City's rate of 911 calls for narcotics was 90.3 calls per 1,000 residents, or 56,157 total calls, a noticeable **increase** of 14.4 points from 2016. The top four CSAs for narcotics calls all had rates three times **higher** than the city rate: Southwest Baltimore (423.5 calls per 1,000 residents), Upton/Druid Heights (422.0), Pimlico/Arlington/Hilltop (354.5), and Sandtown-Winchester/Harlem Park (308.8). All four Communities are located in West Baltimore.

Some communities had notable **decreases** in the number of calls for service for narcotics from 2016 to 2017, including Washington Village/Pigtown (-257.9), which **decreased** its rate of calls by 50%, and also Highlandtown (-54.1), and Greenmount East (-40.6). Communities that increased their 911 calls include Southwest Baltimore (+131.1), Dorchester/Ashburton (+82.4), Madison/East End (+79.2), and Pimlico/Arlington/Hilltop (+62.9).

Auto Accidents

With any examination of the number of motor vehicle accident calls for service per 1,000 residents it is important to note that not every accident is reported to the Police Department and therefore is not included in the calls for

high speed roads such as highways and interstates often have higher reported numbers of calls. In 2017, the rate of automobile accident calls for service was 90.8 per 1,000 residents in Baltimore City. The CSAs with the highest rates include Downtown/Seton Hill (513.5 per 1,000 residents), Washington Village (247.1), Orangeville/East Highlandtown (237.8), and Southeastern (195.2). The lowest rates mostly occurred in CSAs that border the Baltimore City and Baltimore County line, with Cross-Country/Cheswolde reporting the lowest rate of automobile accidents: 18.0 per 1,000 residents

Personal Safety: Rate of Street Light Outages

In *Vital Signs 16*, the rate of calls to CitiStat 311 to report street light outages was introduced. This indicator was developed to identify areas in Baltimore's Communities that may have high and persistent issues with public lighting areas that are darker may have **increased** levels of victimization as the darkness can provide a cover for a variety of property and violent offenses.

In 2017, Baltimore City's rate of street light outages was 30.6 reports per 1,000 residents, an increase from 21.4 in 2016. The communities with the **highest** rates of reports calls per 1,000 residents include Harbor East/Little Italy (58.4), Poppleton/The Terraces/Hollins Market (51.1), Downtown/Seton Hill (46.7), and Southwest Baltimore (46.4). These communities are also home to many businesses, a research park, and other community amenities so higher rates may be due to employees and students calling in requests, in addition to residents.

The **lowest** rates of outage reports come from lower density, more predominantly residential neighborhoods: Cherry Hill (4.6 reports per 1,000 residents), Dickeyville/Franklinton (13.2), and Southern Park Heights (17.5).

From 2016 to 2017, Harbor East/Little Italy (+36.8), Morrell Park/Violetville (+23.1), Penn North/Reservoir Hill (+22.4), and Southwest Baltimore (+21.9) experienced the largest **increase** in the number of calls for service.

Crime and Safety

Indicator Definitions and Rankings

Crime and Safety Indicator Definitions and Rankings

For each indicator reported in *Vital Signs 17*, we provide the data source, the years for which it is reported, and the five CSAs with the highest and lowest values for the indicator; these may not correspond to positive or negative trends.

Crime and Safety

Crime Rate

Measures the overall rate of Part I crimes in an area.

Definition: The Part I crime rate captures incidents of homicide, rape, aggravated assault, robbery, burglary, larceny, and auto theft that are reported to the Police Department. These incidents are per 1,000 residents in the neighborhood to allow for comparison across areas. (SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017; U.S. CENSUS, 2010)

Five Highest:

1. Downtown/Seton Hill
2. Washington Village/Pigtown
3. Madison/East End
4. Orangeville/East Highlandtown
5. Harbor East/Little Italy

Five Lowest:

1. Cross-County/Cheswolde
2. Greater Roland Park/Poplar Hill
3. South Baltimore
4. North Baltimore/Guilford/Homeland
5. Dickeyville/Franklinton

Violent Crime Rate

Measures the rate of violent crimes, a subset of all Part I crimes, in an area.

Definition: The violent crime rate measures the number of Part I crimes identified as being violent (homicide, rape, aggravated assault, and robbery) that are reported to the Police Department. These incidents are per 1,000 residents in the neighborhood to allow for comparison across areas. (SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017; U.S. CENSUS, 2010)

Five Highest:

1. Downtown/Seton Hill
2. Harbor East/Little Italy
3. Orangeville/East Highlandtown
4. Oldtown/Middle East
5. Washington Village/Pigtown

Five Lowest:

1. Cross-Country/Cheswolde
2. Greater Roland Park/Poplar Hill
3. North Baltimore/Guilford/Homeland
4. South Baltimore
5. Lauraville

Property Crime Rate

Measures the rate of personal property crimes, a subset of all Part I crimes, in an area.

Definition: The property crime rate measures the number of Part 1 crimes identified as being property-based (burglary and auto theft) that are reported to the Police Department. These incidents are per 1,000 residents in the neighborhood to allow for comparison across areas. (SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2011, 2012, 2013, 2014, 2015, 2016, 2017; U.S. CENSUS, 2010)

Five Highest:

1. Downtown/Seton Hill
2. Washington Village/Pigtown
3. Madison/East End
4. Patterson Park North & East
5. Orangeville/East Highlandtown

Five Lowest:

1. Cross-Country/Cheswolde
2. South Baltimore
3. Greater Roland Park/Poplar Hill
4. Dickeyville/Franklinton
5. North Baltimore/Guilford/Homeland

Rate of Gun-Related Homicides

Measures the gun-related homicides in an area.

Definition: The rate of homicides by firearm as reported in the Part 1 crime data per 1,000 residents in an area. (SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2011, 2012, 2013, 2014, 2015, 2016, 2017; U.S. CENSUS, 2010)

Five Highest:

1. Greenmount East
2. Pimlico/Arlington/Hilltop
3. Southwest Baltimore
4. Upton/Druid Heights
5. Midway/Coldstream

Five Lowest:

Eight CSAs reported no gun-related homicides.

Arrests

(From *Vital Signs 16*)

Rate of Adult Arrests

Measures the rate of arrests for adults in an area.

Definition: The rate of arrests for adults aged 18+ per 1,000 adult residents in an area. This indicator is calculated by where an individual was arrested and not by where the crime was committed. This indicator includes arrests for all charges processed at Baltimore’s Central Booking & Intake Facility. (SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2014, 2015, 2016; U.S., CENSUS, 2010)

Five Highest:

1. Downtown/Seton Hill
2. Washington Village/Pigtown
3. Upton/Druid Heights
4. Southwest Baltimore
5. Clifton-Berea

Five Lowest:

1. Cross-Country/Cheswolde
2. Mount Washington/Coldspring
3. Greater Roland Park/Poplar Hill
4. Canton
5. South Baltimore

Juvenile Crime

(From *Vital Signs 15*)

Juvenile Arrest Rate

Measures the rate of arrests for juveniles in an area.

Definition: The number of persons aged 10 to 17 arrested per 1,000 juveniles that live in an area. This indicator is calculated by where the arrested juvenile was arrested and not by where the crime is committed. Arrests are used instead of crimes committed since not all juveniles that are arrested are charged with committing a crime. This indicator also excludes offenders who are later charged as adults for their crime(s). (SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2011, 2012, 2013, 2014, 2015; U.S. CENSUS, 2010)

Five Highest:

1. Downtown/Seton Hill
2. Inner Harbor/Federal Hill
3. Midtown
4. Highlandtown
5. Greater Charles Village/Barclay

Five Lowest:

1. Cross-Country/Cheswolde
2. Dickeyville/Franklinton
3. Beechfield/Ten Hills/West Hills
4. Forest Park/Walbrook
5. Edmondson Village

Juvenile Arrest Rate for Drug-Related Offenses

Measures the juvenile arrest rates for drug-related offenses in an area.

Definition: The number of persons aged 10 to 17 for drug-related offenses per 1,000 juveniles that live in an area. Drug-related offenses include arrests for possession, sale, manufacture, or abuse of illegal drugs, including alcohol. This indicator is calculated by where the arrested juvenile was arrested and not by where the crime is committed. Arrests are used instead of crimes committed since not all juveniles that are arrested are charged with committing a crime. This indicator also excludes offenders who are later charged as adults for their crime(s). (SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2011, 2012, 2013, 2014, 2015; U.S. CENSUS, 2010)

Five Highest:

1. Highlandtown
2. Southwest Baltimore
3. Washington Village/Pigtown
4. Pimlico/Arlington/Hilltop
5. Downtown/Seton Hill

Five Lowest:

Thirteen CSAs did not have any juvenile arrests for drug-related offenses.

Juvenile Arrest Rate for Violent Offenses

Measure of juveniles arrests for violent offenses in an area.

Definition: The number of persons aged 10 to 17 arrested for violent offenses per 1,000 juveniles that live in an area. Violent offenses may include homicide, rape, assault (with or without a weapon), and robbery. This indicator is calculated by where the arrested juvenile was arrested and not by where the crime is committed. Arrests are used instead of crimes committed since not all juveniles that are arrested are charged with committing a crime. This indicator also excludes offenders who are later charged as adults for their crime(s). (SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2011, 2012, 2013, 2014, 2015; U.S. CENSUS, 2010)

Five Highest:

1. Downtown/Seton Hill
2. Midtown
3. Fells Point
4. Inner Harbor/Federal Hill
5. Patterson Park North & East

Five Lowest:

1. Canton
2. Cross-Country/Cheswolde
3. Hamilton
4. Beechfield/Ten Hills/West Hills
5. Claremont/Armistead Edmondson Village Loch Raven

Specific Crime Reports and Accidents

Rate of Shootings Calls

Measure of non-fatal shootings in an area.

Definition: The rate of 911 calls for shootings per 1,000 residents in an area. Since the data comes from 911 calls, it is possible that multiple calls could be made for a single incident. (SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2011, 2012, 2013, 2014, 2015, 2016, 2017; U.S. CENSUS, 2010)

Five Highest:

1. Southwest Baltimore
2. Downtown/Seton Hill
3. Greenmount East
4. Pimlico/Arlington/Hilltop
5. Upton/Druid Heights

Five Lowest:

1. Cross-Country/Cheswolde, Greater Roland Park/Poplar Hill, South Baltimore
2. Medfield/Hampden/Woodberry/Remington
3. Beechfield/Ten Hills/West Hills
4. Canton
5. Inner Harbor/Federal Hill

Rate of Common Assault Calls

Measure of common assault calls for service in an area.

Definition: The rate of calls for assaults that do not involve a weapon per 1,000 residents in an area. Since the data comes from 911 calls, it is possible that multiple calls could be made for a single incident. (SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2011, 2012, 2013, 2014, 2015, 2016, 2017; U.S. CENSUS, 2010)

Five Highest:

1. Downtown/Seton Hill
2. Washington Village/Pigtown
3. Brooklyn/Curtis Bay/Hawkins Point
4. Oldtown/Middle East
5. Southwest Baltimore

Five Lowest:

1. Greater Roland Park/Poplar Hill
2. Cross-Country/Cheswolde
3. North Baltimore/Guilford/Homeland
4. Mount Washington/Coldspring
5. South Baltimore

Rate of Narcotics-Related Calls

Measures drug-related activity in an area.

Definition: The rate of calls for narcotics per 1,000 residents in an area. Since the data comes from 911 calls, it is possible that multiple calls could be made for a single incident. (SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2011, 2012, 2013, 2014, 2015, 2016; U.S. CENSUS, 2010)

Five Highest:

- 1. Southwest Baltimore
- 2. Upton/Druid Heights
- 3. Pimlico/Arlington/Hilltop
- 4. Sandtown-Winchester/Harlem Park
- 5. Madison/East End

Five Lowest:

- 1. Cross-Country/Cheswolde
- 2. Greater Roland Park/Poplar Hill
- 3. Canton
- 4. Mount Washington/Coldspring
- 5. South Baltimore

Rate of Motor Vehicle Accident Calls

Measure of auto-accidents in an area.

Definition: The rate of calls for accidents involving motor vehicles per 1,000 residents in an area. Since the data comes from 911 calls, it is possible that multiple calls could be made for a single incident. Additionally, not every accident involving a motor vehicle is reported to the Police Department. (SOURCE: BALTIMORE CITY POLICE DEPARTMENT, 2011, 2012, 2013, 2014, 2015, 2016, 2017; U.S. CENSUS, 2010)

Five Highest:

- 1. Downtown/Seton Hill
- 2. Washington Village/Pigtown
- 3. Orangeville/East Highlandtown
- 4. Southeastern
- 5. Oldtown/Middle East

Five Lowest:

- 1. Cross-Country/Cheswolde
- 2. Harford/Echodale
- 3. Greater Govans
- 4. Cherry Hill
- 5. North Baltimore/Guilford/Homeland

Personal Safety

Rate of 311 Calls for Street Light Outages per 1,000 Residents

Measure of neighborhood lighting.

Definition: The rate of service requests for street light outages through Baltimore's 311 system per 1,000 residents. More than one service request may be made for the same issue but is logged as a unique request. (SOURCE: BALTIMORE CITY CITISTAT, 2016, 2017; U.S. CENSUS, 2010)

Five Highest:

- 1. Harbor East/Little Italy
- 2. Poppleton/The Terraces/Hollins Market
- 3. Downtown/Seton Hill
- 4. Southwest Baltimore
- 5. Greater Mondawmin

Five Lowest:

- 1. Cherry Hill
- 2. Dickeyville/Franklinton
- 3. Southern Park Heights
- 4. Patterson Park North & East
- 5. Howard Park/West Arlington

Workforce and Economic Development

As the economic center of the metropolitan region, Baltimore City's economy is largely driven by maritime and port-related industries as well as medical and educational institutions.¹ However, new industries, such as an Amazon fulfillment center have started to move into Baltimore as well, due to the close proximity to major markets along the East Coast of the United States.

Baltimore City has also experienced a resurgence in its manufacturing sectors in recent years. Despite losing over three-quarters of its manufacturing jobs between 1950 and 1995, small, light manufacturers and other creative companies are growing. Among the growing number of small manufacturers were many newly established enterprises and those identifying as small batch produces, using the terms artisans, makers, or designers. The rise of co-working spaces throughout the city as well as training and educational programs have supported the growth of these operation.²

There are additional locally-based efforts to help small businesses succeed in the city. Made in Baltimore, now run by the Baltimore Development Corporation, supports local makers and manufacturers through a local-brand certification program, promotion and marketing events (including a retail store), and business development services.³ These initiatives help to create diverse communities that are rich in economic opportunity all across the city.

Several of the City's anchor institutions have made commitments to procuring and hiring locally. Johns Hopkins University, including Johns Hopkins Health Care System, is one of the largest private employer in Baltimore and has two initiatives, BLocal and HopkinsLocal. During the first year of these programs, Hopkins, along with other program partners, increased spending by over \$15 million with Baltimore-based businesses for goods and services and hired over 770 new employees from Baltimore City neighborhoods.^{4,5}

For these initiatives to thrive in all neighborhoods, however, access to capital and digital resources is increasingly

becoming an important consideration for businesses. Capital (money) provides start-up and/or growth funds while access to the internet is critical for both communications and a skilled labor force. Based on new indicators regarding small business investment and access to the internet in *Vital Signs 17*, the disparities that exist in neighborhoods can now be tracked along with other indicators of workforce and economic development.

Data

For *Vital Signs 17*, eighteen workforce and economic development indicators are tracked for Community Statistical Areas (CSAs),⁶ and which measure the City's progress towards sustainable economic development. These indicators highlight the important role of Baltimore as both a major source of labor and as a center of economic activity. Indicators are grouped into the following categories: labor force participation and employment; educational attainment; commercial investment activity; business size and age; neighborhood businesses; and regional dynamics. These indicators provide fundamental data on the City's economic assets and that can be incorporated into data-driven decision making processes.

Data for *Vital Signs 17* Workforce and Economic Development Indicators come from the 2013–2017 American Community Survey (ACS), InfoUSA, the Baltimore City Department of Housing and Community Development, and the Johns Hopkins University 21st Century City Initiative. When possible, indicators are created by normalizing data by the number of residents or commercial properties to establish rates that allow for comparison across neighborhoods and over time.

 5. BLocal Progress Report. (2017). <http://hopkinslocal.jhu.edu/progress-report.pdf>
 6. CSAs are groups of census tracts that correspond to neighborhoods which vary in size. See *Vital Signs 17* Introduction.

Labor Force Participation and Employment

Labor Force Participation and Employment Residents of Baltimore City who are of working age fall into three main categories: in the labor force (employed), actively seeking employment (unemployed), and those who are not in the labor force either by choice or by circumstance. Residents who are discouraged or believe that they cannot find work and therefore are not actively seeking a job are classified as not in the labor force

Based on the 2013–2017 ACS, 62.6% of city residents of working age (between 16 and 64 years old) were employed and 7.1% of the city’s working age residents unemployed and seeking work. Combined, these figures represent the city’s total labor force, which means that almost one-third (30.3%) of the city’s working age residents were not in the labor force..

Employed

Between 2006–2010 and 2013–2017, the percentage of employed working age city residents **increased** slightly from 62.2% to 62.5%. During 2013–2017, the CSAs with the **highest** percentage of working-age residents who were employed were Canton (87.3%), South Baltimore (86.2%), Fells Point (84.6%), and Highlandtown (82.1%). The CSAs with the **lowest** percentage of working age residents who were employed were Southern Park Heights (44.2%), Oldtown/Middle East (46.3%), and Greenmount East (47.5%).

Unemployed and Looking for Work

Between 2006–2010 and 2013–2017, the percentage of unemployed working age city residents **decreased** from 8.2% to 7.1%. During 2013–2017, the CSAs with the **highest** percentage of unemployed persons looking for work were Midway/Coldstream (17.5%), Greenmount East (14.2%), and Madison/East End (13.9%). The CSAs with the **lowest** percentage of unemployed persons seeking work lived in South Baltimore (1.8%), Inner Harbor/Federal Hill (1.9%), and Fells Point (2.1%).

Not in the Labor Force

Between 2006–2010 and 2013–2017, the percentage of residents not in the labor force **increased** from 29.6% to 30.3%. The CSAs with **highest** percentage of residents not in the

labor force included Oldtown/Middle East (46.1%), Southern Park Heights (44.4%), and North Baltimore/Guilford/Homeland (43.7%). The CSAs with the **lowest** percentage were canton (10.3%), South Baltimore (11.5%) and Fells point (13.3%).

Unemployment Rate

Focusing only on the population in the labor force, the unemployment rate measures the share of jobless persons who are looking for work in Baltimore City. Between 2006–2010 and 2013–2017, the unemployment rate decreased by 15%, from 11.7% to 10.2%. The unemployment rate by CSA from 2012–2016 ranged from a low of 2.0% in South Baltimore to a **high** of 25.7% in Midway/Coldstream.

Jobs (From Vital Signs 16)

The Number of Total Jobs comes from the Longitudinal Employer- Household Dynamics (LEHD) database.⁷ Including this indicator enables the ability to track job creation year-over-year, giving us even more insight into the health of Baltimore City’s economy.

Total Number of Jobs (2015)

Between 2014 and 2015, the total number of jobs in Baltimore City increased from 344,588 to 350,797. The CSAs with the **highest** number of jobs were Downtown/Seton Hill (78,158), Oldtown/ Middle East (27,354), and Orangeville/ East Highlandtown (15,235). The CSAs with the **lowest** number of jobs were Edmondson Village (176), Dickeyville/Franklinton (212), and Madison/East End (429).

Regional Dynamics (From Vital Signs 16)

Vital Signs tracks the percentage of residents from each CSA who work outside the city using the Longitudinal

Employer-Household Dynamics (LEHD) data. Approximately 25% of all jobs in the metropolitan area are located in Baltimore City, which means that many Baltimore residents need access to some form of transportation to the 75% of jobs that are elsewhere in the region. At the time of this report’s publication, 2016 LEHD data had not yet been released. The data for 2015 are given below.

Residents Who Work Outside the City (2015)

Based on the 2015 LEHD, over half (53.5%) of Baltimore City’s residents commuted to work outside of the city. The CSAs with the **smallest** percentage of workers that commute outside of the city were Downtown/Seton Hill (40.7%), Harbor East/Little Italy (43.2%), and Midtown (43.5%) The CSAs where the **largest** percentage of workers commuted outside of the city to work were Brooklyn/

Data Key

- Green colored text denotes a positive change.
- Red colored text denotes a negative change.
- Blue colored text denotes a neutral change.

7. The latest available data on the number of jobs comes from the Longitudinal Employee-Household Dynamics (LEHD) U.S. Census Bureau which was updated in January 2018 to include 2015 data. www.onthemap.ces.census.gov

Curtis Bay/Hawkins Point (71.9%), Morrell Park/Violetville (69.3%), and Westport/Mount Winans/Lakeland (63.5%).

Educational Attainment

Educational training is generally the major pathway to employment. More than half of new jobs expected to be created in Baltimore between 2010 and 2020 will require educational training beyond a high school diploma.⁸ Education at the level of a bachelor’s degree or higher influences lifetime potential earnings⁹ and increases the likelihood that individuals will earn a living wage¹⁰ *Vital Signs 17* tracks three indicators on educational attainment for the multiple stages from high school through college education. These categories are mutually exclusive in that a survey respondent can only be in one category and the total of the three categories sums to 100%.

Less Than a High School Diploma or GED

Based on the 2013–2017 ACS, 15.8% of Baltimore residents over the age of 25 had not obtained a high school diploma. The CSAs with the **largest** percentage of residents without a high school diploma were Southwest Baltimore (33.0%), Orangeville/East Highlandtown (31.5), Midway/ Coldstream (31.1%), and Southeastern (30.6%). The CSAs with the **smallest** percentage were Greater Roland Park/Poplar Hill (1.0%), North Baltimore/Guilford/ Homeland (3.1%), and Canton (4.2%).

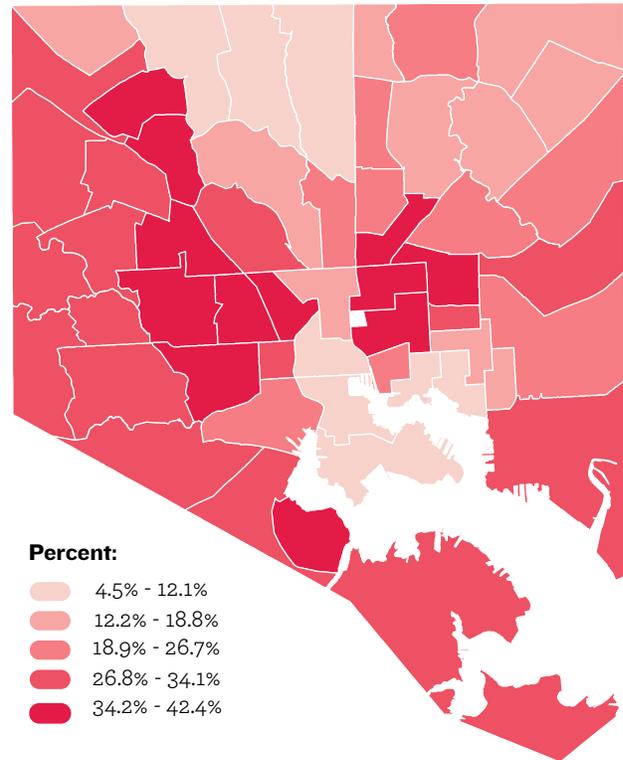

High School Diploma and Some College or Associate Degree

During the 2013–2017 time period, more than half (53.7%) of the city’s residents over the age of 25 obtained a high school diploma and/or completed some college or received an associate’s degree. The CSAs with the **largest** percentage of residents over the age of 25 with a high school degree, some college, or an associate degree were Edmondson Village (73.0%), Cherry Hill (71.6%), and Loch Raven (71.5%). The CSAs with the **smallest** percentage were Greater Roland Park/ Poplar Hill (17.1%), Fells Point (20.2%), and South Baltimore (20.9%).

Bachelor’s Degree or Above

During the 2013–2017 time period, 30.4% of the City’s residents over the age of 25 had a Bachelor’s degree, a Grad-

Percent of Households with No Internet at Home, 2013-2017

uate degree, or a Professional degree. The CSAs with the **highest** percentage of residents with a Bachelor’s degree or above were Greater Roland Park/Poplar Hill (81.9%), North Baltimore/Guilford/Homeland (73.7%), Fells Point (73.4%), and South Baltimore (70.6%). The CSAs with the **lowest** percentage of residents with college degrees were Sandtown-Winchester/Harlem Park (5.6%), Brooklyn/ Curtis Bay/Hawkins Point (8.4%), and Southwest Baltimore (8.7%).

Internet Access

Access to the internet is becoming increasingly important not just for communication, but as a critical means to obtain an education and conduct business.¹¹ More and more teachers assign homework that requires internet access and many job opportunities are only available online. However, access to the internet and digital resources is not equally distributed in all neighborhoods

No Internet At Home

During 2013-2017, 24.6% of households in Baltimore did not have access to the internet at home. The CSAs with the **highest** percentage of households with no internet were Greenmount East (42.4%), Pimlico/Arlington/Hilltop (40.9%), and Oldtown/Middle East (40.5%). The CSA's with the **lowest** percentage of households with no internet were Greater Roland Park/Poplar Hill (4.5%), South Baltimore (7.9%), and Canton (9.3%).

Commercial Investment Activity¹²

Commercial properties and establishments in neighborhoods are an important part of urban life for the jobs as well as the amenities they provide. Upkeep of commercial properties is an indicator of commercial investment and is equally important to owners of residential properties in the area as their respective values are mutually dependent.

Number of Commercial Properties

The number of commercial properties in Baltimore City was 15,322 in 2017. The CSAs with the **highest** number of commercial properties were Downtown/Seton Hill (1,181), Midtown (783), Brooklyn/Curtis Bay/Hawkins Point (757), and Southwest Baltimore (647). The CSA's with the **lowest** number of commercial properties were Cross-Country/Cheswolde (27), Dickeyville/ Franklinton (30), Edmondson Village (33), and Beechfield/Ten Hills/West Hills (45).

Rehabilitation Permits of over \$5,000

Between 2016 and 2017, the percentage of commercial properties that applied for and received a rehabilitation permit greater than \$5,000 **increased** significantly from 12.7% to 17.7%. In 2017, the CSAs with the **largest** percentage of commercial businesses with rehabilitation permits greater than \$5,000 were Loch Raven (63.5%) and South Baltimore (38.7%). The CSAs with the **smallest** percentage of commercial properties with a rehabilitation permit were Brooklyn/Curtis Bay/Hawkins Point (4.1%), The Waverlies (4.6%), and Southwest Baltimore (5.7%).

Business Size and Age¹³

The majority of businesses in the United States are small-to mid-size firms¹⁴. Aside from clusters of major business activity in the downtown or regional centers, most firms are located in Baltimore's neighborhoods. The ability to start and sustain a business is often related to the environment in the surrounding area that enables entrepreneurship and viability.

Total Number of Businesses

Overall in 2017, Baltimore City had 17,648 businesses. The CSAs with the **highest** number of businesses were Downtown/Seton Hill (2,619), Midtown (978) and Oldtown/Middle East (871). The CSAs with the **lowest** number of businesses were Dickeyville/Franklinton (36) and Edmondson Village (47).

Number of Businesses with Fewer than 50 Employees

In 2017, the number of small businesses (businesses reporting fewer than 50 employees) in Baltimore City was 16,141. Aside from Downtown/Seton Hill with 14.7% of the total, the CSAs with the **highest** number of small businesses were Midtown (874), and Oldtown/Middle East (815). The CSAs with the **lowest** number of small businesses were Dickeyville/ Franklinton (33), Edmondson Village (44), and Poppleton/The Terraces/Hollins Market (88).

Businesses One Year Old or Less

In 2017, 6.1% of businesses located in Baltimore City were less than one year old. The CSAs with the **highest** percentage of businesses less than one year old were located in Oldtown/Middle East (13.3%), Pimlico/Arlington/Hilltop (10.1%), and Mount Washington/Coldspring (9.6%). The CSAs with the **lowest** percent were Sandtown-Winchester/Harlem Park (2.0%), Greenmount East (2.0%), and Greater Rosemont (2.5%).

Businesses Two Years Old or Less

In 2017, the percentage of businesses located in Baltimore City that were less than two years old was 25.1%. The CSAs with the **highest** percentage of firms that were less than two years old were Oldtown/Middle East (52.0%), Mount Washington/Coldspring (33.7%), and Pimlico/Arlington/Hilltop (31.9%). The CSAs with the **lowest** percentage of firms that were less than two years old were Westport/Mount Winans/Lakeland (11.2%), Claremont/Armistead (11.4%), and Southern Park Heights (11.6%).

Businesses Four Years Old or Less

In 2017, the percentage of businesses located in Baltimore City that were less than four years old was 34.0%. The CSAs with the highest percentage of firms that were less than four years old were Oldtown/Middle East (59.0%), Edmondson Village (42.6%), and Mount Washington/Coldspring (41.6%). The CSAs with the lowest percentage of firms that

12. Due to InfoUSA's survey methodology, which consists of compiling a list of publicly-available phone numbers to conduct a sample phone survey, some businesses, such as those without landlines, are not represented. Additionally, firms with multiple branches may report total employment out of a single location, distorting employee counts by geography. For this reason, year-over-year comparisons of the data are not recommended.

13. US Small Business Administration. www.sba.org

were less than four years old were Claremount/Armistead (17.1%), Westport/Mount Winans/Lakeland (18.9), and Greenmount East (21.8).

Neighborhood Businesses

Access to neighborhood amenities helps attract and retain residents to an area, especially in an urban context. Neighborhood businesses for the following *Vital Signs 17* indicators include coffee shops, doctors' offices, grocery stores and retail shops.

Number of Neighborhood Businesses

The number of neighborhood businesses in Baltimore City in 2017 was 12,282. The greatest number of neighborhood businesses were located in the Downtown/Seton Hill (1,954), Oldtown/Middle East (754), and Midtown (654). The smallest number of neighborhood businesses were located in Dickeyville/Franklinton (23) and Edmondson Village (31).

Neighborhood Businesses per 1,000 Residents

In 2017, there were 19.8 neighborhood businesses per 1,000 residents in Baltimore City. The CSAs with the largest number of neighborhood businesses per 1,000 residents included Downtown/Seton Hill (303.1 per 1,000 residents), Oldtown/Middle East (75.2 per 1,000 residents), Harbor East/Little Italy (56.4 per 1,000 residents), and Midtown (43.5 per 1,000 residents). The CSAs with the smallest number of neighborhood businesses per 1,000 residents included Edmondson Village (3.9 per 1,000 residents), Northwood (5.2 per 1,000 residents), and Dickeyville/Franklinton (5.6 per 1,000 residents).

Employees of Neighborhood Businesses

The number of persons employed in neighborhood businesses in Baltimore City during 2017 was 203,593. The CSAs with the largest number of employees in neighborhood businesses included Downtown/Seton Hill (60,141), Harbor East/Little Italy (21,226), and South Baltimore

(17,898). The CSAs with the fewest number of employees in neighborhood businesses included Edmondson Village (160), Penn North/Reservoir Hill (334), and Patterson Park North & East (393).

Banking and Investment

In 2008, the Baltimore Neighborhood Drilldown Study showed that many of the city's neighborhoods were "underbanked," which means that many residents did not have access to traditional financial institutions in their neighborhoods. Without access, saving money or obtaining a credit record is often difficult.

Total Dollar Amount Invested in Small Businesses

Based on research by the 21st Century Cities Initiative at Johns Hopkins University, the flow of commercial loans, microloans, venture capital and other equity investments can help better understand whether the financing system catering to Baltimore's small businesses in all neighborhoods.¹⁴ Between 2016 and 2017, the total dollar amount invested in small businesses per 50 businesses increased from \$1.52 million to \$1.79 million. In 2017, the CSAs with the greatest amount invested in small businesses per 50 businesses were Harbor East/Little Italy (\$14.1 million) and South Baltimore (\$11.1 million). The CSAs with the least amount invested in small businesses per 50 businesses were Madison/East End (\$0.14 million) and Pimlico/Arlington/Hilltop (\$0.15 million).

Number of Bank Branches¹⁵

The number of banks and bank branches has remained consistent in Baltimore since 2010. In 2017, there were .20 banks and bank branches per 1,000 residents in Baltimore City. The greatest number of banks and bank branches per 1,000 residents were located in Downtown/Seton Hill (3.3), Harbor East/Little Italy (0.9), Southeastern (0.8), Highlandtown (0.7), and Greater Roland Park/Poplar Hill (0.7). In 2017, there were 18 CSAs that had no banks or bank branches located within the CSA.

Workforce and Economic Development

Indicator Definitions and Rankings

Workforce and Economic Development Indicator Definitions and Rankings

For each indicator reported in *Vital Signs 17*, we provide the data source, the years for which it is reported, and the five CSAs with the highest and lowest values for the indicator; these may not correspond to positive or negative trends.

Labor Force Participation & Employment

Percent of Population (Ages 16-64) Employed

Measure of persons working and earning an income.

Definition: The number of persons between the ages of 16 and 64 formally employed or self-employed and earning a formal income. It is used to understand how many persons are working out of the entire population, not just those in the labor force (persons who may be looking for work or working). (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Canton
2. South Baltimore
3. Fells Point
4. Highlandtown
5. Inner Harbor/
Federal Hill

Five Lowest:

Park/Poplar Hill
2. South Baltimore
3. Canton
4. Inner Harbor/
Federal Hill
5. North Baltimore/
Guilford/Homeland

Percent of Population (Ages 16-64) Unemployed and Looking for Work

Measure of persons who are not working.

Definition: The number of persons between the ages of 16 and 64 not working out of all persons, not just those in the labor force (persons who may be looking for work). These persons are seeking work that pays a formal income. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Midway/Coldstream
2. Greenmount East
3. Madison/East End
4. Clifton-Berea
5. Southern Park Heights

Five Lowest:

1. South Baltimore
2. Inner Harbor/
Federal Hill
3. Fells Point
4. Canton
5. Greater Roland
Park/Poplar Hill

Percent of Population (Ages 16-64) Not in the Labor Force

Measure of persons not working and not seeking work.

Definition: The number of persons who are not in the labor force out of all persons between the ages of 16 and 64 in the area. There are several reasons why persons may not be included in the labor force. These reasons may include: they are caretakers for children or other family members; they attend school or job training; they may have a disability; and they are discouraged or frustrated and have given up seeking a job or have a history that may include criminal activity. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Oldtown/Middle East
2. Southern Park Heights
3. North Baltimore/
Guilford/Homeland

2. South Baltimore
3. Canton
4. Inner Harbor/Federal Hill
5. North Baltimore/Guilford/Homeland

Educational Attainment of the Labor Force

Percent Population (25 years and over) With Less Than a High School Diploma or GED

Measures the number of persons with little formal education and training.

Definition: The percentage of persons that have not completed, graduated, or received a high school diploma or GED. This is a standard indicator used to measure the portion of the population with less than a basic level of skills needed for the workplace. Persons under the age of 25 are not included in this analysis since many of these persons are still attending various levels of schooling. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Southwest Baltimore
2. Orangeville/East Highlandtown
3. Midway/Coldstream
4. Southeastern
5. Oldtown/Middle East

Five Lowest:

Percent of Businesses that are Four Years Old or Less

Measures young businesses.

Definition: The percentage of businesses (both for-profit and non-profit) that report their establishment as being four years old or less. The age of the business is determined by the year that the first year they appeared in the business database. A business that has been in operation more than four years has a greater likelihood of remaining open for a longer period of time. (SOURCE: INFOUSA, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017)

Five Highest:

1. Oldtown/Middle East
2. Edmondson Village
3. Mount Washington/
Coldspring
4. Pimlico/Arlington/
Hilltop
5. Loch Raven

Five Lowest:

1. Claremont/Armistead
2. Westport/Mount
Winans/Lakeland
3. Greenmount East
4. Penn North/
Reservoir Hill
5. Belair-Edison

Neighborhood Businesses

Total Number of Businesses with Fewer than 50 Employees

Measures the number of small businesses in an area.

Definition: The total number of businesses (both for-profit and non-profit) that report having less than 50 persons employed within an area at a single time in a year. (SOURCE: INFOUSA, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017)

Five Highest:

1. Downtown/Seton Hill
2. Midtown
3. Oldtown/Middle East
4. Medfield/Hampden/
Woodberry/Remington
5. Greater Charles
Village/Barclay

Five Lowest:

1. Dickeyville/
Franklinton
2. Edmonson Village
3. Poppleton/The
Terraces/ Hollins
Market
4. Greenmount East
5. Clifton-Berea

Number of Neighborhood Businesses per 1,000 Residents

Measures the concentration of businesses that serve local residents.

Definition: The number of businesses (both for-profit and non-profit) that provide products and services to local residents per 1,000 . The industries included in this indicator are: Retail Trade (NAICS 44-45); Finance and Insurance (NAICS 52); Professional, Scientific, and Technical Services (NAICS 54); Health Care and Social Assistance (NAICS 62); Arts, Entertainment, and Recreation (NAICS 71); Accommodation and Food Services (NAICS 72); and Other Services except Public Administration (NAICS 81). The primary industry reported by each business was used to determine their inclusion. (SOURCE: INFOUSA, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017; US CENSUS, 2010)

Five Highest:

1. Downtown/Seton Hill
2. Oldtown/Middle East
3. Harbor East/Little Italy
4. Midtown
5. Inner Harbor/
Federal Hill

Five Lowest:

1. Edmondson Village
2. Northwood
3. Dickeyville/
Franklinton
4. Beechfield/Ten
Hills/West Hills
5. Patterson Park
North & East

Number of Neighborhood Businesses

Measures businesses that serve local residents.

Definition: The number of businesses (both for-profit and non-profit) that provide products and services to local residents. The industries included in this indicator are: Retail Trade (NAICS 44-45); Finance and Insurance (NAICS 52); Professional, Scientific, and Technical Services (NAICS 54); Health Care and Social Assistance (NAICS 62); Arts, Entertainment, and Recreation (NAICS 71); Accommodation and Food Services (NAICS 72); and Other Services except Public Administration (NAICS 81). The primary industry reported by each business was used to determine their inclusion. (SOURCE: INFOUSA, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017)

North & East
4. Greenmount East
5. Forest Park/Walbrook

Banking and Investment

Number of Banks and Bank Branches per 1,000 Residents

Measures the ability of businesses and residents to access credit and financial services.

Definition: The number of banks and bank branches per 1,000 residents within an area. (SOURCE: FEDERAL DEPOSIT INSURANCE CORPORATION (FDIC), 2011, 2012, 2013, 2014, 2015, 2016, 2017; CENSUS, 2010)

Five Highest:

1. Downtown/Seton Hill
2. Harbor East/Little Italy
3. Southeastern
4. Greater Roland Park/Poplar Hill
5. South Baltimore

Five Lowest:

Eighteen CSAs have no banks/bank branches per 1,000 residents.

Total Dollar Amount Invested in Small Businesses per 50 Businesses

Measures the dollar amount that small business have been able to access in an area.

The total dollar amount invested in businesses with fewer than 500 employees per 50 businesses based on compiled small business lending data from various sources. (SOURCE: FFIEC INSURED BANK LOANS UNDER \$1 MILLION TO BUSINESSES MADE BY LARGE BANKS; VENTURE CAPITAL INVESTMENTS; US EXPORT-IMPORT BANK LOANS; SMALL BUSINESS INNOVATION RESEARCH (SBIR) AND SMALL BUSINESS TECHNOLOGY TRANSFER RESEARCH (STTR) GRANTS; GOVERNMENT, PHILANTHROPIC, AND INSTITUTIONAL GRANTS SUPPORTING SMALL BUSINESSES; MARYLAND DEPARTMENT OF COMMERCE LOANS; STATE OF MARYLAND NEIGHBORHOOD BUSINESSWORKS LOANS; BALTIMORE DEVELOPMENT CORPORATION LOANS; AND SMALL BUSINESS ADMINISTRATION 7A AND 504 LOANS; ANALYSIS BY: JOHNS HOPKINS UNIVERSITY, 21ST CENTURY CITIES INITIATIVE, 2016, 2017)

Five Highest:

1. Harbor East/Little Italy
2. South Baltimore
3. The Waverlies
4. Inner Harbor/Federal Hill
5. Mt. Washington/Coldspring

Five Lowest:

1. Madison/East End
2. Pimlico/Arlington/Hilltop
3. Upton/Druid Heights
4. Greater Govans
5. Forest Park/Walbrook

Education and Youth

One of the most important assets within a community is the neighborhood school. Whether residents in the surrounding area have children that attend or not, the quality of education inside the school impacts the quality of life outside. Unfortunately, the quality of schools varies greatly across Maryland's counties and by neighborhood which by definition cannot provide equal opportunity to public education for everyone. Much of the variation can be attributed to the wide gaps in local resources that support public schools. The ability of a local jurisdiction like Baltimore City or any of the other 23 counties in Maryland to fund schools is dependent on local revenue streams as well as state funding to eliminate inequalities across school districts. In 2016, the Maryland General Assembly created the Commission on Innovation and Excellence in Education (generally referred to as the Kirwan Commission, named for the Chair of the Commission, William "Brit" Kirwan, Chancellor Emeritus of the University System of Maryland) to determine the formula for school funding across Maryland for the next decade.¹

Given that Baltimore City is one of the largest school districts in the state and together with Prince George's and Caroline counties serves more than half of the state's students of color, several advocacy organizations² compelled the Kirwan Commission to ensure racial equity be an integral component of the formula. After more than 2 years, in 2019 the commission released an interim report recommending more than \$3.8 billion of additional spending as well as measures such as greater teacher diversity and adoption of restorative practices to specifically address structural racism that perpetuates racial achievement gaps.³

The *Vital Signs* report provides more detailed and localized ways to examine the relationship between racial and spatial disparities across neighborhoods in Baltimore City. Given the continuing overall decline in student enrollment in the Baltimore City Public School System (BCPSS), and often particularly acute within some neighborhoods, many communities are grappling with the devastating impact of school closures. In January 2019,

three more schools have been recommended for closure in the next school year, and students will be absorbed into neighboring schools or schools with excess capacity.⁴ While school-closures due to low-enrollment and/or low-performance are based on fiscal and educational requirements, communities and students suffer the consequences of their changing landscapes.

With the simultaneous growth of school choice and public charter school options in Baltimore,⁵ the concept of the neighborhood school may be more socially constructed than physically defined.⁶ School-based reporting systems, such as the Maryland Report Card, resonate with parents and educators connected with the school, but less so with community members who may have an unclear connection to any given school. The Vital Signs indicators on educational outcomes provide aggregated student information based on where the students live⁷ so that residents understand the school-based context for the children in their neighborhood and serve as a complement to data reported by the school.

 6. Martin Austermule. "The End of the Neighborhood School" *The Atlantic Cities*. February 19, 2013.
 7. Per an established data sharing Memorandum of Understanding with the Baltimore City Public Schools, BNIA-JFI aggregates student-level data to a larger geographic level to ensure student confidentiality.

Vital Signs 17 includes indicators for all Community Statistical Areas (CSAs) designed to track the educational outcomes for public school children and youth. These indicators are grouped into the following categories: student enrollment, demographics, attendance, performance, drop-out and completion, and youth engagement.

Data

Data for *Vital Signs 17* educational indicators are provided by BCPSS as well as the 2013-2017 American Community Survey (ACS). The data provided by the BCPSS include student address so that aggregated data on educational performance are presented by the neighborhood in which the student lives, not by the school attended.

To ensure consistent communication of these data to communities, analysis of education-related indicators has been more closely coordinated with BCPSS. However, each one of the Education and Youth indicators may not be directly comparable to data provided by BCPSS primarily due to methodological adjustments needed to create community-based indicators. For example, students who cannot be matched between data files provided by BCPSS and/or students whose home address cannot be geocoded were excluded from the analysis. In the 2016-2017 school year, 3.8% of the attending students could not be matched to addresses or geocoded. This means that these students were not included in either the community calculations or for the city as a whole. Therefore, direct comparisons to data and results available through the Baltimore City Public Schools and the Maryland Report Card cannot be made.⁸

Indicators are created by normalizing data by the number of children that ever attended a Baltimore City public-school during the school year in a given area to allow for comparisons across neighborhoods and over time.⁹

Data Key

Green colored text denotes a positive change.

Red colored text denotes a negative change.

Blue colored text denotes a neutral change.

Student Officially Enrolled and Ever Attended

The school system measures enrollment as a census of students that are registered for school as of September 30 in every school year. This official enrollment serves as the basis for many school-based resources including per pupil funding for each school.

Students Officially Enrolled

In the 2016-2017 school year, there were a total of 68,541 students officially enrolled in 1st through 12th grades in Baltimore City Public Schools. Of the total number of students enrolled, 46.6% were enrolled in elementary grades, 23.7% were enrolled in middle school grades, and 29.7% were enrolled in high school grades.

Elementary School

From 2015-2016 to 2016-2017, the total number of elementary school students enrolled in public school **decreased** from 33,300 to 31,942. In the 2016-2017 school year, the **largest** number of elementary students enrolled in public school lived in Cedonia/Frankford (1,487) and the **lowest** number of students lived in Canton (94).

Middle School

From 2015-2016 to 2016-2017, the total number of middle school students enrolled in public school **decreased** from 16,806 to 16,246. In the 2016-2017 school year, the **largest** number of middle school students enrolled in public school lived in Cedonia/Frankford (783) and the **lowest** number of students lived in Canton (34).

High School

From 2015-2016 to 2016-2017, the total number of high school students enrolled in public school **decreased** from 21,404 to 20,353. In the 2016-2017 school year, the **largest** number of high school students enrolled in public school lived in Cedonia/Frankford (1,054) and the **lowest** number of students lived in Canton (18).

Students Ever Attended

Vital Signs 17 also reports students who ever attended¹⁰ the school system at any point in the school year, which is a larger figure than the students who were officially enrolled on September 30. Education indicators throughout this section of the report are normalized using the number of

8. For citywide educational data and indicators of student demographics, assessments, and graduation, visit the Maryland Report Card <http://www.mdreportcard.org/>

9. Indicators reported from one school year to the next do not reflect a “cohort” of students but rather a cross-section. For example, 3rd graders in 2016-2017 may or may not be the same students as 4th graders in 2016-2017.

10. The previous indicator Ever Enrolled has been renamed Ever Attended beginning in *Vital Signs 12* to better reflect its definition. The methodology for the newly-named indicator is the same and measures across years are comparable.

Education and Youth

students ever attended. Students who have ever attended represent all the children within the neighborhood who are engaged with the school system and better reflects the level of access to the school system overall. There were a total of 71,432 students who ever attended a Baltimore City public school at any point during the 2016-2017 school year for grades 1-12.

Elementary School

From 2015-2016 to 2016-2017, the total number of students who ever attended in 1st-5th grade **decreased** by -2.8% from 33,410 to 33,461. Over the past two school years, the CSAs that experienced the greatest percentage **increase** in total number of elementary students ever attended in a public school were Edmondson Village (+17.8%), Cedonia/Frankford (+14.5) and Downtown/Seton Hill (+13.6%). The CSA with the greatest percentage **decrease** in total number of students ever attended was Washington Village/Pigtown (-19.4%).

Middle School

From 2015-2016 to 2016-2017, the total number of students that ever attended in 6th-8th grade **decreased** by 2.3% from 17,262 to 16,864. Over the past two school years, the CSAs that experienced the greatest percentage **increase** in total number of middle school students ever attended in a public school were Poppleton/The Terraces/Hollins Market (+37.8%) and Inner Harbor/Federal Hill (+16.9%). The CSA with the greatest **decrease** in total number of students attending was South Baltimore (-18.2%).

High School

From 2015-2016 to 2016-2017, the total number of students ever attended in 9th-12th grade **decreased** by 3.1% from 21,785 to 21,107. Over the past two school years, the CSAs that experienced the greatest percentage **increase** in total number of high school students ever attended in a public school were Greater Govans (+14.8%) and North Baltimore/Guilford/Homeland (+12.3%). The CSA with the greatest **decrease** in total number of students ever attended in high school was Canton (-31.0%).

Student Demographics

The demographic makeup of the public school system in Baltimore is disproportionately African-American. The city as a whole is 62.3% African-American (see *Vital Signs 17 Census Demographics*), yet during the 2016-2017 school year, 80.8% of the students ever attended in a Baltimore City public school were African-American.

Black/African-American Students

The percent of African-American non-Hispanic students ever attended **decreased** by 1.3% percentage points between the school years ending in 2016 and 2017. During

the 2016-2017 school year, the CSAs with the **highest** percent of African-American students were Greater Mondawmin (98.9%) and Greater Rosemont (97.9%). The CSAs with the **lowest** percent of African-American students were South Baltimore (8.4%) and Highlandtown (13.1%).

White Students

The percent of white non-Hispanic students ever attended **remained** steady at 7.9% between the school years ending in 2016 and 2017. During the 2016-2017 school year, the CSAs with the **highest** percent of white students were South Baltimore (88.4%) and Greater Roland Park/Poplar Hill (65.1%). The CSAs with the **lowest** percent of white students were Greater Mondawmin (0.3%) and Howard Park/West Arlington (0.5%).

Hispanic Students

The percent of Hispanic students ever attended **increased** from 8.4% to 9.7% between the school years ending in 2016 and 2017. During the 2016-2017 school year, the CSAs with the **highest** percent of Hispanic students were Orangeville/East Highlandtown (72.1%) and Highlandtown (67.1%). The CSAs with the **lowest** percent of Hispanic students were Greater Mondawmin (0.7%) and Greater Rosemont (1.3%).

Student Attendance

One of the most important factors for ensuring student success is having consistent and routine attendance. Ensuring students arrive to school on time, everyday has become a major focus for Baltimore City agencies, school system, and other multi-sector stakeholders. In general, over the past several years, elementary and middle school chronic absenteeism (missing at least 20 days) has is much lower than high school chronic absenteeism.

Elementary School Absenteeism

The percentage of elementary school students in 1st through 5th grades that were chronically absent **increased** from 15.3% to 17.9% between the school years ending in 2016 and 2017. During the 2016-2017 school year, Cherry Hill (30.9%) and Poppleton/The Terraces/Hollins Market (30.3%) had the **highest** percentages of chronically absent elementary school students.

Middle School Absenteeism

The percentage of middle school students that were chronically absent **increased** slightly from 17.3% to 20.5% between the school years ending in 2016 and 2017. During the 2016-2017 school year, the CSAs with the **highest** percentage of chronically absent middle school students was Clifton-Berea (31.8%) and Southwest Baltimore (30.9%).

High School Absenteeism

The percentage of high school students that were chronically absent **increased** substantially from 37.2% to 52.1% between the school years ending in 2016 and 2017.⁷ During the 2016-2017 school year, Cherry Hill (66.6%) had the **highest** percentage of chronically absent high school students followed by Upton/Druid Heights (65.0%).

Kindergarten Readiness

Although Maryland has been assessing kindergarten readiness for many years, beginning in the 2015-2016 school year, local school systems began to use the Kindergarten Readiness Assessment (KRA) tool to measure children's readiness to do kindergarten work. The KRA is a developmentally appropriate assessment tool that measures the school readiness of incoming public-school kindergarteners across four learning domains. Administered by kindergarten teachers at the start of each school year, the KRA looks at the knowledge, skills, and behaviors necessary to be successful in kindergarten. Kindergarten teachers use this information to better understand the needs of their students and align classroom instruction.

A child is considered to be ready for kindergarten if assessed as "demonstrating" the foundational skills and behaviors that prepare him/her for curriculum based the kindergarten standards. Due to the inability to match or geocode 0.5% of the student addresses in the KRA data, a small number of students were not included in this indicator calculation. Therefore, the overall reported figures may differ slightly from those reported by BCPSS.

Kindergarten Readiness¹²

During the 2016-2017 school year, the percentage of kindergarten students in Baltimore City considered "demonstrating" readiness was 38.0%. The **highest** percentages were in South Baltimore (70.6%) and Greater Roland Park/Poplar Hill (68.3%).

Student Performance (Elementary, Middle, and High School)

The Baltimore City Public School System administers the Partnership for Assessment of Readiness for College and Careers (PARCC) measurement system to align with adoption of the common core curriculum. This test supersedes the previously administered Maryland State Assessment (MSA) until 2014. Student scores are classified into one of five performance levels: exceeded expectations, met expectations, approached expectations, partially met expectation, or did not meet expectations. The first two levels have been identified as being "on track for the next grade level." *Vital Signs 17* tracks the percentage 3rd, 5th, and 8th graders who score met or exceeded expectations in reading and math on the PARCC tests.⁸ These indicators are normalized by the total number of students who ever attended for each of those grades. Due to the inability to match or geocode 3.8% of the student addresses in the PARCC data, a small number of students were not included in the student achievement analysis. Therefore, the following numbers do not include all Baltimore Public School students and differ slightly from BCPSS reported figures

3rd Grade Achievement

From 2015-2016 to 2016-2017, the percent of students who scored Advanced/Proficient on the math PARCC exam **increased** from 18.7% to 19.4%. The scores ranged from the **highest** rates in Greater Roland Park/Poplar Hill (82.1%) to the **lowest** rates in Downtown/Seton Hill (4.6%). From 2015-2016 to 2016-2017, the percent of students who scored Advanced/Proficient on the reading PARCC exam **increased** from 11.6% to 13.4%. The scores ranged from the **highest** rates in Greater Roland Park/Poplar Hill (69.2%) to the **lowest** rates in Harbor East/Little Italy (4.3%).

5th Grade Achievement

From 2015-2016 to 2016-2017, the percent of students who scored Advanced/Proficient on the math PARCC exam **increased** from 13.0% to 14.8%. The scores ranged from the highest rates in Greater Roland Park/Poplar Hill (71.4%) to the **lowest** rates in Cherry Hill (3.6%).

11. The Maryland Report Card also reported a dramatic decrease in high school attendance between 2016 and 2017. For more details on this issue, see Baltimore Sun (June 2018) "Nearly 1 in 5 Maryland students is chronically absent. At some schools, the rate is more than 75 percent" <https://www.baltimoresun.com/education/bs-md-chronic-absenteeism-20180604-story.html>
12. In previous school years, the KRA was administered in September and October to all kindergarten students. However, at the beginning of the 2016-2017 school year, the assessment window was reduced by half to meet a state requirement that the assessment be complete by September 30. This resulted in less time for kindergarten students to acclimate to their classroom environment, which may have affected overall results. Because of this change in the assessment procedure, the Maryland Department of Education has chosen not to compare this year's KRA results with those of the previous year. Similarly, City Schools does not recommend such a comparison of results.
13. During the 2013-2014 school year, Baltimore City Public School students were transitioning to common core standards. Beginning the 2015-2016 school year, the students were officially assessed for the first time using the PARCC measurement system to align with adoption of the common core curriculum. <http://www.baltimorecityschools.org/parcc> for more information.

From 2015-2016 to 2016-2017, the percent of students who scored Advanced/Proficient on the reading PARCC exam **increased** from 11.5% to 13.8%. The scores ranged from the **highest** rates in Greater Roland Park/Poplar Hill (77.3%) to the **lowest** rates in Cherry Hill (3.9%).

8th Grade Achievement

From 2015-2016 to 2016-2017, the percent of students who scored Advanced/Proficient on the math PARCC exam **decreased** from 5.9% to 4.8%. The scores ranged from the highest rates in Greater Roland Park/Poplar Hill (25.0%) to the **lowest** rates in Canton, Harbor East/Little Italy, and Highlandtown (0.0%).

From 2015-2016 to 2016-2017, the percent of students who scored Advanced/Proficient on the reading PARCC exam **decreased** from 14.0% to 13.8%. The scores ranged from the highest rates in Greater Roland Park/Poplar Hill (77.3%) to the **lowest** rates in Cherry Hill (3.9%).

Student Withdrawals, Completion, and Mobility

The Baltimore City School System and numerous other partners, including city government, foundations, and nonprofits continue to focus their efforts on reducing school withdrawals and increasing high school completion. School switching within the same school year has been shown to negatively impact a child's behavioral and academic development *Vital Signs 17* tracks the withdrawal rate of students (9th through 12th grade), the high school completion rate (for 12th graders only)¹⁴ and the percentage of all students switching schools within the same school year.

High School Dropout/Withdrawal Rate

The percentage of students that withdrew from Baltimore City public schools **increased** from 3.0% to 3.7% between school years ending in 2016 and 2017. The percentage of students that withdrew before completion in 2017 ranged from a **high** of 9.5% in Canton and Cross-Country/Cheswolde to a **low** of 0.6% in Harford/Echodale.

High School Completion

Baltimore City's high school completion rate for 12th graders **decreased** from 78.4% to 77.3% between school years ending in 2016 and 2017. The CSAs with the **highest** overall completion rates were North Baltimore/

Guilford/Homeland (94.9%) and Downtown/Seton Hill (93.8%). The CSAs with the **lowest** completion rates were Canton (50.0%) and Southeastern (66.0%).

School Switching (From *Vital Signs 16*)

The percentage of all students switching schools within the same school year **increased** from 7.2% to 7.6% between school years ending in 2015 and 2016. The CSAs with the **highest** percentage of students switching were Brooklyn/Curtis Bay/Hawkins Point (10.6%), Poppleton/The Terraces/Hollins Market (10.4%), and Downtown/Seton Hill (10.1%). The CSAs with the **lowest** percentage were Greater Roland Park/Poplar Hill (3.6%), Canton (4.0%), and North Baltimore/Guilford/Homeland (4.4%).

Youth Engagement

Vital Signs 17 measures youth engagement by reporting the percent of 16-19 year-olds who are in school and/or working. Based on the 2013-2017 American Community Survey, 87.3% of the persons aged 16-19 were either in school and/or employed, which is a slight **increase** from 86.0% during 2006-2010.

16-19 Year-Olds in School and/or Working

From 2013 - 2017, five CSAs had **100%** of persons aged 16 - 19 either in school and/or employed: Canton, Greater Roland Park/Poplar Hill, Highlandtown, Inner Harbor/Federal Hill, and Midtown. The CSAs with the **fewest** persons aged 16-19 either in school and/or employed were Claremont/Armistead (68.4%) and Greater Rosemont (69.5%). Greater Roland Park/Poplar Hill (3.6%), Canton (4.0%), and North Baltimore/Guilford/Homeland (4.4%).

Youth Engagement

Vital Signs 17 measures youth engagement by reporting the percent of 16-19 year-olds who are in school and/or working. Based on the 2013-2017 American Community Survey, 87.3% of the persons aged 16-19 were either in school and/or employed, which is a slight **increase** from 86.0% during 2006-2010.

16-19 Year-Olds in School and/or Working

From 2013 - 2017, five CSAs had **100%** of persons aged 16 - 19 either in school and/or employed: Canton, Greater Roland Park/Poplar Hill, Highlandtown, Inner Harbor/Federal Hill, and Midtown. The CSAs with the **fewest** persons aged 16-19 either in school and/or employed were Claremont/Armistead (68.4%) and Greater Rosemont (69.5%).

14. The completion rate used for Vital Signs is the percentage of 12th graders that complete high school out of all 12th graders enrolled at any time during that school year. The Maryland state department of education and Baltimore city public schools calculations for completion rate of high school students are based on a cohort spanning the 4-year high school period. Indicator Definitions and Rankings

For each indicator reported in Vital Signs 17, we provide the data source, the years for which it is reported, and the five CSAs with the highest and lowest values for the indicator these may not correspond to positive or negative trends.

Student Enrollment

Number of Students

Officially Enrolled in 1st - 5th Grade

Measure of officially enrolled elementary school students.

Definition: The number of children who have registered for and attend 1st through 5th grade at a Baltimore City Public School as of September 30th . This count only includes students enrolled in public schools .(SOURCE: BALTIMORE CITY PUBLIC SCHOOLS, 2009-2010, 2010-2011, 2011-2012,2012-2013, 2013-2014, 2014-2015, 2015-2016, 2016-2017)

Five Highest:

1. Cedonia/Frankford
2. Greater Rosemont
3. Southwest Baltimore
4. Brooklyn/Curtis Bay/ Hawkins Point
5. Belair-Edison

Five Lowest:

1. Canton
2. Downtown/Seton Hill
3. Fells Point
4. South Baltimore
5. Midtown

Number of Students

Ever Attended 1st - 5th Grade

Measure of elementary school students attending at any point in the school year .

Definition: The number of children who have registered for and attend 1st through 5th grade at a Baltimore City Public School at any point during the school year . (SOURCE: BALTIMORE CITY PUBLIC SCHOOLS, 2009-2010, 2010-2011, 2011-2012, 2012-2013, 2013-2014, 2014-2015, 2015-2016)

Five Highest:

1. Cedonia/Frankford
2. Greater Rosemont
3. Brooklyn/Curtis Bay/ Hawkins Point
4. Southwest Baltimore
5. Belair-Edison

Five Lowest:

1. Canton
2. Downtown/Seton Hill
3. Fells Point
4. South Baltimore
5. Midtown

Number of Students

Ever Attended 6th - 8th Grade

Measure of officially enrolled middle school students.

Definition: The number of children who have registered for and attend 6th through 8th grade at a Baltimore City Public School as of September 30th. This count only includes students enrolled in public schools . (SOURCE: BALTIMORE CITY PUBLIC SCHOOLS, 2009-2010, 2010-2011, 2011-2012, 2012-2013, 2013-2014, 2014-2015, 2015-2016, 2016-2017)

Five Highest:

1. Cedonia/Frankford
2. Greater Rosemont
3. Belair-Edison
4. Southwest Baltimore
5. Allendale/ Irvington/S. Hilton

Five Lowest:

1. Canton
2. South Baltimore
3. Downtown/Seton Hill
4. Inner Harbor/ Federal Hill
5. Fells Point

Number of Students

Officially Enrolled in 6th - 8th Grade

Measure of middle school students attending at any point in the school year .

Definition: The number of children who have registered for and attend 6th through 8th grade at a Baltimore City Public School at any point in the school year . (SOURCE: BALTIMORE CITY PUBLIC SCHOOLS, 2009-2010, 2010-2011, 2011-2012, 2012-2013, 2013-2014, 2014-2015, 2015-2016, 2016-2017)

Student Dropout, Completion, and mobility

High School Dropout/Withdrawal Rate

Measure of students that withdrew from High School in a school year .

Definition: The percentage of 9th through 12th graders who withdraw from public school out of all high school students in a school year . Withdraw codes are used as a proxy for dropping out of school based upon the expectation that withdrawn students are no longer receiving educational services . A dropout is defined as a student who, for any reason other than death, leaves school before graduation or the completion of a Maryland-approved education program and is not known to enroll in another school or State-approved program during a current school year .(SOURCE: BALTIMORE CITY PUBLIC SCHOOLS, 2009- 2010, 2010-2011, 2011-2012, 2012-2013, 2013-2014, 2014-2015, 2015-2016, 2016-2017)

Five Highest:

1. Canton, Cross-Country/Cheswolde
2. Madison/East End
3. Highlandtown
4. Inner Harbor/Federal Hill
5. Brooklyn/Curtis Bay/Hawkins Point

Five Lowest:

1. Harford/Echodale
2. Greater Roland Park/Poplar Hill
3. Loch Raven
4. Dickeyville/Franklinton
5. Downtown/Seton Hill, Midtown

High School Completion Rate

Measure of students who successfully complete High School .

Definition: The percentage of 12th graders in a school year that successfully completed high school out of all 12th graders within an area . Completers are identified as completing their program of study at the high school level and satisfying the graduation requirements for a Maryland High School Diploma or the requirements for a Maryland Certificate of Program Completion . (SOURCE: BALTIMORE CITY PUBLIC SCHOOLS, 2009-2010, 2010-2011, 2011-2012, 2012-2013, 2013-2014, 2014-2015, 2015-2016, 2016-2017)

Five Highest:

1. North Baltimore/Guilford/Homeland
2. Downtown/Seton Hill
3. Medfield/Hampden/Woodberry/Remington
4. Dickeyville/Franklinton
5. Fells Point

Five Lowest:

1. Canton
2. Southeastern
3. Beechfield/Ten Hills/West Hills
4. Oldtown/Middle East
5. Howard Park/West Arlington

Percent of Students Switching Schools within School Year (From Vital Signs I6)

Measure of student mobility in a school year.

Definition: The percentage of 1st through 12th graders who change schools out of all students in a school year. Students must have attended both schools for which they were registered for at least one day. Additionally, this indicator only identifies the share of students that change schools for any reasons and not the frequency, number of school switches, or change in residences in a school year. The percentage reflects the last home address available for the student who changed schools. This may or may not be the home address provided for the first school that they are registered to attend. (SOURCE: BALTIMORE CITY PUBLIC SCHOOLS, 2009-2010, 2010-2011, 2011-2012, 2012-2013, 2013-2014, 2014-2015, 2015-2016)

Five Highest:

1. Brooklyn/Curtis Bay/Hawkins Point
2. Poppleton/The Terraces/Hollins Market
3. Downtown/Seton Hill
4. Midtown
5. Southwest Baltimore

Five Lowest:

1. Greater Roland Park/Poplar Hill
2. Canton
3. North Baltimore/Guilford/Homeland
4. Mount Washington/Coldspring
5. South Baltimore

Student Performance

Kindergarten Readiness Assessment

Measures of children entering kindergarten who are assessed as “ready to learn.”

Definition: The Kindergarten Readiness Assessment (KRA) measure children’s readiness to do kindergarten work . The KRA is a developmentally appropriate assessment tool that measures of incoming public-school kindergarteners across four learning domains . A child is considered to be ready for kindergarten if assessed as “demonstrating” the foundational skills and behaviors that prepare him/her for curriculum based on the kindergarten standards.(SOURCE: BALTIMORE CITY PUBLIC SCHOOLS, 2015-2016, 2016-2017)

Education and Youth

Percentage of 3rd Grade Students who met or exceeded PARCC Math

Measures the achievement and progress of students in public school.

The Baltimore City Public School System administers the Partnership for Assessment of Readiness for College and Careers (PARCC) measurement system to align with adoption of the common core curriculum. This test supersedes the previously administered Maryland State Assessment. Student scores are classified into one of five performance levels: exceeded expectations, met expectations, approached expectations, partially met expectation, or did not meet expectations. The first two levels have been identified as being “on track for the next grade level.” (SOURCE: BALTIMORE CITY PUBLIC SCHOOLS, 2014-2015, 2015-2016, 2016-2017)

FOUNDATION

T. ROWE PRICE FOUNDATION, INC.

arts and culture as well as a breakdown of data into the neighborhood level for further analysis. While additional related sources are available on location-specific scales, only citywide inventories are currently included in order to ensure consistency across all Community Statistical Areas (CSAs).⁵ When possible, indicators are created by normalizing these data to the population size of each area. Normalizing data reflects the concentration of the indicators relative to the population, and allows for comparisons across neighborhoods over time.

Public Events

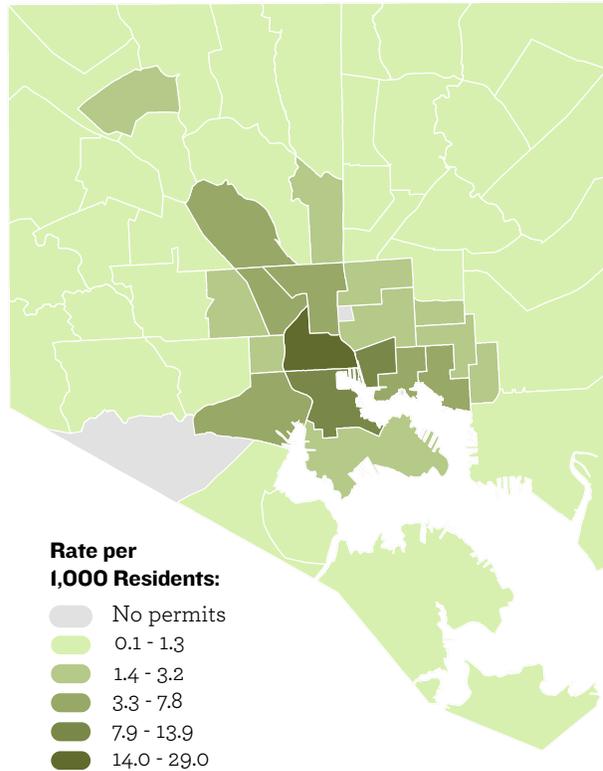

Public events are temporary convening areas in public rights-of-way that generally involve community participation, input, and initiative. Beyond promoting neighborhood activity, public events are directly linked to increases in civic engagement overall.⁶ *Vital Signs* tracks the frequency of public events through the number of event permits requested per 1,000 residents for activities such as parades, festivals, block parties, and marathons.⁷

Event Permits

Between 2016 and 2017, the number of event permits requested per 1,000 residents in Baltimore City **increased** to from 1.7 to 12.0 per 1,000 residents. The CSAs with the **greatest** rates of event permit requests were Downtown/Seton Hill (29.0 per 1,000 residents), Inner Harbor/Federal Hill (13.9 per 1,000 residents), and Harbor East/Little Italy (13.5 per 1,000 residents).

The CSAs that experienced the greatest **increase** in the rate of event permits requested per 1,000 residents included Downtown/Seton Hill (+12.9 per 1,000 residents) and Inner Harbor/Federal Hill (+2.4 per 1,000 residents). The CSAs that experienced the greatest **decrease** in the rate of event permits When possible, indicators are created by normalizing these data to the population size

Rate of Event Permits per 1,000 Residents, 2017

of each area. Normalizing data reflects the concentration of the indicators relative to the population and allows for comparisons across neighborhoods over time.

Public Art (from *Vital Signs 16*)

In 1964, Baltimore became the second city in the country to pass a Percent-for-Art law, which requires 1% of all capital construction costs go toward public art. Since then, over 300 works have been publicly-funded as a part of this program, including murals, monuments, paintings, and sculptures. In 2007, the City of Baltimore created a nine-member citizen public art commission that reviews gifts of public art and administers the Percent-for-Art program.⁸

Data Key

Green colored text denotes a positive change.

Red colored text denotes a negative change.

Blue colored text denotes a neutral change.

5. CSAs are groups of census tracts that correspond to neighborhoods which vary in size. See *Vital Signs 17* Introduction.

6. Ann Markusen and Anne Gadwa, (2010) "Creative Placemaking,"

7. If a public event, such as a marathon or festival, extends into the boundaries of multiple CSAs, the centroid of the event is used to determine the event's CSA. All events are counted once per an event permit request.

8. Baltimore Office of Promotion & the Arts Public Art Commission. Retrieved from: www.promotionand-arts.org/arts-council/baltimore-public-art-commission

Public Art per 1,000 Residents⁹

Public art is defined by BOPA as city-funded artwork that “enhances the cityscape, quality of life, and artistic and -creative climate in Baltimore”.¹⁰ Monuments, murals, paintings, sculptures, stained glass, fountains, and mosaics are among the art forms counted in the public art indicator

In 2016, there were 1.3 works of public art per 1,000 residents in the City of Baltimore. The CSAs with the **greatest** rates of city-funded public art included Downtown/Seton Hill (15.5 per 1,000 residents), the Waverlies (4.3 per 1,000 residents), and Greater Charles Village/Barclay (4.3 per 1,000 residents). Two CSAs, Mt. Washington/Coldspring and Southeastern, had **zero** works of city-funded public art.

The CSAs that experienced the greatest **increase** in rate of public art included Midtown (+1.9 per 1,000 residents), and Greater Charles Village/Barclay (+1.3 per 1,000 residents). The CSAs with the greatest **declines** included Westport/Mt. Winans/Lakeland (-2.9 per 1,000 residents) and Oldtown/Middle East (-2.8 per 1,000 residents).

Number of Murals

City-funded murals are included in both the public art indicator as well as a separate indicator in order to track where they are emerging throughout the City. Murals, a highly visible and growing art form in Baltimore, capture community sentiments and history engaging both residents and visitors.

In 2016, there were a total of 295 publicly funded murals in the City of Baltimore. The CSAs with the **largest** number of publicly-funded murals included Downtown/Seton Hill (46 murals), Upton/Druid Heights (21 murals), Sandtown-Winchester/Harlem Park (18 murals), and Washington Village/Pigtown (18 murals). Fourteen CSAs had **zero** publicly-funded murals. Between 2015 and 2016, the number of publicly-funded murals in Baltimore City

increased by 69 murals. The CSAs that **increased** in number of murals included Upton/Druid Heights (+14 murals), Sandtown-Winchester/Harlem Park (+12 murals), and Midtown (+12 murals). The CSAs that **decreased** in number of murals included Westport/Mt. Winans/Lakeland (-10 murals) and the Waverlies (-4 murals).

Arts and Culture Economy¹¹

The arts and culture economy encompasses a diversity of industries that create employment and stimulate the economy allow for educational opportunities in the arts and related fields, market and brand a city or neighborhood, contribute to creative placemaking and the reuse of spaces for communities, and brand and market a city or neighborhood. These industries range from spaces where the arts can be enjoyed, such as theaters or art studios, to institutions of learning that teach visual, musical, and performing arts, to businesses that involve creative skill sets, such as architecture firms or advertising agencies.

Vital Signs 17 includes both rates of and number of persons employed in arts-related businesses, which are defined as belonging to industries that allow for the consumption and enjoyment of arts and culture, and rates of businesses and number of persons employed in the creative economy, which is defined as industries that use and support artistic and cultural skill sets to attract and generate capital, knowledge, and information¹²

Arts-Related Businesses

From 2016 to 2017, the number of arts-related businesses in Baltimore City **remained steady** at 0.6 per 1,000 residents. The CSAs that experienced the greatest **increase** included Dickeyville/Franklinton (+0.25 businesses per 1,000 residents), South Baltimore (+0.2 businesses per 1,000 residents), and Greater Govans (+0.1 businesses per 1,000 residents). The CSAs with the greatest **declines** were Downtown/Seton Hill (-1.1 businesses per 1,000 residents) and Inner Harbor/Federal Hill (-0.4).

9. Due to InfoUSA's survey methodology, which consists of compiling a list of publicly-available phone numbers to conduct a sample phone survey, some businesses, such as those without landlines, are not represented. Additionally, firms with multiple branches may report total employment out of a single location, distorting employee counts by geography. For this reason, year-over-year comparisons of the data are not recommended

10. Data on publicly-funded public art comes from the BOPA. While several examples of privately-funded public art exist in Baltimore, these data are not tracked by BOPA or by any one source. Comparisons of these indicators from previous *Vital Signs* reports may be difficult due to improvements in how the BOPA tracks publically-funded public art.

11. Baltimore Office of Promotion & the Arts Public Art Commission (2011 October). City of Baltimore Public Art Guidelines 2012.

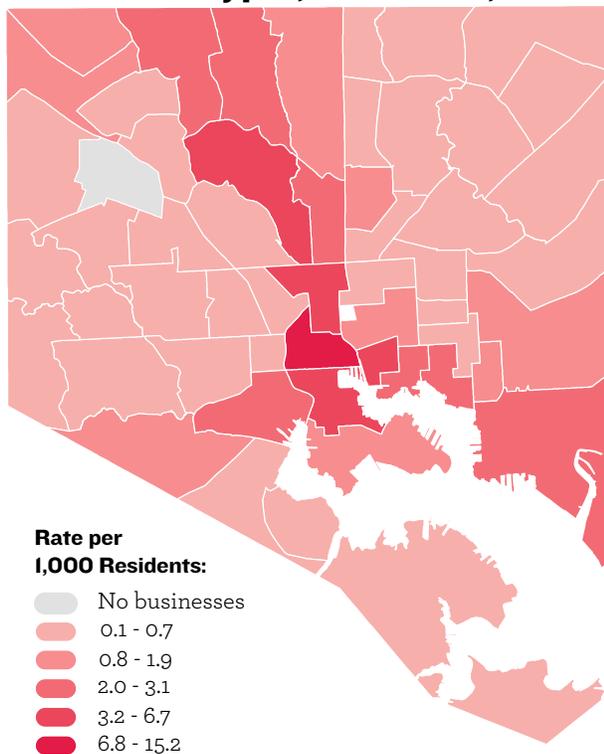

12. For a complete list of SIC and NAICS codes used to define arts-based and creative economy industries, see Arts & Culture Economy Indicators

In 2017, the CSAs with the **largest** rate of arts-related businesses per 1,000 residents included Downtown/Seton Hill (7.6 businesses per 1,000 residents) and Midtown (3.7 businesses per 1,000 residents). Clifton-Berea, Dorchester/Ashburton, and Westport/Mt. Winans/Lakeland had **zero** arts-related businesses per 1,000 residents.

Arts-Related Employment

In 2017, the CSAs with the **largest** number of persons employed in arts-related businesses were Inner Harbor/Federal Hill (1,070 employees), followed by Downtown/Seton Hill (657 employees), and Midtown (552 employees). Clifton Berea, Dorchester/ Ashburton, and Westport/ Mt. Winans/ Lakeland had **zero** persons employed in arts-related businesses.

Rate of Businesses in the Creative Economy per 1,000 Residents, 2017

Creative Economy Businesses

The rate of businesses and number of persons employed in the creative economy includes arts-related industries. From 2016 to 2017, the rate of businesses in the creative and adds other creative industries, such as architecture, marketing, and publishing.¹³

From 2016 to 2017, the rate of businesses in the creative economy in Baltimore City **decreased slightly** from 1.4 to 1.3 per 1,000 residents. The CSAs that experienced the greatest **increase** include Midway/Coldstream (+0.3 - businesses per 1,000 residents) and North Baltimore/Guilford/Homeland (+0.3 businesses per 1,000 residents). The CSAs with the greatest **decrease** included Downtown/Seton Hill (-2.2 businesses per 1,000 residents), Greater Roland Park/Poplar Hill (-0.7 businesses per 1,000 residents), and Inner Harbor/Federal Hill (-0.5 businesses per 1,000 residents).

Creative Economy Employment

In 2017, there were 15,477 persons in Baltimore employed in the creative economy, a **decline** from 16,090 in 2016. The CSAs with the **largest** number of persons employed in the creative economy were Midtown (3,562), Downtown/Seton Hill (2,144), and Fells Point (1,590). Greenmount East had **zero** residents employed in the creative economy in 2017.

Library Membership^{14,15}

Baltimore is home to the Enoch Pratt Free Library system, one of the oldest continuously operating free public library systems in the country. One of the most important community assets of a neighborhood is the local public library, which provides access to literature and information both as traditional print media and in digital formats. Public libraries also provide spaces for residents of all ages to engage in literary and cultural events, workshops, and educational activities. In 2013, Pratt libraries began offering classes to educate members about how to download e-books onto digital devices and continued expanding digital resources, which may explain some increases in library membership

13. For a complete list of SIC and NAICS codes used to define arts-based and creative economy industries, see Arts & Culture Economy Indicators.

14. Data obtained through a data-sharing agreement from the Enoch Pratt Free Library. Library membership data for 2015 onwards counts all active card types for all members of a household with a membership card, including library cards that do not expire. Previous totals for registered borrowers/active library users did not include users who have a library card that does no expire. For these reasons, comparison of the data between years is not recommended.

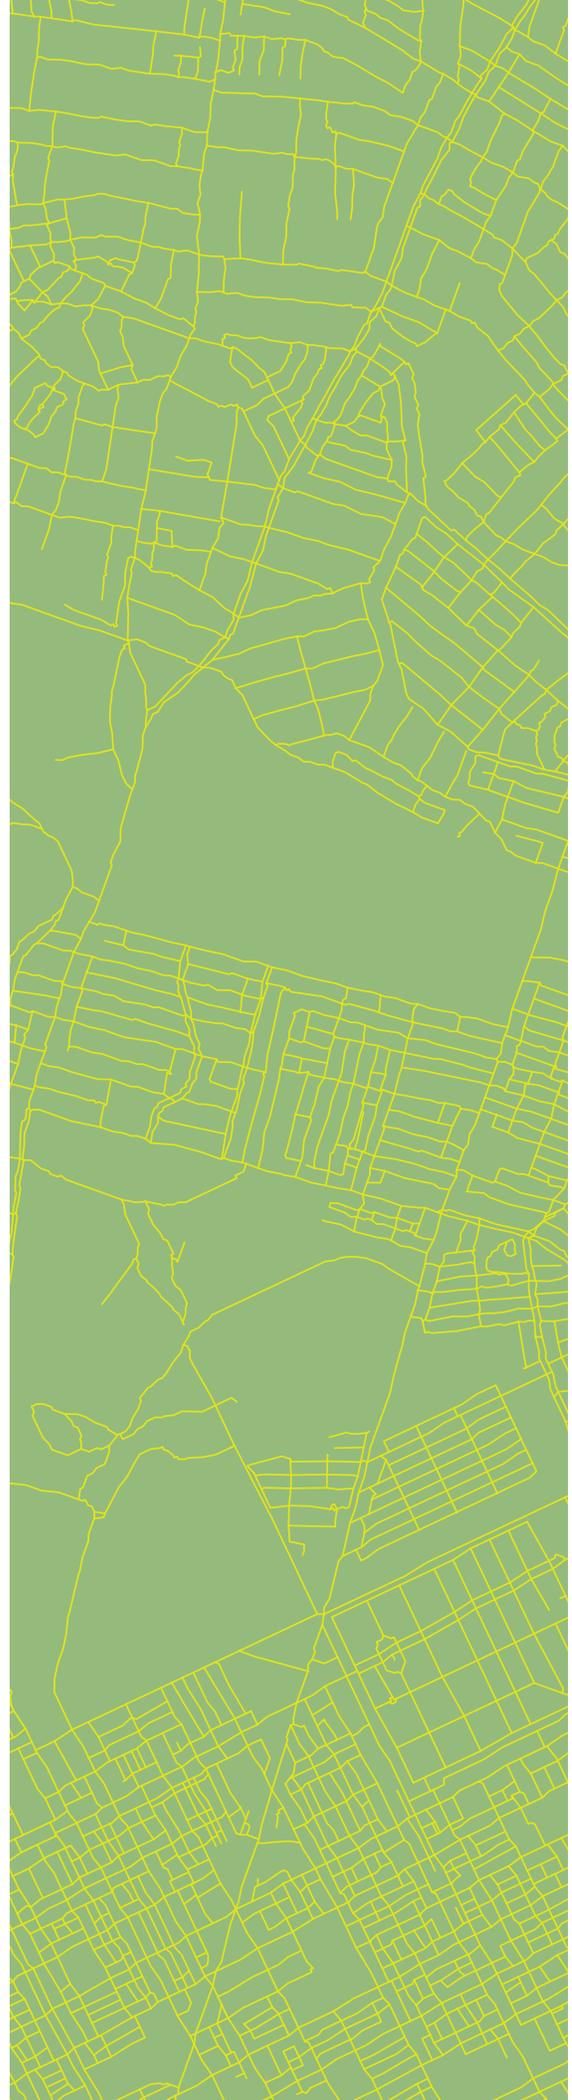

15. Please note that the *Vital Signs 17* data is based on the Enoch Pratt Free Library fiscal year 2018 data (July 1, 2017-June 30, 2018).

Although this indicator is categorized within the Arts and Culture section of *Vital Signs 17*, it is easily associated with education indicators, as libraries are places for preschoolers to adult-learners, as well as workforce and economic development indicators, providing a place for free access to Internet resources.

Persons with Library Cards

Between 2016 and 2017, the number of persons in Baltimore with library cards per 1,000 residents decreased from 313.2 to 266.1 per 1,000 residents. The CSAs that experienced the greatest decrease in persons with library cards per 1,000 residents were Midway/Coldstream (-90.5 per 1,000 residents), Midtown (-77.2 per 1,000 residents), and Cherry Hill (-73.3).

The CSAs with the highest number of residents with active library cards included Cherry Hill, despite having a decline from 2016 to 2017, at (411.1 per 1,000 residents), The Waverlies (403.7 per 1,000 residents), and Patterson Park North & East (436.2 per 1,000 residents). The CSAs with the lowest numbers of residents with active library cards included Morrell Park/Violetville (74.7 per 1,000 residents) and Cross-Country/Cheswolde (116.1 per 1,000 residents)..

Arts and Culture

**Indicator
Definitions and Rankings**

Arts and Culture Indicator Definitions and Rankings

For each indicator reported in *Vital Signs 17*, we provide the data source, the years for which it is reported, and the five CSAs with the highest and lowest values for the indicator; these may not correspond to positive or negative trends.

Public Events

Number of Event Permits Requested per 1,000 Residents

Measures the total number of event permits requested in an area.

Definition: The number of event permits requested per 1,000 residents. Events include, but are not limited to, festivals, block parties, races, and parades. In the event of a large event, the central point is used to calculate the location of the request. (SOURCE: ENVISTA, WITH PERMISSION FROM THE BALTIMORE CITY DEPARTMENT OF TRANSPORTATION, 2014, 2015, 2016, 2017)

Five Highest:

1. Downtown/Seton Hill
2. Inner Harbor/
Federal Hill
3. Harbor East/Little Italy
4. Canton
5. Midtown

Five Lowest:

1. Morrell Park/Violetville
2. Cross-Country/
Cheswolde
3. Southeastern
4. Loch Raven
5. Forest Park/Walbrook

Public Art

(from *Vital Signs 16*)

Public Art per 1,000 residents

Measures the concentration of public art.

Definition: The number of works of publicly funded art per 1,000 residents. These works include, but are not exclusive to, murals, monuments, sculptures, mosaics, and stained glass. The Baltimore Office of Promotion and the Arts tracks works created through the 1% for Public Art and Baltimore Mural Programs and maintains general inventories of public art and murals. (SOURCE: BALTIMORE OFFICE OF PROMOTION AND THE ARTS, 2014, 2015, 2016)

Five Highest:

1. Downtown/Seton Hill
2. The Waverlies
3. Greater Charles
Village/Barclay
4. Midtown
5. Oldtown/Middle East

Five Lowest:

1. Mount Washington/
Coldspring,
Southeastern
2. Cross-Country/
Cheswolde
3. Hamilton
4. Edmondson Village
5. Loch Raven

Number of Murals per CSA

Measures the number of murals per CSA.

Definition: The number of publicly funded murals per CSA. Murals are also included in the “Public Art per 1,000 residents” indicator. (SOURCE: BALTIMORE OFFICE OF PROMOTION AND THE ARTS, 2014, 2015, 2016)

Five Highest:

1. Downtown/Seton Hill
2. Upton/Druid Heights
3. Sandtown-Winchester/
Harlem Park
4. Washington
Village/Pigtown
5. Midtown

Five Lowest:

Fourteen CSAs did not have any murals.

Public Library

Number of Persons with Library Cards per 1,000 Residents

Measures the total number of persons having a library card in an area.

Definition: The rate of persons per 1,000 residents that possess a valid public library system card. This includes all library card types (first card, juvenile, young adult, adult). (SOURCE: ENOCH PRATT FREE LIBRARY, 2011, 2012, 2013, 2014, 2015, 2016, 2017; U.S. CENSUS, 2010)

Five Highest:

1. Cherry Hill
2. The Waverlies
3. Patterson Park North & East
4. Oldtown/Middle East
5. Highlandtown

Five Lowest:

1. Morrell Park/Violetville
2. Cross-Country/Cheswolde
3. Dickeyville/Franklinton
4. Howard Park/West Arlington
5. Beechfield/TenHills/West Hills

Arts & Culture Economy

Number of Arts-Related Businesses per 1,000 Residents

Measures the concentration of arts-related businesses in an area.

Definition: The number of businesses (both for-profit and non-profit) that are directly related to arts and culture per 1,000 residents. Arts-related businesses are defined as belonging to industries that allow for the consumption and enjoyment of arts and culture. The following industries are identified by their primary NAICS code: art dealers (4539); art schools (6166); independent artists, writers, and performers (7115); libraries (5191); motion picture and film (5213, 5322); museums, historical sites, zoos, gardens, and parks (7121); music, literary, and visual arts-related retail/supplies (4511, 4512); and performing arts (7111). The following industries are identified by their primary SIC codes: art and music instruction (8049, 8299); art galleries, dealers, and consultants (5999); art publishers (2741); calligraphers (7336); designers (1521); embroidery (7389); libraries (8231); museums and arts organizations (8412); music and live entertainment (7929); music, literary, and visual arts-related retail/supplies (3931, 5192, 5736, 5932, 5942, 5945, 5946, 5999, 7699); parks (7999); photography (7221); theaters and theatrical support (7832, 7922); writers, artists, musicians, and composers (8999); and zoos (8422). (SOURCE: INFOUSA, 2011, 2012, 2013, 2014, 2015, 2016, 2017; U.S. CENSUS, 2010)

Five Highest:

1. Downtown/Seton Hill
2. Midtown
3. Inner Harbor/Federal Hill
4. Fells Point
5. Greater Charles Village/Barclay

Five Lowest:

1. Clifton-Berea, Dorchester/Ashburton, Westport/Mt. Winans/Lakeland
2. Allendale/Irvington/S. Hilton
3. Sandtown-Winchester/Harlem Park
4. Patterson Park North & East
5. Beechfield/Ten Hills/West Hills

Total Employment in Arts-Related Businesses

Measures the total number of persons employed in arts-related businesses in an area.

Definition: The number of persons employed in arts-related businesses (both for-profit and non-profit). This number does not count those persons who identify themselves as being artists and does not count sole proprietorships or persons who work part-time in the arts. The same industries used to calculate the rate of arts-related businesses are used to calculate total employment in arts-related businesses. (SOURCE: INFOUSA, 2011, 2012, 2013, 2014, 2015, 2016, 2017; U.S. CENSUS, 2010)

Five Highest:

1. Inner Harbor/ Federal Hill
2. Downtown/Seton Hill
3. Midtown
4. Greater Charles Village/Barclay
5. Oldtown/Middle East

Five Lowest:

1. Clifton-Berea, Dorchester/ Ashburton, Westport/ Mt. Winans/Lakeland
2. Greater Mondawmin, Sandtown-Winchester/ Harlem Park
3. Claremont/Armistead, Loch Raven, Madison/ East End
4. Beechfield/Ten Hills/ West Hills, Chinquapin Park/Belvedere, Howard Park/West Arlington, Midway/Coldstream
5. Forest Park/Walbrook, Morrell Park/ Violetville, Patterson Park North & East

Total Employment in the Creative Economy

Measures the total number of persons employed in creative economy businesses in an area.

Definition: The number of persons employed in the creative economy (both for-profit and non-profit). This number does not count those persons who identify themselves as being artists and does not count sole proprietorships or persons who work part-time in the arts. The same industries used to calculate the rate businesses in the creative economy are used to calculate total employment in the creative economy. (SOURCE: INFOUSA, 2011, 2012, 2013, 2014, 2015, 2016, 2017; U.S. CENSUS, 2010)

Five Highest:

1. Midtown
2. Downtown/Seton Hill
3. Fells Point
4. Medfield/Hampden/ Woodberry/Remington
5. Inner Harbor/Federal Hill

Five Lowest:

1. Greenmount East
2. Allendale/Irvington/S. Hilton
3. Dickeyville/Franklintown
4. Upton/Druid Heights
5. Sandtown-Winchester/ Harlem Park

Number of Businesses in the Creative Economy per 1,000 Residents

Measures the concentration of creative economy businesses in an area.

Definition: The rate of businesses (both for-profit and non-profit) that are in the creative economy per 1,000 residents. The creative economy is defined as industries that use and support artistic and cultural skillsets to attract and generate capital, knowledge, and information. Arts-based businesses are included in the creative economy. In addition to the industries included in the rate of arts-based businesses indicator, the following industries are identified by their primary NAICS code: advertising (5418); architecture (5413); design (5414); motion picture and video production (5121); music publishing and sound recording (5122); news syndicates (5191); photography (5419); printing and publishing (3231, 4512, 5111); radio stations (5151); and textiles (3132). In addition to the industries included in the rate of arts-based businesses indicator, the following industries are identified by their primary SIC code: advertising (5199, 7311, 7313, 7319); architecture (8712, 8748); business writing (899); fashion designers (5699, 5944); graphic design and commercial art (7336); interior design (7389); landscape design (7810); media (7383); motion picture and video support (7812, 7819); photography (7221, 7335, 7384); print media (2711, 2721, 2731, 5963, 5994); printing and publishing (2732, 2741, 2752, 2759, 2789, 8742); radio (4832); restoration (7641); television (4833, 4841, 7922, 8249); textiles (5131, 5949); and website design (7373). (SOURCE: INFOUSA, 2011, 2012, 2013, 2014, 2015, 2016, 2017; U.S. CENSUS, 2010)

Five Highest:

1. Downtown/Seton Hill
2. Midtown
3. Medfield/Hampden/ Woodberry/Remington
4. Harbor East/Little Italy
5. Inner Harbor/ Federal Hill

Five Lowest:

1. Dorchester/Ashburton
2. Allendale/ Irvington/S. Hilton
3. Sandtown-Winchester/ Harlem Park
4. Southern Park Heights
5. Clifton-Berea

Sustainability

In 2018, Baltimore completed a new sustainability plan with the aim of being a city that meets the needs of current residents without undermining the human and environmental resources on which future generations will rely.¹ Based on significant community engagement, the new plan focuses on resources like clean air and land, and strong neighborhood ties that undergird sustainability. Expansion of the city's urban tree canopy through the planting and stewardship of trees improves air quality and offers many social and economic benefits. Fossil fuel powered transportation remains part of the landscape, as car-use has increased and transit use declined. Commute travel times have increased, and for the second year in a row, the Central Maryland Transportation Alliance gave the region a "D" on its Transportation Report Card.² Despite universal distribution of municipal trash cans in 2016, in 2017 citizen calls for dirty streets and alleys increased, as did calls for clogged storm drains.

Baltimore's sustainability plan sets worthy goals for a broad range of interconnected issues including transportation, greening and energy conservation. The city's participation in the USA Sustainable Cities Initiative (USA-SCI),³ further emphasizes Baltimore's commitment to achieving the global sustainable development goals (SDGs) adopted by the United Nations in 2015.

The transportation sector generated nearly one-third of all greenhouse gas emissions in the US in 2017.⁴ A series of policy decisions reinforced dependence on privately owned vehicles. Investments that would have helped reduce vehicle miles traveled, such as the Baltimore Red Line light rail, were canceled in 2015. In 2017 the Maryland Transportation Administration launched the Baltimore LINK, the first system route upgrade in decades. The average daily bus stop ridership within communities is a new indicator in *Vital Signs 17* which aims to measure the connectedness to the bus network.

Despite this investment, the percentage of Baltimore commuters who choose public transit to get to work has remained steady, while the percentage traveling more than 45 minutes has increased.

With regard to solid waste, in 2016 the Department of Public Waste launched the municipal trash can program⁵ which aimed to keep streets, alleys and waterways clean, as well as deter rodents. Every residential address receiving city trash pick-up received a durable, wheeled, lidded can with an identification number unique to that address. High hopes accompanied this effort, especially in neighborhoods most affected by trash and illegal dumping. Paradoxically, by 2017, citizen calls for service of dirty streets and alleys actually increased. Calls to the 311 system for trash-related issues may signal a greater sense of vigilance or responsibility after the new cans were distributed.

Ultimately, achievement of sustainability goals will require ongoing creativity, persistence, collaboration and monitoring.

Data

Vital Signs 17 includes 19 indicators for Community Statistical Areas (CSAs)⁶ track the city's progress toward sustainability. These indicators are grouped into the categories: transportation, sanitation, greening, energy and weatherization, and community engagement.

1. 2018 Update of the Baltimore City Sustainability Plan www.baltimoresustainability.org

2. Transportation Report Card, visit <http://www.cmtalliance.org/reportcard/>

3. Baltimore's Sustainable Future: Localizing the UN Sustainable Development Goals, Strategies and Indicators (2016) <http://www.ubalt.edu/about-ub/sustainable-cities/>

4. Sources of Greenhouse Gas Emissions (2017) <https://www.epa.gov/ghgemissions/sources-greenhouse-gas-emissions>

5. Baltimore City Department of Public Works, Municipal Trash Can Program <https://publicworks.baltimorecity.gov/solid-waste/cans>

6. CSAs are groups of census tracts that correspond to neighborhoods. See *Vital Signs 17* Introduction.

Data for *Vital Signs 17* Sustainability indicators come from sources that can be grouped into the following categories:

City sources: CitiStat/Baltimore 311, Department of Public Works, Department of Parks and Recreation-Tree-Baltimore, Board of Elections

State sources: Maryland Department of Housing and Community Development, Maryland Transit Administration

Federal sources: American Community Survey

Proprietary sources: Walk Score®

When possible, indicators are created by normalizing data by population or the number of residential properties to establish rates that allow for comparison across neighborhoods and over time.

Transportation

Urban living often means having access to alternative means of transportation that reduce vehicle miles traveled by car. Baltimore’s mid-size transportation system includes regional rail (MARC), Metro, light rail, the Charm City Circulator, and a system of local and commuter buses. While transportation is robust for movement north and south, problems with accessibility still persist in movement east and west. In addition, recent research has shown that “walkability” is necessary for cities to thrive⁷ and that where transit use is high, so too is walking and/or biking. *Vital Signs 17* tracks several indicators that measure use of alternative transportation, travel time to work, and zero vehicle households.

Drive Alone

During 2013-2017, 60.0% of Baltimore City residents drove alone to work. The CSAs with the highest percentage of residents who drove alone to work included Canton (81.8%). During 2013-2017, 60.0% of Baltimore City residents drove alone to work. The CSAs with the highest percentage of residents who drove alone to work included Canton (81.8%) Hamilton (80.9%), and Mount Washington/Coldspring (80.8%). The CSAs with the lowest percentage of residents who drove alone to work included Downtown/Seton Hill

(38.5%), Oldtown/ Middle East (41.7%), and Madison/East End (42.3%) .,

Public Transportation

During 2013-2017, 18.2% of Baltimore City residents used public transportation to commute to work. The CSAs with the **highest** percentage of residents who used public transportation to commute to work included Sandtown-Winchester/Harlem Park (44.8%), Greenmount East (42.5%), and Southern Park Heights (37.0%). The CSAs with the **lowest** percentage of residents who used public transportation to commute to work included Canton (3.1%), South Baltimore (6.1%), and Greater Roland Park/Poplar Hill (6.2%).

Carpooling

During 2013-2017, 9.1% of Baltimore City residents used carpools to travel to work. The CSAs with the **highest** percentage of residents who used carpools to travel to work included Orangeville/East Highlandtown (18.4%), Westport/Mount Winans/Lakeland (17.7%), and Brooklyn/Curtis Bay/Hawkins Point (16.3%). The CSAs with the **lowest** percentage of residents who used carpools to travel to work included Midtown (2.8%), Dorchester/Ashburton (3.8%), and Downtown/Seton Hill (4.2%).

Walking

During 2013-2017, 6.6% of Baltimore City residents walked to work. The CSAs with the **highest** percentage of residents who walked to work included Downtown/Seton Hill (38.9%), Harbor East/Little Italy (24.1%), and Oldtown/Middle East (22.1%). The CSAs with the **lowest** percentage of residents who walked to work included Harford/Echodale (0.6%), Hamilton (0.7%), and Cedonia/Frankford (1.0%).

No Personal Vehicle Access

The mode of transportation that someone uses to get to work is correlated to access to a personal car. Based on the 2013-2017 ACS, 29.0% of the households in Baltimore City did not have a vehicle available for personal use. The CSAs with the **highest** percentage of residents without access to a vehicle included Oldtown/Middle East (66.2%), Upton/Druid Heights (59.2%), and Sandtown-Winchester/Harlem Park (56.6%). The CSAs with the **lowest** percentage of residents without a vehicle included Canton (4.5%), South Baltimore (6.1%), and Greater Roland Park/Poplar Hill (6.6%).

Average Daily Bus Stop Ridership

While Baltimore has an extensive network of bus stops, how many riders board or alight at a stop within communi-

Data Key

Green colored text denotes a positive change.

Red colored text denotes a negative change.

Blue colored text denotes a neutral change.

7. Jeff Speck 2012) Walkable City: How Downtown Can Save America, One Step at a Time.

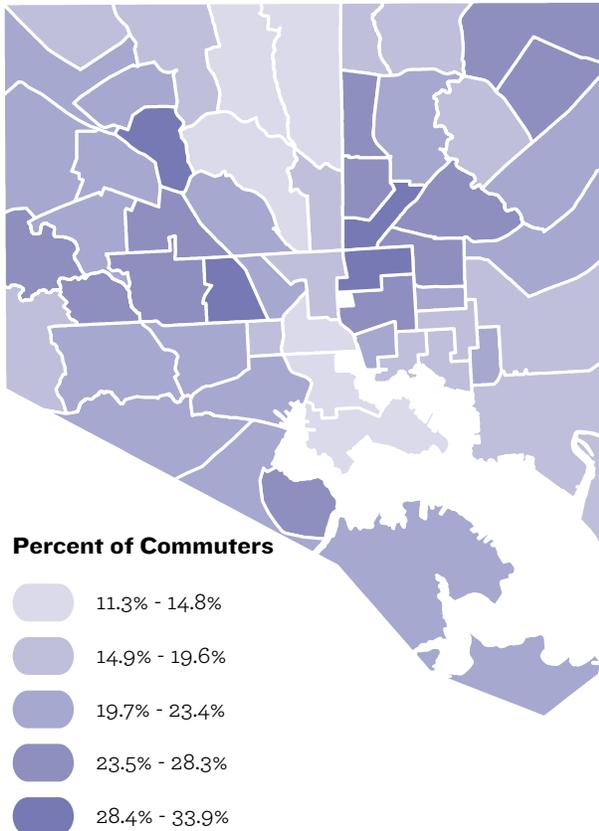

ties is an indicator of how well the system serves existing residents and whether the neighborhood is a destination for other passengers in the network. In 2017, the average daily bus ridership per 1,000 residents was 500. Only 11 CSAs had daily bus ridership higher than the citywide average. The CSAs with the **highest** average daily bus ridership were Downtown/Seton Hill (10,379 per 1,000 residents) and Greater Mondawmin (2,058 per 1,000 residents). The CSAs with the **lowest** average daily bus ridership were Canton (62 per 1,000 residents) and Cross-Country/Cheswolde (76 per 1,000 residents).

WalkScore®

In 2017, Baltimore City had a WalkScore of 56.2, which places the city as a whole in the “somewhat walkable” category, meaning that some amenities are within walking distance.

- 6 CSAs were ranked as being a “**walkers’ paradise**” (having a Walk Score greater than 90) including Downtown/Seton Hill (95.7), Fells Point (94.6), and Harbor East/Little Italy (94.2).

Percent Traveling More than 45 Minutes to Get to Work by CSA, 2012-2016

- 16 CSAs were ranked as “**very walkable**” (having a Walk Score between 70 and 90) including Midtown (89.4), Madison/East End (88.8), and Patterson Park North & East (88.6).
- 21 CSAs were ranked as “**somewhat walkable**” (having a Walk Score between 50 and 70) including Medfield/Hampden/Woodberry (69.0), Glen-Fallstaff (68.1) and Greater Rosemont (68.0).
- 12 CSAs were ranked as being “**car dependent**” (having a Walk Score less than 50) including Brooklyn/Curtis Bay/Hawkins Point (19.7), Dickeyville/Franklinton (26.1), and Southeastern (30.1).

Commuting Less than 15 Minutes

From 2006-2010 to 2013-2017, the percentage of city residents commuting to work with a commute time of less than 15 minutes **decreased** slightly from 18.6% to 15.9%. During 2013-2017, the percentage of residents with a commute time of less than 15 minutes ranged from a **high** of 34.0% in Harbor East/Little Italy to a **low** of 5.2% in Dickeyville/Franklinton.

Commuting Between 15-29 Minutes

From 2006-2010 to 2013-2017, the percentage of city residents traveling to work with a commute of between 15 and 29 minutes **decreased** slightly from 38.5% to 38.2%. During 2013-2017, the percentage of residents with a commute time between 15 and 29 minutes ranged from a **high** of 51.0% in North Baltimore/Guilford/Homeland to a **low** of 19.8% in Harbor East/Little

Commuting Between 30-44 Minutes

From 2006-2010 to 2013-2017, the percentage of city residents commuting to work with a commute time between 30 and 44 minutes **increased** slightly from 24.0% to 25.0%. During 2013-2017, the percentage of residents with a commute time between 30 and 44 minutes ranged from a **high** of 34.8% in Cedonia/Frankford to a **low** of 13.0% in Morrell Park/Violetville.

Commuting More than 45 Minutes

From 2006-2010 to 2013-2017, the percentage of city residents commuting to work with a commute greater than 45 minutes **increased** from 19.6% to 20.8%. During 2013-2017, the percentage of residents with a commute greater than 45 minutes ranged from a **high** of 36.8% in Southern Park Heights to a **low** of 11.2% in Medfield/Hampden/Woodberry/Remington. Sandtown-Winchester/Harlem Park to a **low** of 11.3% in Inner Harbor/Federal Hill.

Sanitation

In 2009, when Baltimore residents were surveyed about what sustainability issue was most important to them, sanitation or cleanliness rose to the top as an important component of quality of life. *Vital Signs 17* continues to track two indicators that measure the cleanliness of Baltimore City: the rate of dirty streets and alleys and the rate of clogged storm drain. Data originates from 311-system service requests, which occur when residents, employees of businesses, or city employees use the phone, website or mobile app to report a wide variety of non-emergency incidents or problems ranging from piles of trash to broken streetlights to potholes to broken equipment at a public park.

Dirty Streets and Alleys

From 2016 to 2017, the rate of reported dirty streets and alleys **increased** from 54.3 to 66.1 per 1,000 residents. In 2017, the CSAs with the **highest** rates of reported dirty streets and alleys included Southwest Baltimore (248.5 per 1,000 residents), Patterson Park North & East (216.0 per 1,000 residents), and Washington Village/Pigtown (208.8 per 1,000 residents). The CSAs with the **lowest** rates of reported dirty streets and alleys included Cross-Country/Cheswolde (3.2 per 1,000 residents), Dickeyville/Franklinton (8.8 per 1,000 residents), and Harford/Echodale (10.6 per 1,000 residents).

Clogged Storm Drains

From 2016 to 2017, the rate of reported clogged storm drains **increased** from 3.4 to 4.1 per 1,000 residents. In 2017, the CSAs with the **highest** rates of reported clogged storm drains included Downtown/Seton Hill (10.4 per 1,000 residents), Westport/Mount Winans/Lakeland (10.0 per 1,000 residents), and Morrell Park/Violetville (9.0 per 1,000 residents). The CSAs with the **lowest** rates of reported clogged storm drains included Dickeyville/Franklinton (1.0 per 1,000 residents), Cross-Country/Cheswolde (1.2 per 1,000 residents), and Dorchester/Ashburton (1.4 per 1,000 residents).

Greening

Baltimore City is home to many green spaces, parks, and waterways. Some of the more widely recognized locations include the Inner Harbor, Middle Branch, Druid Hill, Gwynns Falls, and Herring Run Parks. City residents in particular value access to green spaces as a place to recreate, exercise, and congregate, but the city's green spaces

also serve a vital role in ensuring clean air and water for long-term urban sustainability. Baltimore neighborhoods actively participate in increasing access to green spaces through tree planting and other watershed protection activities such as stream clean-ups. These efforts not only provide public health benefits but directly impact water quality in the city, region, and ultimately the entire Chesapeake Bay.⁸ *Vital Signs 17* tracks two indicators for tree canopy and number of trees planted.

Number of Trees Planted

In 2017, there were 2,989 trees planted in Baltimore through the Mayoral initiative TreeBaltimore⁹. The CSAs with the **greatest** number of trees were planted in Brooklyn/Curtis Bay/Hawkins Point (459), Greenmount East (299), and Clifton-Berea (257). Eleven (11) CSAs had **no** trees planted through the TreeBaltimore initiative in 2017.

Tree Canopy¹⁰

Studies throughout the United States have shown that communities are losing tree canopy due to a wide range of threats. In Baltimore, however, tree canopy experienced an approximate 1% increase between 2007 and 2015. In 2015, 28% of the city's total land area was covered with trees, which is a slight increase from 27% with the previously available data in 2007. By CSA, percentage of tree canopy ranges from a **high** of 73% in Dickeyville / Franklinton to a **low** of 4% in Highlandtown.

Energy Use

One of the biggest issues that has gained importance for neighborhoods over the past decade is the use, conservation, and cost of residential energy. Research has shown that programs aimed at providing incentives for installing devices in the home to reduce consumption (compact fluorescent light bulbs, smart meters, energy saving appliances) or provide education on energy efficient practices impact the entire neighborhood through greater residential stability and investment.¹¹

Homes Heated By Gas

Based on the 2013-2017 ACS, nearly two-thirds (65.1%) of the city's residences were heated using utility gas. The percentage of residences heated by utility gas ranged from a high of 77.2% in Madison/East End to a low of 28.6% in Downtown/Seton Hill. There were three other CSAs where

8. For more information on Baltimore's plan for sustainable water quality, visit <http://www.cleanwaterbaltimore.org/>

9. Data comes from TreeBaltimore, an umbrella organization for City agencies and private/non-profit entities involved in increasing Baltimore's tree canopy. For more information, visit www.treebaltimore.org

11. Austin Troy (2012). *The Very Hungry City: Urban Energy Efficiency and the Economic Fate of Cities*. Yale University Press.

at least 75% of the residences were heated using utility gas: Belair-Edison (76.3%), Greater Rosemont (75.7%), and Hamilton (75.4%).

Homes Heated By Electricity

Based on the 2013-2017 ACS, just over a quarter (27.0%) of the city's residences were heated using electricity. The percentage of residences heated by electricity ranged from a **high** of 64.6% in Downtown/Seton Hill to a **low** of 12.5% in Hamilton .

Community Engagement (from *Vital Signs 16*)

Since 2000 when the first *Vital Signs* report was released, the percentage of persons registered to vote and the percentage of persons actually voting in the general election have been tracked as key indicators to measure community engagement. These indicators show steady increase in voter registration, but more variable rates of actual voting.

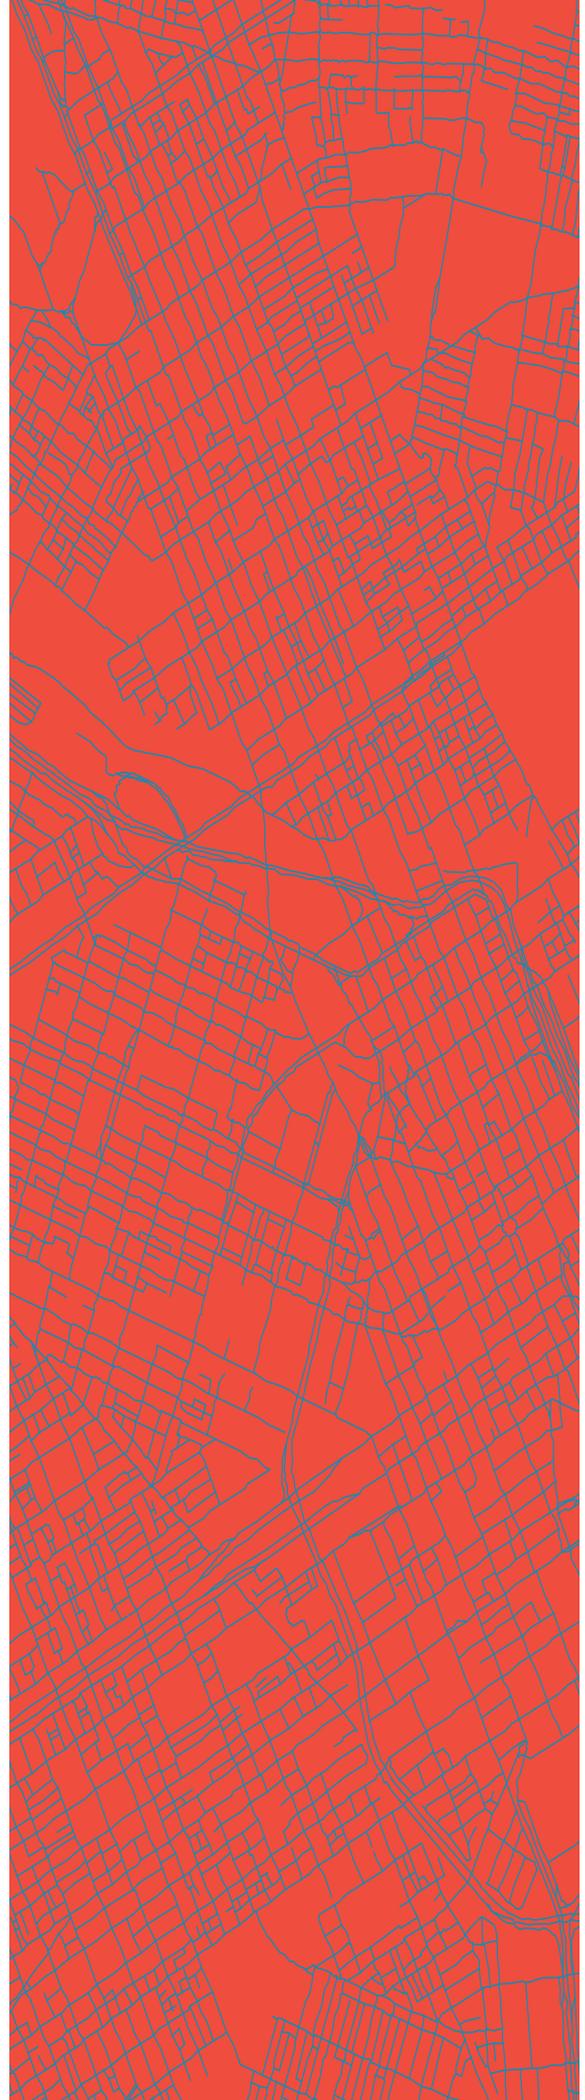

Percent of Population 18+ Who Voted in the Last Election¹²

In 2016, 78.8% of the City residents over the age of 18 were registered to vote, which is an **increase** from 76.9% in 2014. The percentage of residents over the age of 18 who were registered to vote ranged from a **high** of 99.4%¹² in South Baltimore to a **low** of 57.7% in Brooklyn/Curtis Bay/Hawkins Point. Four more CSAs had at least 90% of the residents over the age of 18 were registered to vote: Mount Washington/Coldspring (98.4%), Edmondson Village (93.6%), Greater Roland Park/Poplar Hill (91.1%) and The Waverlies (90.9%).

Percent of Population 18+ Registered to Vote

In 2016, 48.2% of City residents voted in the general election, versus 37.3% in 2014 and 51.5% in 2012. The percentage of residents voting in the general election ranged from a **high** of 75.6% in Mount Washington/Coldspring to a **low** 26.1% in Brooklyn/Curtis Bay/Hawkins Point.

12. This indicator is calculated by dividing the total number of registered voters from the Baltimore City Board of Elections by the voting age population from the 2010 US Census.

Sustainability

Indicator Definitions and Rankings

For each indicator reported in *Vital Signs 17*, we provide the data source, the years for which it is reported, and the five CSAs with the highest and lowest values for the indicator; these may not correspond to positive or negative trends.

Transportation

Percent of Population Driving Alone to Work

Measures the share of workers that commute alone by car to their job.

Definition: The percentage of commuters driving alone out of all commuters aged 16 and above. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Canton
2. Hamilton
3. Mount Washington/Coldspring
4. Greater Roland Park/Poplar Hill
5. South Baltimore

Five Lowest:

1. Downtown/Seton Hill
2. Oldtown/Middle East
3. Madison/East End
4. Sandtown-Winchester/Harlem Park
5. Greenmount East

Percent of Population Carpooling to Work

Measures the share of workers that commute by carpool to their work.

Definition: The percentage of commuters that carpool out of all commuters aged 16 and above. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Orangeville/East Highlandtown
2. Westport/Mount Winans/Lakeland
3. Brooklyn/Curtis Bay/Hawkins Point
4. Allendale/Irvington/S. Hilton
5. Edmondson Village

Five Lowest:

1. Midtown
2. Dorchester/Ashburton
3. Downtown/Seton Hill
4. Greater Roland Park/Poplar Hill
5. Inner Harbor/Federal Hill

Percent of Population That Uses Public Transportation to Commute to Work

Measures the share of workers that commute by public transit to their work.

Definition: The percentage of commuters that use public transit out of all commuters aged 16 and above. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Sandtown-Winchester/Harlem Park
2. Greenmount East
3. Southern Park Heights
4. Southwest Baltimore

Five Lowest:

1. Harford/Echodale
2. Hamilton
3. Cedonia/Frankford
4. Belair-Edison
5. Edmondson Village

Percent of Population That Uses Other Means to Commute to Work

Measures the share of workers that commute to work by any other means, such as a taxi, motorcycle, or bicycle.

Definition: The percentage of commuters that use other means to travel to work out of all commuters aged 16 and above. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. The Waverlies
2. Greater Charles Village/Barclay
3. Medfield/Hampden/Woodberry/Remington
4. Midtown
5. North Baltimore/Guilford/Homeland

Five Lowest:

1. Beechfield/Ten Hills/West Hills
2. Upton/Druid Heights
3. Cross-Country/Cheswolde
4. Westport/Mount Winans/Lakeland
5. Cherry Hill

Percent of Households With No Vehicles Available

Measures the percentage of households that do not have a personal vehicle available.

Definition: The percentage of households that do not have a personal vehicle available for use out of all households in an area. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Oldtown/Middle East
2. Upton/Druid Heights
3. Sandtown-Winchester/Harlem Park
4. Southwest Baltimore
5. Madison/East End

Five Lowest:

1. Canton
2. South Baltimore
3. Greater Roland Park/Poplar Hill
4. Mount Washington/Coldspring
5. Hamilton

Percent of Employed Population with Travel Time to Work of 0-14 Minutes

Measures the length of commute.

Definition: The percentage of commuters that spend less than 15 minutes commuting to work out of all commuters aged 16 and above. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Harbor East/Little Italy
2. Downtown/Seton Hill
3. Oldtown/Middle East
4. Southeastern
5. Greater Roland Park/Poplar Hill

Five Lowest:

1. Dickeyville/Franklinton
2. Southern Park Heights
3. Edmondson Village
4. Belair-Edison
5. Harford/Echodale

Percent of Employed Population with Travel Time to Work of 15-29 Minutes

Measures the length of commute.

Definition: The percentage of commuters that spend between 15 and 29 minutes commuting to work out of all commuters aged 16 and above. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. North Baltimore/Guilford/Homeland
2. Upton/Druid Heights
3. Greater Roland Park/Poplar Hill
4. Morrell Park/Violetville
5. Medfield/Hampden/Woodberry/Remington

Five Lowest:

1. Harbor East/Little Italy
2. Midway/Coldstream
3. Washington Village/Pigtown
4. Southern Park Heights
5. Cherry Hill

Percent of Employed Population with Travel Time to Work of 30-44 Minutes

Measures the length of commute.

Definition: The percentage of commuters that spend between 30 and 44 minutes traveling to work out of all commuters aged 16 and above. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Cedonia/Frankford
2. Loch Raven
3. Howard Park/West Arlington
4. Midway/Coldstream
5. Edmondson Village

Five Lowest:

1. Morrell Park/Violetville
2. Oldtown/Middle East
3. North Baltimore/Guilford/Homeland
4. Greater Roland Park/Poplar Hill
5. Poppleton/The Terraces/Hollins Market

Percent of Employed Population with Travel Time to Work of 45 Minutes or More

Measures the length of commute.

Definition: The percentage of commuters that spend more than 45 minutes traveling to work out of all commuters aged 16 and above. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Southern Park Heights
2. Sandtown-Winchester/Harlem Park
3. Belair-Edison
4. Midway/Coldstream
5. Greenmount East

Five Lowest:

1. Medfield/Hampden/Woodberry/Remington
2. Downtown/Seton Hill
3. Inner Harbor/Federal Hill
4. South Baltimore
5. Canton

Walk Score

Measures the walkability (convenience to various amenities) of an area.

Definition: The Walk Score® is calculated by mapping out the distance to amenities in nine different categories (grocery stores, restaurants, shopping, coffee shops, banks, parks, schools, book stores/libraries, and entertainment) and are weighted according to importance. The distance to a location, counts, and weights determine a base score of an address, which is then normalized to a score from 0 to 100. More information on Walk Score can be found at <http://www.walkscore.com/>. (SOURCE: WALK SCORE® 2017)

Five Highest:

1. Downtown/Seton Hill
2. Fells Point
3. Harbor East/Little Italy
4. Highlandtown
5. Oldtown/Middle East

Five Lowest:

1. Brooklyn/Curtis Bay/Hawkins Point
2. Dickeyville/Franklinton
3. Southeastern
4. Mount Washington/Coldspring
5. Claremont/Armistead

Bike Lane Miles (From Vital Signs 12)

Measures the linear miles of designated bike lanes within the roadway system.

Definition: BikeBaltimore is the Department of Transportation's bike program and includes incorporating cycling in many transportation projects, installing bike racks and coordinating cycling events. This indicator measures the amount of linear miles of designated bike lanes in each CSA. (SOURCE: BIKEBALTIMORE - DEPARTMENT OF TRANSPORTATION, 2012)

Five Highest:

1. Downtown/Seton Hill
2. Harbor East/Little Italy
3. Fells Point
4. Midtown
5. Inner Harbor/Federal Hill

Five Lowest:

Seven CSAs did not have any bike lanes.

Average Daily Bus Stop Ridership per 1,000 Residents

Measure of utilization of the bus network.

Definition: Maryland Department of Transportation's Maryland Transit Administration Bus Stops including CityLink, LocalLink, Express BusLink, Commuter Bus & Intercity Bus. Automatic Passenger Counting (APC) system data reflects average daily weekday bus stop ridership (boarding and alighting) from the Fall schedule period and does not exclude outliers. (SOURCE: MARYLAND TRANSIT ADMINISTRATION, 2017; U.S. CENSUS, 2010)

Five Highest:

1. Downtown/Seton Hill
2. Greater Mondawmin
3. Oldtown/Middle East
4. Orangeville/East Highlandtown
5. The Waverlies

Five Lowest:

1. Canton
2. Cross-Country/Cheswolde
3. South Baltimore
4. Fells Point
5. Greater Roland Park/Poplar Hill

Sanitation

Rate of Dirty Street and Alley Reports per 1,000 Residents

Measure of cleanliness in the public rights-of-way.

Definition: The rate of service requests for dirty streets and alleys through Baltimore's 311 system per 1,000 residents. More than one service request may be made for the same issue but is logged as a unique request. (SOURCE: BALTIMORE CITY CITISTAT, 2011, 2012, 2013, 2014, 2015, 2016, 2017; U.S. CENSUS, 2010)

Five Highest:

1. Southwest Baltimore
2. Patterson Park North & East
3. Washington Village/Pigtown
4. Madison/East End
5. Greenmount East

Five Lowest:

1. Cross-Country/Cheswolde
2. Dickeyville/Franklintown
3. Harford/Echodale
4. North Baltimore/Guilford/Homeland
5. Cherry Hill

Rate of Clogged Storm Drain Reports per 1,000 Residents

Measure of cleanliness in storm waterways.

Definition: The rate of service requests for addressing clogged storm drains made through Baltimore's 311 system per 1,000 residents. More than one service request may be made for the same issue but is logged as a unique request. (SOURCE: BALTIMORE CITY CITISTAT, 2011, 2012, 2013, 2014, 2015, 2016, 2017; U.S. CENSUS, 2010)

Five Highest:

1. Downtown/Seton Hill
2. Westport/Mount Winans/Lakeland
3. Morrell Park/Violetville
4. Fells Point
5. Canton

Five Lowest:

1. Dickeyville/Franklintown
2. Cross-Country/Cheswolde
3. Dorchester/Ashburton
4. Claremont/Armistead
5. Edmondson Village

Energy and Weatherization

Percent of Homes Heated by Utility Gas

Measure of homes that use utility gas for heat.

Definition: The percentage of homes that use utility gas for heat and cooking out of all homes. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Madison/East End
2. Belair-Edison
3. Greater Rosemont
4. Hamilton
5. Northwood

Five Lowest:

1. Downtown/Seton Hill
2. Harbor East/Little Italy
3. Midtown
4. Inner Harbor/Federal Hill
5. Oldtown/Middle East

Percent of Homes Heated by Electricity

Measure of homes that use electricity for heat.

Definition: The percentage of homes that use electricity for heat and cooking out of all homes. (SOURCE: AMERICAN COMMUNITY SURVEY, 2013-2017)

Five Highest:

1. Downtown/Seton Hill
2. Inner Harbor/Federal Hill
3. Midtown
4. Harbor East/Little Italy
5. Oldtown/Middle East

Five Lowest:

1. Hamilton
2. Midway/Coldstream
3. Lauraville
4. Belair-Edison
5. Dorchester/Ashburton

Percent of Residential Properties Weatherized (From Vital Signs 16)

Measure of residential weatherization to increase energy efficiency and safety.

Definition: The percent of residential properties that were eligible for and received weatherization assistance such as air sealing or furnace replacements during the year. The Weatherization Assistance Program helps eligible low-income households lower their energy costs by increasing the energy efficiency of their homes, while ensuring their health and safety. (SOURCE: MARYLAND DEPARTMENT OF HOUSING AND COMMUNITY DEVELOPMENT, 2011, 2012, 2013, 2014, 2015, 2016; U.S. CENSUS, 2010)

Five Highest:

1. Oldtown/Middle East
2. Pimlico/Arlington/Hilltop
3. Southwest Baltimore
4. Sandtown-Winchester/Harlem Park
5. Greater Rosemont

Five Lowest:

Ten CSAs had zero percent of homes eligible for and/or receiving WAP services.

Green Space and Water Use (from Vital Signs 14)

Number of Community Managed Open Spaces

Measures of community managed open spaces in an area.

Definition: The number of community managed open spaces in an area that include community gardens (food-producing or ornamental), Adopt-A-Lots, or some other green space managed by the community. (SOURCE: DATA WAS INTEGRATED FROM BALTIMORE GREEN SPACE, PARKS AND PEOPLE, MASTER GARDENERS, THE JOHNS HOPKINS CENTER FOR A LIVABLE FUTURE, AND POWER IN DIRT. ANALYSIS: BALTIMORE NEIGHBORHOOD INDICATORS ALLIANCE-JACOB FRANCE INSTITUTE, 2014)

Five Highest:

1. Greenmount East
2. Southwest Baltimore
3. Upton/Druid Heights
4. Sandtown-Winchester/Harlem Park
5. Penn North/Reservoir Hill

Five Lowest:

Eight CSAs have zero community managed open spaces.

Number of Trees Planted

Measures the annual number of trees planted in Baltimore.

Definition: The Baltimore City Department of Parks and Recreation’s TreeBaltimore program has the goal of planting over 8,000 trees per year. This is part of the mayor’s initiative to attract 10,000 new families to Baltimore and to provide a greener, sustainable environment. This indicator measures the number of trees planted annually by the TreeBaltimore program. (SOURCE: BALTIMORE CITY DEPARTMENT OF PARKS AND RECREATION TREEBALTIMORE, 2014, 2015, 2016, 2017)

Five Highest:

1. Brooklyn/Curtis Bay/Hawkins Point
2. Greenmount East
3. Clifton-Berea
4. Greater Rosemont
5. Cherry Hill

Five Lowest:

Eleven CSAs have no trees planted.

Percent of Area Covered by Trees

Measure of tree canopy in an area .

Definition: The percent of total land area comprised of tree canopy. The primary sources for this land cover layer were high-resolution aerial imagery and 3D airborne LiDAR data. Other sources of data include the City’s planimetric GIS database (building footprints and road casing polygons). (ANALYSIS BY:UNIVERSITY OF VERMONT SPATIAL ANALYSIS LAB. DATA CURRENT AS OF 2015)

Five Highest:

1. Dickeyville/Franklinton
2. Mount Washington/Coldspring
3. Greater Roland Park/Poplar Hill
4. Edmondson Village
5. Forest Park/Walbrook

Five Lowest:

1. Highlandtown
2. Southeastern
3. South Baltimore
4. Madison/East End
5. Patterson Park North & East

Community Engagement

(From Vital Signs 16)

Percent of the Population Who Are Registered to Vote

Measures civic engagement.

Definition: The percentage of persons over the age of 18 registered to vote out of all persons 18 years and over.

(SOURCE: BALTIMORE CITY BOARD OF ELECTIONS, 2010, 2012, 2014, 2016)

Five Highest:

1. South Baltimore
2. Mount Washington/Coldspring
3. Edmondson Village
4. Greater Roland Park/Poplar Hill
5. The Waverlies

Five Lowest:

1. Brooklyn/Curtis Bay/Hawkins Point
2. Greater Charles Village/Barclay
3. Orangeville/East Highlandtown
4. Southeastern
5. Morrell Park/Violetville

Percent of Population Who Voted in the Last General Election

A proxy measure designed to reflect neighborhood action and participation in community life.

Definition: The percentage of persons who voted in the last general election out of all registered voters. (SOURCE:

BALTIMORE CITY BOARD OF ELECTIONS, 2010, 2012, 2014, 2016)

Five Highest:

1. Mount Washington/Coldspring
2. Greater Roland Park/Poplar Hill
3. South Baltimore
4. Beechfield/Ten Hills/West Hills
5. Lauraville

Five Lowest:

1. Brooklyn/Curtis Bay/Hawkins Point
2. Southeastern
3. Orangeville/East Highlandtown
4. Morrell Park/Violetville
5. Southwest Baltimore
